Prepared for Aboriginal Affairs NSW

Very Remote Australia (NSW) covers the Areas called Very Remote Australia as at the 2016 Census.

Preface

This report uses data from the Census, held every five years by the Australian Bureau of Statistics (ABS), to paint a profile of the Aboriginal population of Very Remote Australia (NSW) as it was in August 2016, and show how it had changed over the previous decade.

- Language in this report** Where it is used in this Portrait, the term 'Aboriginal' is used to describe the many nations, language groups and clans in Very Remote Australia (NSW), including those from the Torres Strait. This usage recognises that Aboriginal people are the original inhabitants of NSW.
- Who is included?** The people described in this Portrait were the usual residents of Very Remote Australia (NSW) in 2016, even if they completed the Census away from home. People who were visiting Very Remote Australia (NSW) on Census night are not included.
- Who are Aboriginal?** Aboriginal people, in this Portrait, means all people who, in completing the Census, responded that they had Aboriginal or Torres Strait Islander origins, or both. Non-Aboriginal people are those who said they did not have these origins. Note: the Census question asks people about their origins; it does not ask how they identify in their daily lives.
- Are all Aboriginal people counted?** Not all Aboriginal people completed the Census and identified their origins: 34.6% of the region's Census respondents said they had Aboriginal origins, but another 12.7% did not answer this question. The ABS estimates that the net undercount rate for Aboriginal and Torres Strait Islander peoples was 17.5% in 2016 (equivalent to 137,750 persons nationally). This is slightly higher than 2011 (17.2%). This means that, on average, the Aboriginal population was about a fifth larger than counted. However, despite such omissions, the Census is a vital source of information about Aboriginal Australians.
- National trends** Nationally, the number of people with Aboriginal origins counted in the Census rose by a fifth (21%) between 2011 and 2016. Almost three-quarters of the increase was from births; the rest was caused by more people identifying Aboriginal origins than previously.
- Sources of data** The data for this report are drawn from the Aboriginal and Torres Strait Islander Peoples (Indigenous) Profiles and Community Profiles published by the ABS from the 2006, 2011 and 2016 Censuses. Data in this portrait for 2011 and 2006 censuses have been produced using the 2016 boundary regardless of changes to previous LGA or other geographical classifications over time.
- Note: difference and changes shown in this Portrait are rounded to the nearest significant figure but are calculated from the unrounded data, so small anomalies are possible when comparing differences. Small Census counts are randomised by the ABS to protect privacy so are not precise; in this Portrait, numbers less than 5 are reported as 'a few'.

Snapshot: Very Remote Australia (NSW), 2016

- ⌘ In the 2016 Census, 1,961 of the 5,664 residents (34.6%) counted in Very Remote Australia (NSW) said that they had Aboriginal or Torres Strait Islander origins, or both. Of these, 98% were Aboriginal.
 - Between 2011 and 2016, the counted Aboriginal population fell by 28%, from 2,732; the overall population of the region fell by 29%.
 - About 9% of the Aboriginal population were under 5 in 2016. This infant population was not enough to offset the population decline in other age groups.
- ⌘ The Aboriginal community is significantly younger than the non-Aboriginal population, with a median age of 28 vs 45 years.
 - There was a higher proportion under 18 years old: 33% compared with 18%.
 - There was a lower proportion aged 65 or more: 7% compared with 20%.
- ⌘ Aboriginal households had an average of 2.9 residents, which was larger than non-Aboriginal households (2.2) in the region.
 - Almost three in ten Aboriginal households were one parent families.
 - One in five were couples with children.
 - 22% of the Aboriginal households were single persons (vs 39% of non-Aboriginal households).
- ⌘ Aboriginal households most commonly lived in rented dwellings (68%), with 19% in fully owned and 6% in mortgaged dwellings.
 - In all, 24% of Aboriginal households in Very Remote Australia (NSW) were home-owners (with or without a mortgage), which was down by 4% since 2011.
- ⌘ The median income of Aboriginal adults was about \$371 a week, which was 56% that of all adults here (\$668).
 - The median income gap had widened by 3% since 2011.
- ⌘ 36% of Aboriginal adults were in the labour force, compared with 68% of non-Aboriginal adults.
 - 26% of the Aboriginal workforce were unemployed, compared with 4% of the non-Aboriginal workforce.
- ⌘ One in four Aboriginal residents (468 people) was attending an educational institution.
 - 184 Aboriginal people had completed Year 12, which was 14% less than in 2011 and 235% more than in 2006.
 - Compared with non-Aboriginal residents of the same age, there were:
 - 17% fewer Aboriginal people aged 15–19 year olds in education;
 - 13% fewer Aboriginal people aged 20–24 year olds in education.
 - 41% of Aboriginal adults had some type of post-school qualification, compared with 59% of non-Aboriginal adults in the region (2% had a degree or higher, compared with 25%).
- ⌘ 96 Aboriginal people (4.9% of the Aboriginal population) reported that they had a severe or profound disability.
 - Aboriginal people had higher disability rates than average in most age groups.
 - the disability rate for Aboriginal people aged 35–44 year olds was 3 times the average for this age group in Very Remote NSW.
 - for 65+ year olds, the Aboriginal rate was 2.1 times the average in the region.
 - 10% of Aboriginal adults (aged 15+) gave assistance to a person with a severe disability.
- ⌘ 41% of the region's Aboriginal households had an internet connection, which was 5% higher than in 2011.

Tracking changes in Very Remote Australia (NSW)

In the table below, some indicators of community structure and well-being are calculated for Aboriginal people in Very Remote Australia (NSW). The difference or gap between Aboriginal and non-Aboriginal people in Very Remote NSW is shown for 2016. Changes in the Aboriginal rates are tracked over the past five years and decade.

Indicator	Very Remote Australia (NSW), 2016			Change in Aboriginal rate	
	Aboriginal	non-Aboriginal	Gap in 2016	last 5 years 2011–2016	last decade 2006–2016
				last 5 years 2011–2016	last decade 2006–2016
home ownership % of households owning/buying their home	24%	64%	-39%	dn 4%	dn 6%
personal income* median weekly income of adults (15+)	\$371	\$668	-44%	up 13%	up 59%
household income median weekly income of households	\$830	\$1,107	-25%	up 8%	up 34%
workforce participation % of adults 15+ in labour force	36%	68%	-32%	dn 10%	dn 9%
unemployment % of unemployed in workforce	26%	4%	+23%	up 6%	up 12%
employment employed adults as % of population	19%	54%	-35%	dn 5%	dn 8%
pre-school % of infants under 5 in education	22%	22%	-0%	dn 3%	dn 2%
teenage education % of 15–19 year-olds in education	51%	68%	-17%	up 3%	up 30%
children at school % of 5–14 year olds in education	88%	95%	-8%	up 1%	up 8%
Year 12 completion % of adults (15+) who have left school	14%	41%	-28%	up 1%	up 6%
average schooling average school Year completed	9.6 yrs	10.6 yrs	-1.1 yrs	0.3 yrs	0.7 yrs
tertiary qualifications % of adults 15+ with a post-school qualification	41%	51%	-10%	up 9%	up 9%
degree % of adults 15+ with a degree or higher qualification	2%	12%	-10%	dn 1%	up 1%
postgrad % of adults 15+ with a postgraduate qualification	0%	3%	-2%	dn 0%	up 0%
disability* % of people with a severe, long-term disability	4.9%	3.5%	+1.4%	up 1%	up 2%

* Personal income and disability data compare Aboriginal rates with those of the whole population in Very Remote Australia (NSW).

Aboriginal population and growth

In the 2016 Census, the region's Aboriginal population was counted as 1,961 people, of whom 1,930 identified as Aboriginal and 25 as both Aboriginal and Torres Strait Islander; a few identified as Torres Strait Islander.

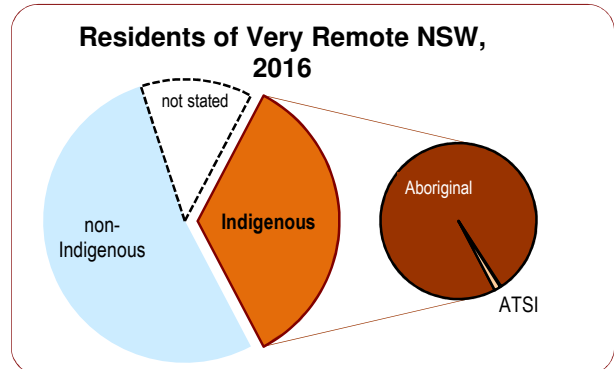

- ⌘ Aboriginal people comprised 34.6% of the region's population, compared with 2.9% in NSW.

12.7% of Very Remote Australia (NSW) people did not say whether they had Aboriginal or Torres Strait Islander origins.

- ⌘ Among the Aboriginal people here, there were 101 females per 100 males.

There were 119 males per 100 females among non-Aboriginal people.

- ⌘ The ABS estimates that the net Census undercount rate nationally for Aboriginal and Torres Strait Islander peoples was 17.5% in 2016.

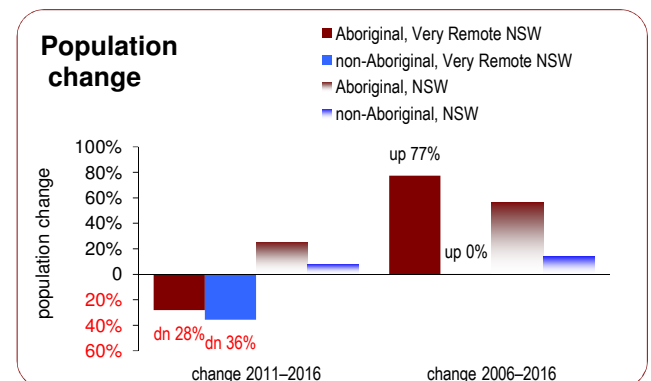

Between 2011 and 2016, the counted Aboriginal population in Very Remote Australia (NSW) fell by 28% (by 771) from 2,732; in total, the region's population fell by 29%.

The number of infants born over the last five years was not enough to offset the population decline in other age groups.

- ⌘ Between 2006 and 2016, the region's Aboriginal population rose by 77% (from 1,106 in 2006).

The region's non-Aboriginal population was virtually unchanged over the decade.

The Aboriginal population counted in NSW rose by 56% over the decade.

On Census night 2016, 1,833 Aboriginal residents of Very Remote NSW were at home (93%), and 125 were staying away from home (6%). Offsetting those away, there were 148 Aboriginal visitors staying in the region that night, equivalent to 8% of the Aboriginal resident population.

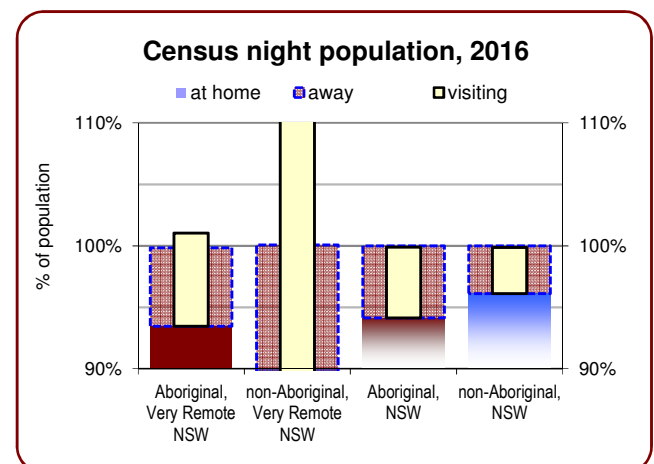

- ⌘ There were 22 visitors from the same locality (eg. overnighting with neighbours).

73% of the visitors were from elsewhere in NSW and 3% were from Queensland; 2% were from South Australia.

- ⌘ The proportion of Aboriginal residents away from home was 2% lower than in 2011.

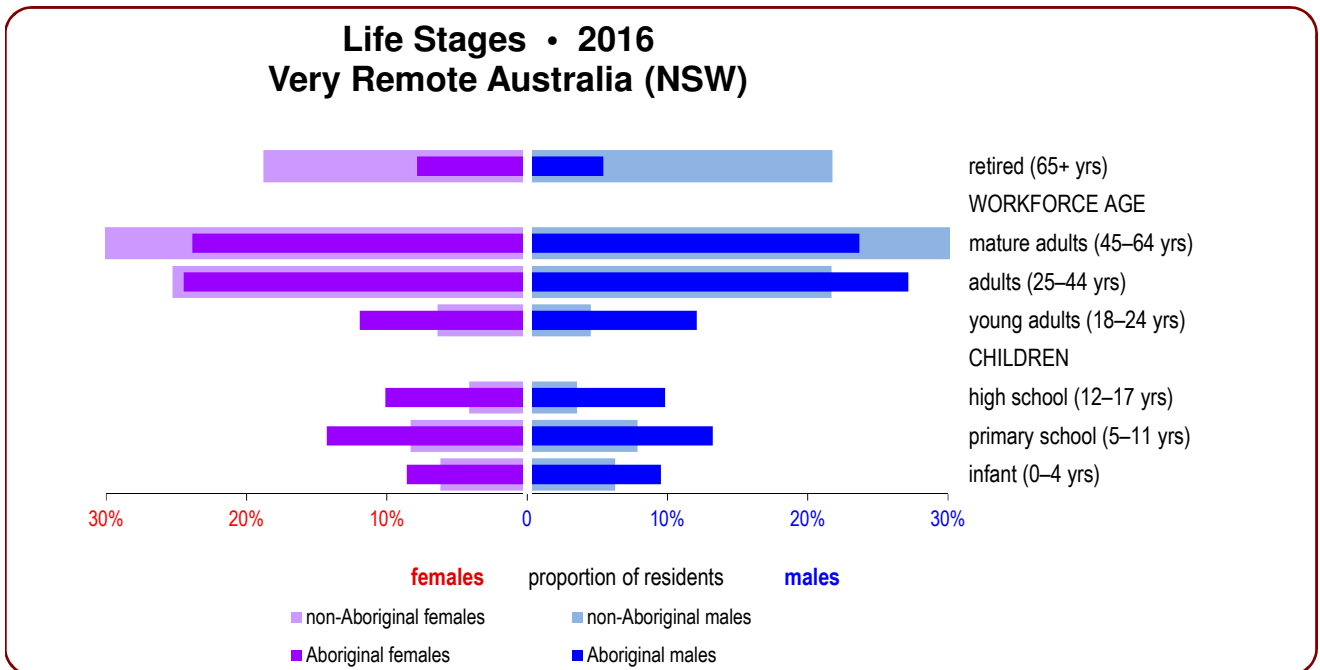

The proportion away from home was 5% lower than for non-Aboriginal residents of this region; it was similar to Aboriginal residents of NSW.

- ⌘ There were 72 fewer Aboriginal visitors than in 2011, when there were 220, equal to 8% of the Aboriginal population.

Life stages

The Aboriginal population of Very Remote Australia (NSW) had a similar proportion in the working stage of life (15–64 years) than the non-Aboriginal population, with a higher proportion of children under 15 and a smaller proportion of people aged 65 or older.

In the region's Aboriginal population in 2016:

⌘ 1,200 people (61% or six in ten) were adults aged 18–64.

- 232 (or 12%) were aged 18–24
- 508 (or 26%) were aged 25–44
- 460 (or 23%) were aged 45–64

The number aged 18–64 was down 22% from 2011; and up 83% from 2006.

⌘ 642 Aboriginal residents (33% or one in three) were children under 18.

- 176 (or 9%) were under five
- 268 (or 14%) were aged 5–11
- 198 (or 10%) were aged 12–17

The number of children was down 39% since 2011; and up 61% since 2006.

⌘ 128 of Aboriginal residents were aged 65+ years (7% of the total).

The number aged 65+ had fallen by 12% since 2011; it was 156% higher than in 2006.

The proportion aged 18–64 among Aboriginal people was almost the same as for non-Aboriginal (62%).

6% more of the Aboriginal population were young adults (18–24 yrs), and 9% fewer were mature adults (45–64 yrs), compared with the non-Aboriginal population of the region.

Those aged 18–64 made up 54% of the Aboriginal community in NSW; their number had risen by 29% from 2011.

The proportion of Aboriginal children in Very Remote NSW was 14% higher than the average for non-Aboriginal people.

In NSW, 41% of the Aboriginal community were children under 18; the number was up 18% since 2011.

20% of non-Aboriginal people in Very Remote NSW were aged 65+.

Across NSW, 5% of Aboriginal people were aged 65+; their number had risen by 58% since 2011, and by 136% since 2006.

Age profile

The Aboriginal population of Very Remote Australia (NSW) has an age profile that is significantly younger than the non-Aboriginal population, with a lower median age (28 vs 45 years).

For the region's Aboriginal population in 2016:

- ⌘ The average age was 32 years in 2016, with half the population aged under 28 years (the median age).
The largest 5-year age groups were 5–9 years (10%), 0–4 years (9%) and 20–24 years (9%).
- ⌘ The average age was 3 years higher than in 2011 and 3 years higher than in 2006.

Proportionally, the biggest increases since 2011 were of 25–29 year olds (1% more), 65+ year olds (12% less) and 50–54 year olds (12% less).

- ⌘ 128 Aboriginal people (6.5%) were aged 65+ years, compared with 20% of non-Aboriginal residents.
- ⌘ There were noticeably more males than females aged 60–64 years, 40–44 years and 35–39 years.

The average age was 12 years younger than for the non-Aboriginal residents; the median age was 17 years younger.

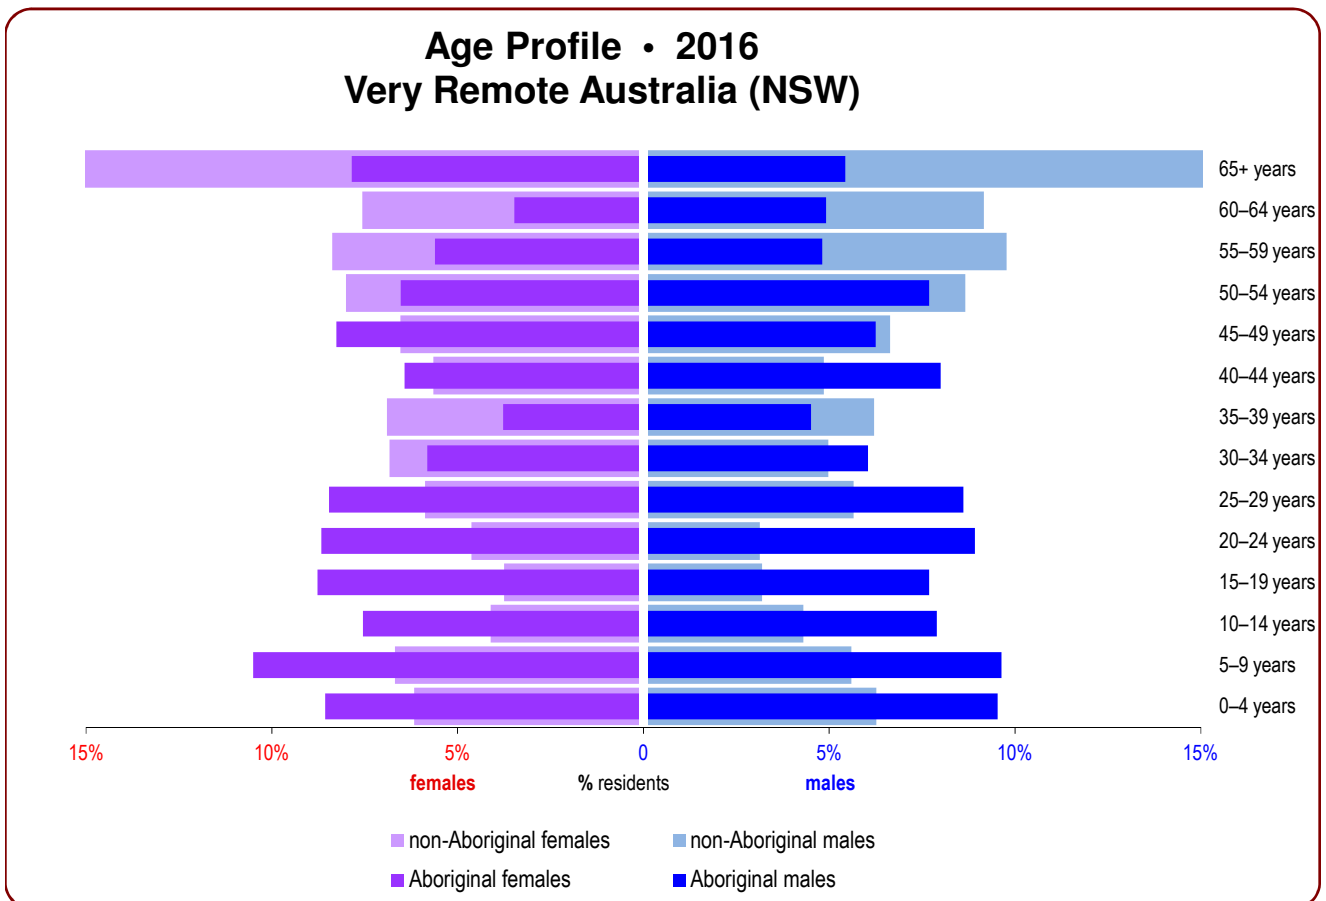

Non-Aboriginal population: about 6% were 5–9 years and also 0–4 years and 4% were 20–24 years.

The average age of Aboriginal people in NSW had risen by one year since 2011, and risen by 3 years in the decade since 2006.

In the NSW Aboriginal population, the increases since 2011 were: 25–29 year olds (36%); 65+ year olds (58%); and 50–54 year olds (31%).

The number aged 65+ was 12% lower than in 2011; the percentage of people this age was up by 1.2% since 2011, when it was 5.3%.

There were many more females than males among those aged 65+ years, then those aged 45–49 years and 55–59 years.

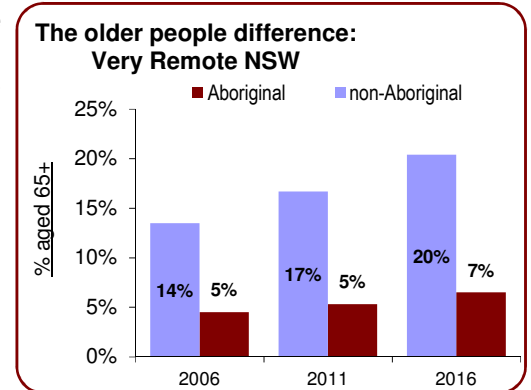

Population Indicators

The older people difference

% aged 65+ in population

Commonly, Aboriginal communities have a lower proportion of people aged over 65, due to a shorter average life-span and higher birth rates.

- ⌘ In 2016, 6.5% of the region's Aboriginal residents were aged 65 or over, compared with 20.4% of non-Aboriginal residents. The older people difference was -14%.
- ⌘ The older people difference had increased by 3% since 2011, after having increased by 2% over the previous five years.
- ⌘ The older people difference in NSW was -11%. It had changed little since 2011 and changed little over the previous five years.

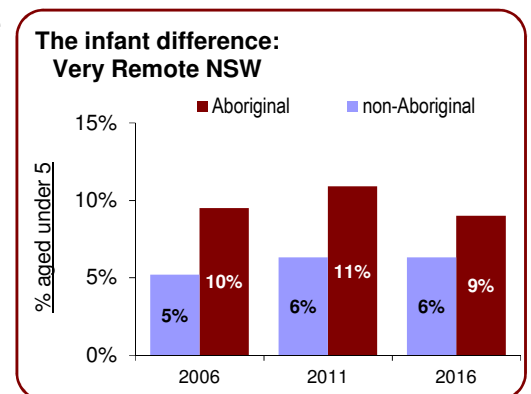

The infant difference

% aged under 5 in population

Aboriginal communities generally have a higher proportion of young people due to larger families and fewer older people.

- ⌘ In 2016, 9.0% of the region's Aboriginal residents were infants, compared with 6.3% of non-Aboriginal residents. The infant difference was +3%.
- ⌘ The infant difference had closed by 2% since 2011, after having changed little over the previous five years.
- ⌘ The infant difference in NSW was +5%. It had changed little since 2011 and changed little over 2006 to 2011.

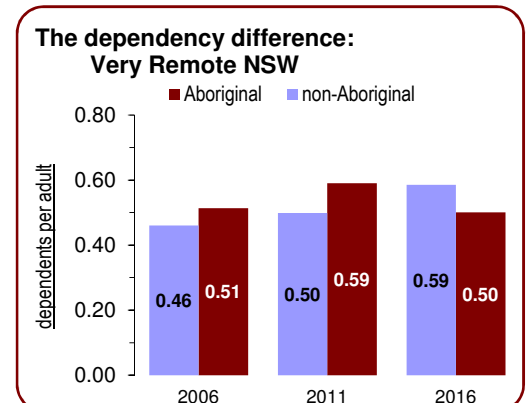

The dependency difference

ratio of dependents to working age adults

The dependency ratio is the average number of people of dependent age (under 15 or 65+) for each person of working age. The national average is 0.5 dependents per adult. A higher ratio means each person of working age has more dependents to support, on average.

- ⌘ In 2016, the region's Aboriginal community had a dependency ratio of 0.50, compared with 0.59 for the non-Aboriginal community. The Aboriginal dependency ratio was 0.09 lower.
- ⌘ The dependency difference had reversed since 2011, after having widened by 0.04 over the previous five years.
- ⌘ The dependency difference in NSW was 0.13 and had closed by 0.04 since 2011. It had closed by 0.05 over 2006 to 2011.

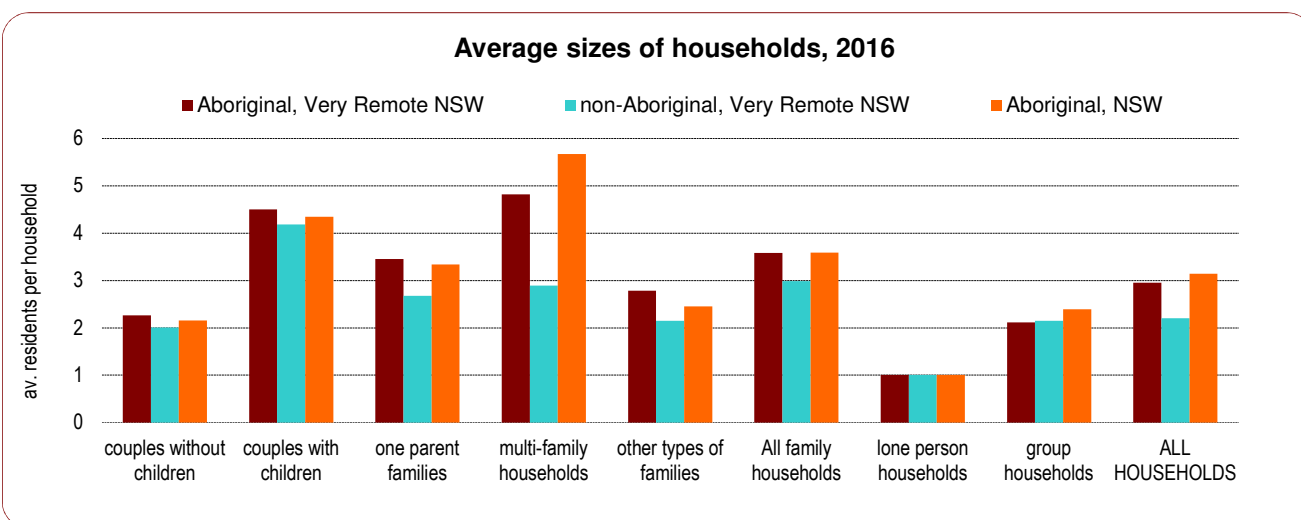

Household types and sizes

In 2016, the 1,961 Aboriginal residents of Very Remote Australia (NSW) were living in 674 households, 23% less than in 2011.

The main types of Aboriginal households* in the region in 2016 were:

- ⌘ Almost three in ten were one parent families (189 households, or 28%). 24% higher than non-Aboriginal here
- ⌘ One in five were couples with children (143 households, or 21%). 3% less than non-Aboriginal
- ⌘ One in six were couples without children (104 households, or 15%). 13% less than non-Aboriginal
- ⌘ One in four were one-person households (150 households, or 22%). 17% less than non-Aboriginal
- ⌘ There were 34 multi-family households, and 23 other types of households.

* Aboriginal households are those with at least one Aboriginal resident.

Aboriginal households had an average of 2.9 residents in 2016, which was 0.2 lower than in 2011, and 0.4 lower than in 2006.

- ⌘ Aboriginal households here were 0.2 smaller than in NSW, which averaged 3.1 residents. The average size of the NSW Aboriginal households was little changed since 2011.
- ⌘ The average size of non-Aboriginal households in the region was 2.2 residents; Aboriginal households were 34% larger, on average. The average size of non-Aboriginal households changed little from 2011.
- ⌘ The larger size of Aboriginal households is consistent with lower proportions of people living alone. Aboriginal households: 22% lone person; Other households: 39%.
- ⌘ Aboriginal couple families had an average of 2.5 children, compared with 2.2 for non-Aboriginal families here. Aboriginal families in NSW averaged 2.3 children. The average size of Aboriginal nuclear families was little changed since 2011, and down by 0.2 from 2006.
- ⌘ Aboriginal one-parent families averaged 2.5 children, compared with 2.3 in NSW and 1.7 for non-Aboriginal one-parent families here. The average number of children per one-parent family was down by 0.1 since 2011, and down by 0.1 since 2006.
- ⌘ At an average size of 2.9 persons, the 674 Aboriginal households had some 2,000 members, but only 1,761 Aboriginal people were counted in these households. This suggests that some 230 people in the region's Aboriginal households (one in nine) did not identify as Aboriginal in the Census.

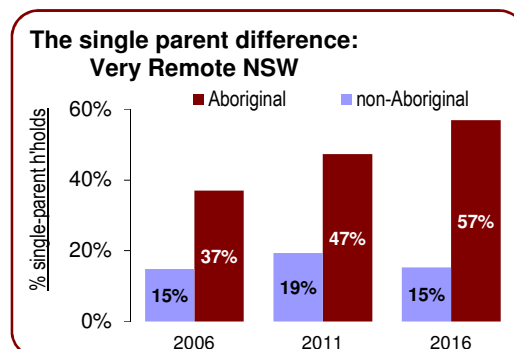

Household Indicators

The single parent difference

% of families with children having one parent

Single parent families often have low incomes because it is difficult for the parent to work without adequate child care and support. High proportions of one-parent families can indicate a higher need for support services.

- ⌘ In 2016, 57% of the region's Aboriginal family households with children had one parent, compared with 15% of non-Aboriginal families. The difference was +42%.
- ⌘ The single parent difference had increased by 14% since 2011, after having increased by 6% over the previous five years.
- ⌘ The single parent difference in NSW was +23%. It had decreased by 2% since 2011 after having decreased by 1% over 2006 to 2011.

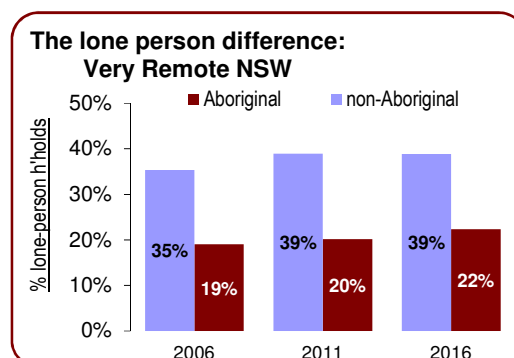

The lone person difference

% of households with one person

Living alone is less common for Aboriginal people than for others, so most communities have a large lone person difference. The difference is influenced locally by the availability of small dwellings.

- ⌘ In 2016, 22% of the region's Aboriginal households were lone persons, compared with 39% of non-Aboriginal households. The lone person difference was -17%.
- ⌘ The lone person difference had reduced by 2% since 2011, after having increased by 3% over the previous five years.
- ⌘ The lone person difference in NSW was -9% and had changed little since 2011. It had decreased by 1% between 2006 and 2011.

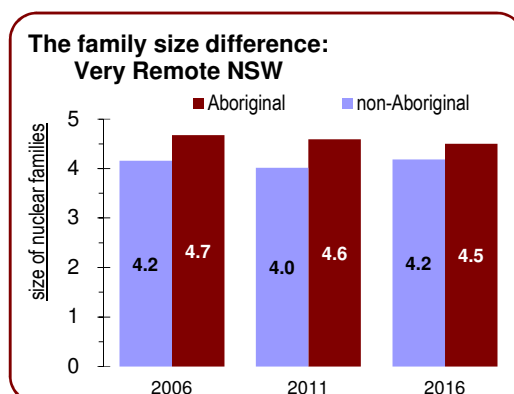

The family size difference

average size of two-parent families

The family size difference is the gap between the average sizes of Aboriginal and non-Aboriginal 'nuclear families' (couples with children). Larger families have to spread their income among more members, so living standards tend to be lower.

- ⌘ In 2016, the average size of the region's Aboriginal nuclear families was 4.5 persons (i.e. 2.5 children), compared with 4.2 persons (2.2 children) for non-Aboriginal families, a difference of +0.3 children per family.
- ⌘ The family size difference had decreased by 0.3 since 2011, after having increased by 0.1 over the previous five years.
- ⌘ The family size difference in NSW was 0.3 children per family, and had decreased by 0.1 since 2011. It had increased by 0.1 from 2006 to 2011.

Types of housing

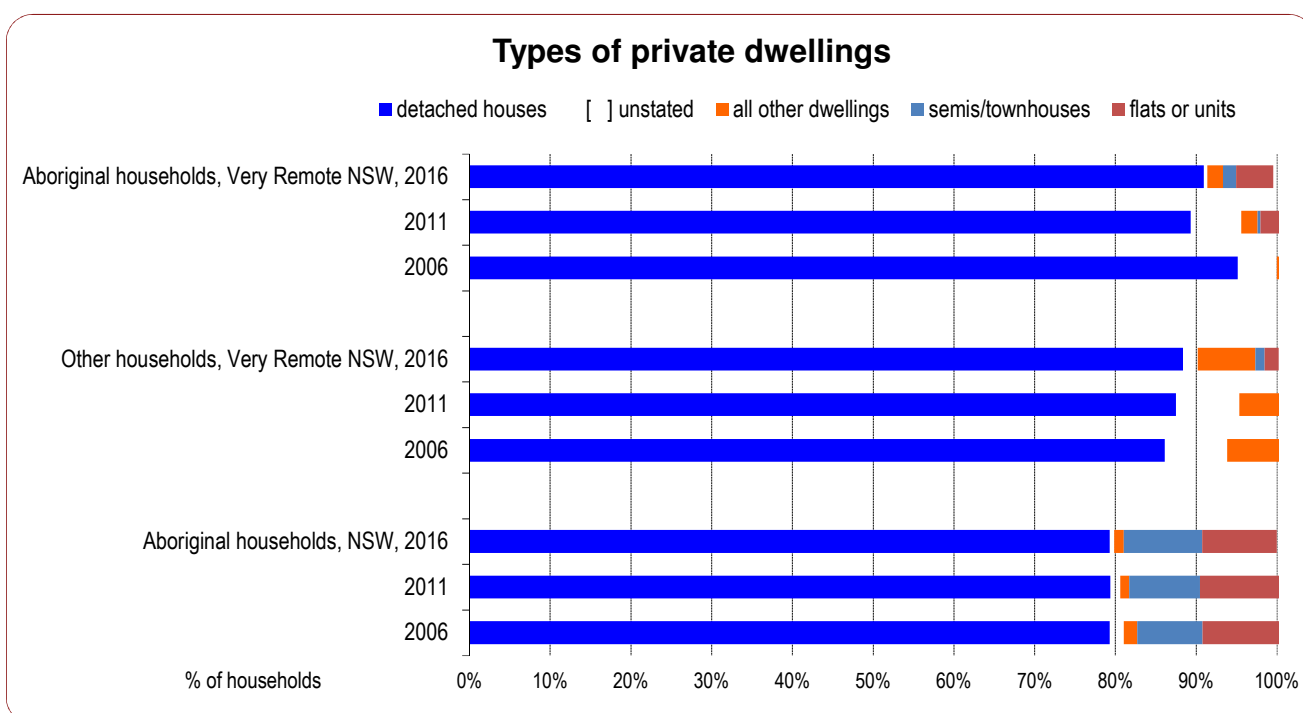

In 2016, most Aboriginal households in Very Remote Australia (NSW) (91%) were living in detached houses, with 5% living in flats or units and 2% living in semis/townhouses.

⌘ Compared with other households in Very Remote NSW, 3% more Aboriginal households lived in flats or units, and 3% fewer lived in improvised shacks.

The proportion in detached houses was 12% higher than that of Aboriginal households in NSW. The proportion in semis/townhouses was 8% lower.

⌘ The proportion of Aboriginal households living in detached houses in Very Remote NSW was up by 2% since 2011, and was 4% lower than in 2006.

The proportion of non-Aboriginal households in detached houses in Very Remote NSW was up by 1% since 2011 and up by 2% since 2006.

63 Aboriginal people in the region (3%) were counted living in institutional accommodation on Census night (eg. nursing homes, hospitals, boarding houses, correctional centres, barracks or boarding schools).

⌘ There were 59 Aboriginal people living in institutional accommodation in this region in 2011, and 117 in 2006.

In 2016, there were 165 people living in institutional accommodation in Very Remote Australia (NSW); 2% of the non-Aboriginal population lived in institutions.

⌘ There were 7.9 males per female among Aboriginal people in institutional accommodation.

Note: very small numbers are randomly altered by the ABS to protect privacy, so are not precise.

24 Aboriginal people were reported living in improvised accommodation (eg. shacks, tents or sleeping out) in the region on Census night.

⌘ This was up by 24 since 2011.
There were 12 males and 6 females in 2016.

There were 103 non-Aboriginal people in improvised accommodation in Very Remote NSW in 2016.

Housing costs and tenure

In 2016, Aboriginal households in Very Remote Australia (NSW) most commonly lived in dwellings that were rented (68% of the households). Another 19% lived in dwellings that were fully owned, and 6% in homes that were being purchased.

- ⌘ The proportion of Aboriginal households that rented, 68%, was 43% higher than for other households here.

The proportion living in rented dwellings was up by 5% since 2011, and was 5% higher than in 2006.

The median weekly rent paid by Aboriginal households was \$100. It was \$100 in 2011 and \$65 in 2006.

- ⌘ The proportion living in dwellings that were being bought (6%) was 11% lower than for Other households.

The proportion living in mortgaged dwellings was down by 6% since 2011; and 2% lower than in 2006.

The median monthly mortgage paid by Aboriginal households in the region in 2016 was \$765. It was \$867 in 2011 and \$700 for 2006.

- ⌘ The proportion of Aboriginal households in fully owned dwellings (19%) was 28% lower than for non-Aboriginal households.

The proportion in fully owned dwellings was up by 2% since 2011; and 3% lower than in 2006.

Among Aboriginal households, the proportion renting in Very Remote NSW was 14% higher than the rate in NSW.

25% of Other households in Very Remote NSW were renting, 6% lower than in 2011, and 4% lower than in 2006.

The median weekly rent paid by Other households in Very Remote NSW was \$36. It was \$38 in 2011 and \$8 in 2006.

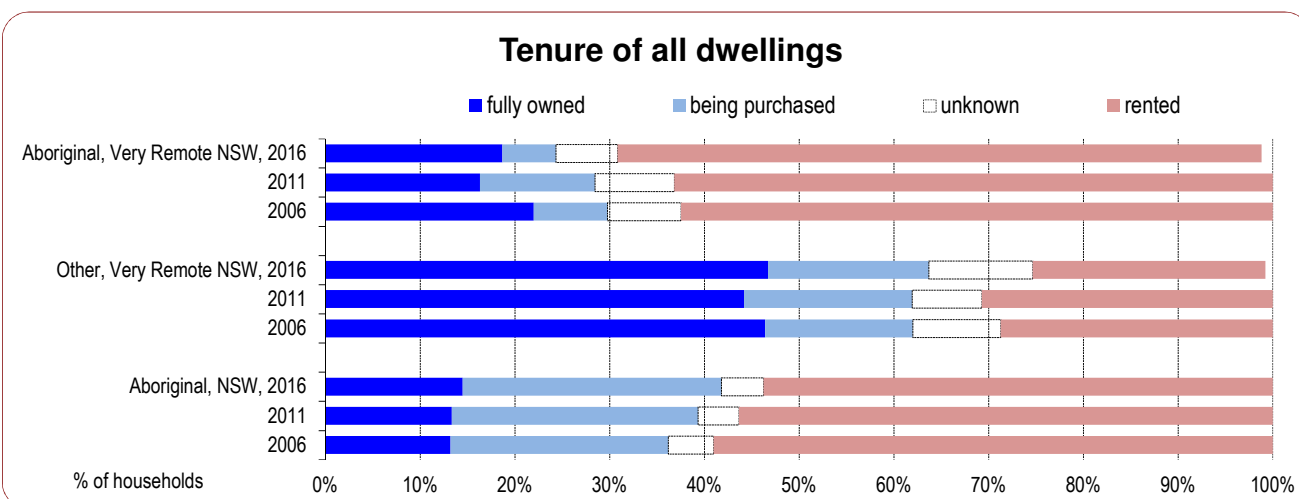

In NSW, 27% of Aboriginal households were home-buyers with a mortgage.

17% of the Other households in Very Remote NSW had a mortgage, down by 1% since 2011, and up by 1% since 2006.

The median mortgage paid by Other households in Very Remote NSW was \$1,270. It was \$867 in 2011 and \$1,083 in 2006.

The proportion of Aboriginal households in fully owned dwellings in Very Remote NSW was 4% higher than the average in NSW.

The proportion of Other households in fully owned dwellings in Very Remote NSW was up by 3% since 2011, and steady since 2006.

Of 458 Aboriginal rental households, 43% were managed by community housing and 29% were managed by public housing.

- ⌘ 134 Aboriginal households lived in public housing (20% of all households).

This number had fallen by 62 since 2011.

Only 2% of the Other households lived in public housing.

The number of Other households in public housing in Very Remote NSW had fallen by 13.

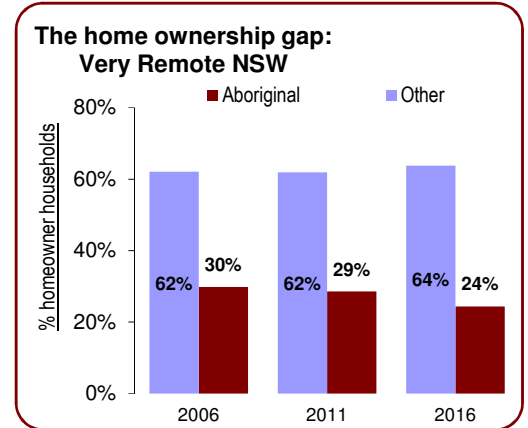

Housing Indicators

The home ownership gap

% of households owning/buying their home

Ownership of a home is the main way that most Australians accumulate wealth and ensure secure accommodation.

- ⌘ In 2016, 24% of Aboriginal households in Very Remote Australia (NSW) were either buying or owned their home, compared with 64% of other households, a home ownership gap of -39%.
- ⌘ The gap had widened by 6% since 2011, after having widened by 1% over the previous five years.
- ⌘ The home ownership gap in NSW was -24% and had closed by 4% since 2011. It had closed by 3% between 2006 and 2011.

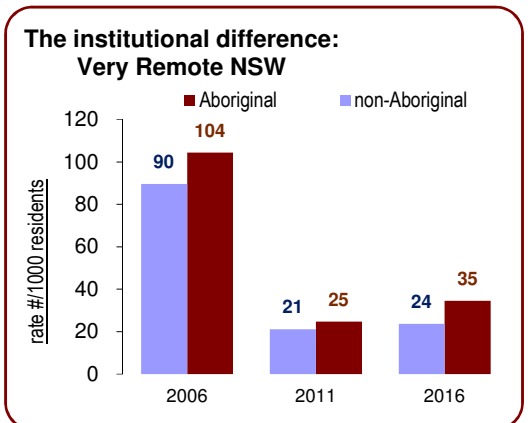

The institutional difference

rate per 1000 of residents in non-private dwellings

Differences in proportion of people in institutional accommodation will reflect the nature and extent of these institutions in the area – they might include hotels, boarding houses, nursing homes, correctional centres, barracks or hospitals.

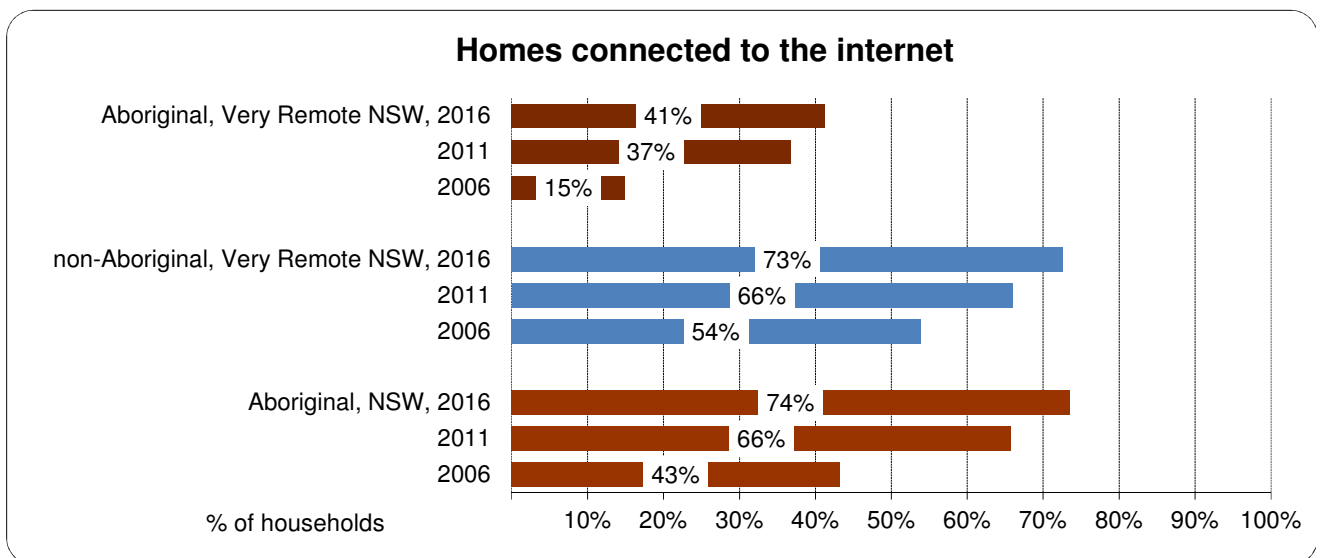

- ⌘ In 2016, 35 in every 1000 Aboriginal residents in Very Remote Australia (NSW) were in institutional housing, compared with 24 per 1000 non-Aboriginal residents. The institutional difference was +11 per 1000.
- ⌘ The institutional gap had increased by 7 per 1000 since 2011, after having decreased by 11 per 1000 over the previous five years.
- ⌘ The institutional difference in NSW was 9 per 1000 and had changed little since 2011. It had also changed little between 2006 and 2011.

Internet @ home

In 2016, 41% of Aboriginal households in Very Remote Australia (NSW) had an internet connection while 52% did not (348 households); 6% did not answer the question.

- ⌘ The proportion of Aboriginal households connected to the internet was 32% lower than in NSW (74% connected), ... and 31% lower than non-Aboriginal households in Very Remote NSW (where 73% of homes were connected).
- ⌘ The proportion of Aboriginal households with internet was up by 5% from 37% in 2011. The proportion was up by 8% for Aboriginal households in NSW. It was up by 7% for non-Aboriginal households in this region (from 66% in 2011).
- ⌘ In 2006, 15% of the region's Aboriginal people had the internet at home. This compared with 43% of Aboriginal people in NSW and 54% of non-Aboriginal people in this region.

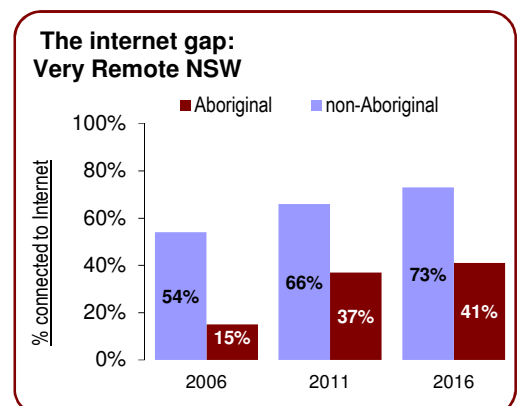

The internet gap

% of households with an internet connection

The internet is becoming increasingly important as a source of communication and information, and is becoming an essential service.

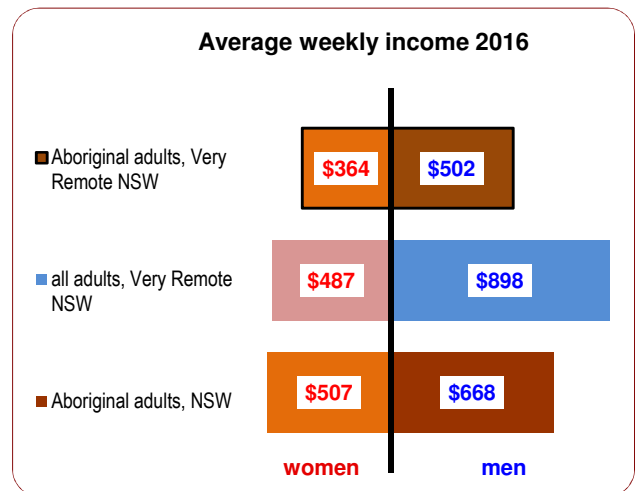

- ⌘ In 2016, 41% of the region's Aboriginal households had an internet connection, compared with 73% of other households, an internet gap of -32%.
- ⌘ The internet gap had widened by 3% since 2011, after having closed by 10% over the previous five years.
- ⌘ The internet gap in NSW was 9% and had narrowed by 2% since 2011. It narrowed by 8% between 2006 and 2011.
The 2006, 2011 and 2016 Censuses had different questions about the internet.

Personal income

In 2016, the average weekly income of Aboriginal adults (aged 15+) in Very Remote Australia (NSW) was about \$491, which was 21% less than that of Aboriginal adults in NSW (\$621), and 39% less than the average of all adults in the region (\$805).

- ⌘ Aboriginal men in Very Remote NSW averaged \$502 a week (56% of the overall male average here). Aboriginal women averaged \$364 a week (75% of the overall female average).
- ⌘ The average weekly income of Aboriginal men was \$166 lower in the region than in NSW. The average weekly income of Aboriginal women here was \$143 lower than in NSW.
- ⌘ Half of the Aboriginal adults received under \$371 a week (the median income).

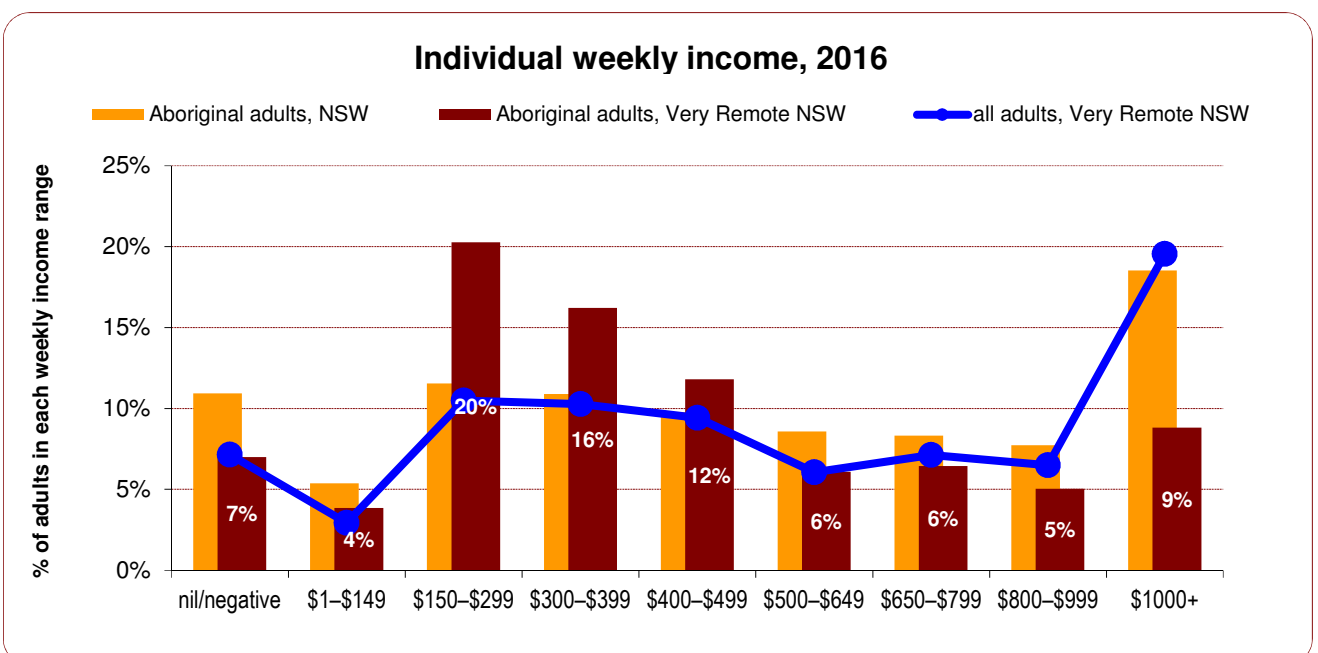

The income distribution pattern among Aboriginal adults in Very Remote Australia (NSW) was different from Aboriginal adults in NSW, and different from all adults in the region.

Compared with Aboriginal adults across NSW:

- ⌘ proportionally more Aboriginal adults here were in the \$150–\$299 and \$300–\$399 ranges, and in the \$400–\$499 range.
- ⌘ fewer were in the \$1000+ and nil/negative ranges, and in the \$800–\$999 and \$500–\$649 ranges.

Compared with all adults in this region:

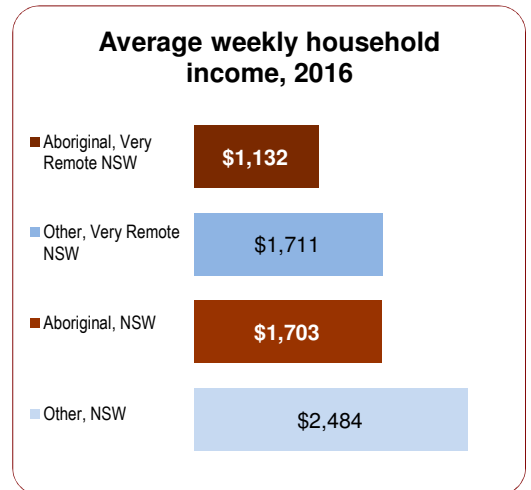

- ⌘ more Aboriginal adults were in the \$150–\$299 and \$300–\$399 ranges, and in the \$400–\$499 range.
- ⌘ proportionally fewer were in the \$1000+ range.

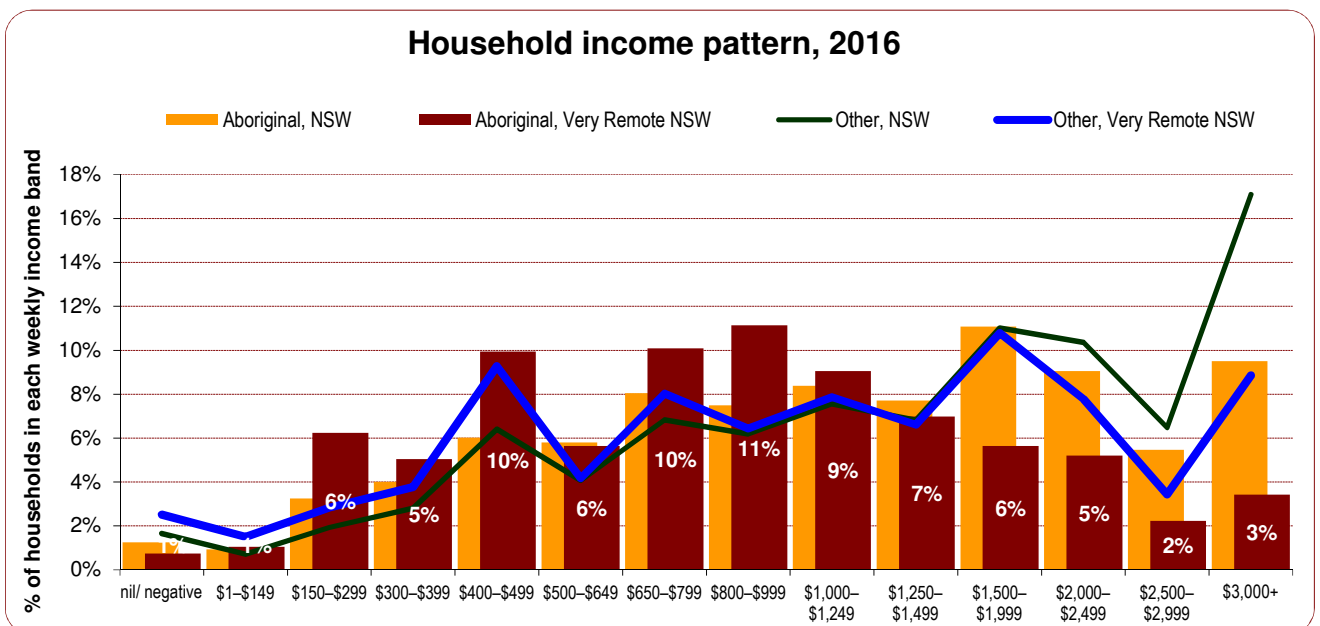

Household income

In 2016, the average income of Aboriginal households in Very Remote Australia (NSW) was about \$1,132 a week. Household income is not a strong indicator of well-being because the benefit the income gives household members is affected by the household's size.

- ⌘ The average Aboriginal household income in Very Remote Australia (NSW) was 34% less than the average of Aboriginal households in NSW (\$1,703 a week).
- ⌘ It was 34% less than the average of other households in Very Remote NSW – \$1,711 a week.
- ⌘ Half the Aboriginal households received less than \$830 a week (the median household income).
- ⌘ Aboriginal households in the region had an average size of 2.9 residents, compared with 2.2 for non-Aboriginal households. Household incomes thus had to be spread among more people, compared to other households.

The income distribution pattern among Aboriginal households in Very Remote Australia (NSW) was different from the NSW Aboriginal households, and different from other households in the region.

Compared with Aboriginal households across NSW:

- ⌘ more Aboriginal households here were in the \$400–\$499 and \$800–\$999 income ranges, and in the \$150–\$299 and \$650–\$799 ranges.
- ⌘ fewer Aboriginal households were in the \$3,000+ and \$1,500–\$1,999 income ranges, with fewer in the \$2,000–\$2,499 and \$2,500–\$2,999 ranges.

Compared with non-Aboriginal households in this region:

- ⌘ more Aboriginal households were in the \$800–\$999 and \$150–\$299 income ranges, and in the \$650–\$799 range.
- ⌘ fewer Aboriginal households were in the \$3,000+ and \$1,500–\$1,999 income ranges, or in the \$2,000–\$2,499 range.

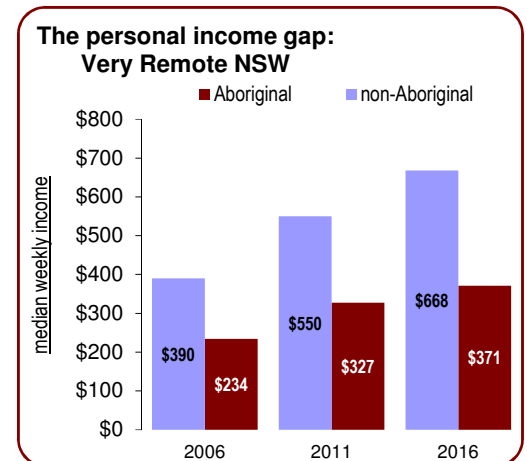

Income Indicators

The personal income gap

median weekly income of adults (15+)

Income is a major contributor to well-being. One indicator of disadvantage is a low median income – the amount which fewer than half the people earn.

- ⌘ In 2016, the median income of Aboriginal adults in Very Remote Australia (NSW) (\$371) was 56% that of non-Aboriginal adults in this region (\$668). The personal income gap was -44%.
- ⌘ The personal income gap had widened by 3% since 2011, after having widened by 1% over the previous five years.
- ⌘ The personal income gap in NSW was -29% and had narrowed by 5% since 2011. It had narrowed 2% between 2006 and 2011.

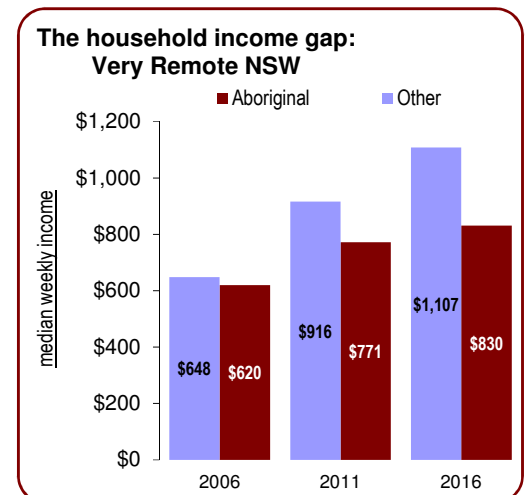

The household income gap

median weekly income of households

Another indicator of disadvantage is a low median household income; half of all households receive less than this amount. However, Aboriginal households tend to be larger, with more dependents, so household income does not reflect disadvantage as well as individual income does.

- ⌘ In 2016, the median income of Aboriginal households in Very Remote Australia (NSW) was \$830, compared with \$1,107 for other households in the region. This was 25% lower – this is the household income gap.
- ⌘ The household income gap had widened by about 9% since 2011, after having widened by about 12% over the previous five years.
- ⌘ The household income gap in NSW was 19% and had closed by 6% since 2011. It had narrowed by 5% between 2006 and 2011.

Employment

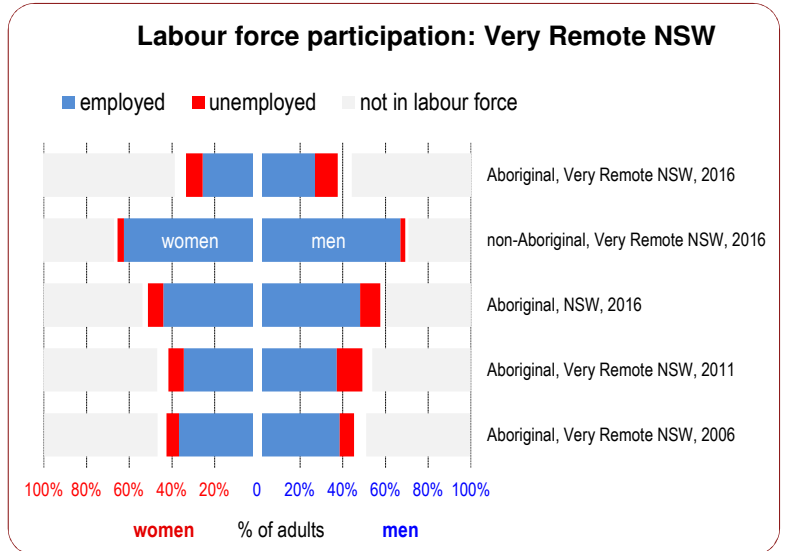

Employment is a prime determinant of a community's income, so it is an important indicator of well-being. In Very Remote NSW, 374 out of 1,432 Aboriginal adults (15+) were employed in 2016 – 26% of adults.

135 Aboriginal adults were unemployed (9%), so the overall workforce participation rate (employed + unemployed) was 36%.

Aboriginal workforce participation was ...

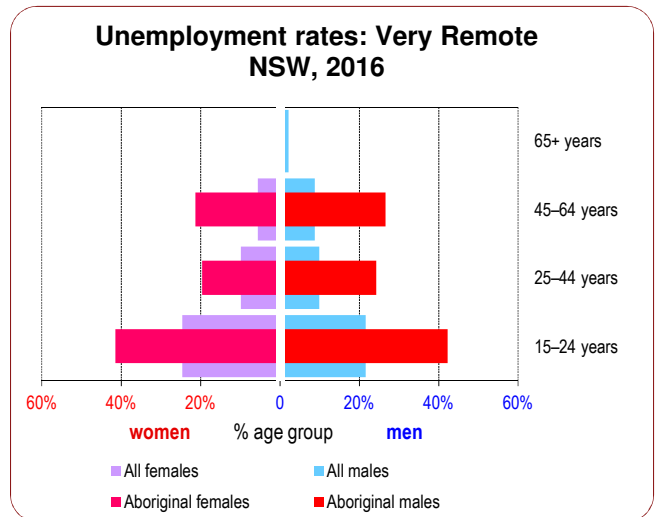

- ⌘ lower for women (33%) than men (38%).
- ⌘ 32% lower than the average for non-Aboriginal adults in the region.
- ⌘ 19% lower than the average for Aboriginal adults in NSW.

The Aboriginal workforce participation rate here was 10% lower than in 2011 and 9% lower than in 2006.

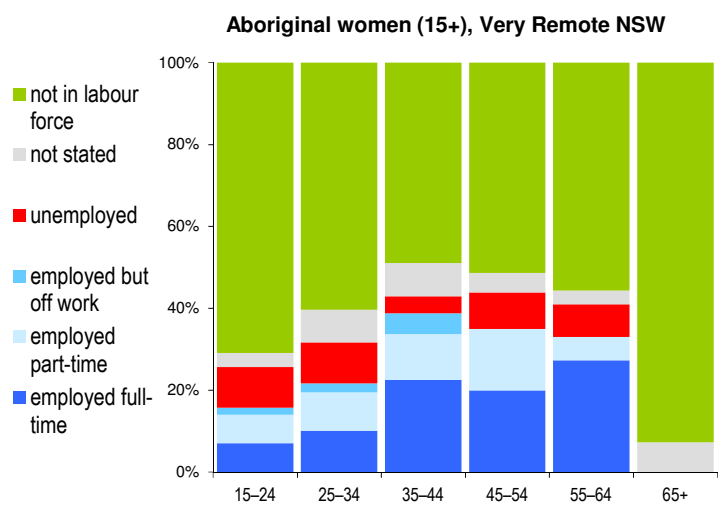

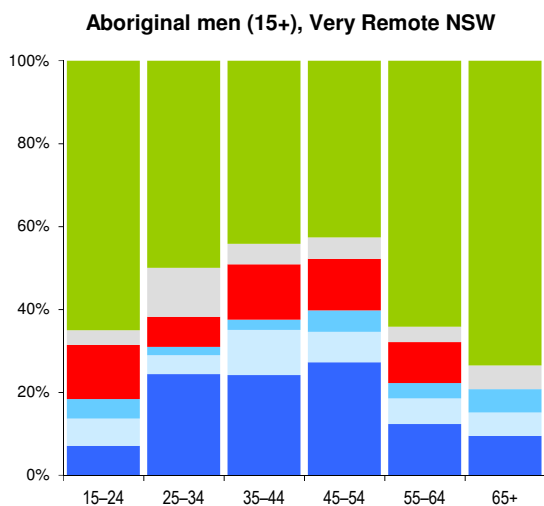

In 2016, the Aboriginal unemployment rate in Very Remote Australia (NSW) was 27%, with 135 people out of work.

- ⌘ This rate was higher than the 4% rate among non-Aboriginal adults in the region.
- ⌘ The Aboriginal unemployment rate was 28% for men and 24% for women.
- ⌘ The Aboriginal unemployment rate was 6% higher than in 2011, and 12% higher than in 2006.
- ⌘ Aboriginal unemployment was highest among those aged 15–24 years (47%) and 25–44 years (25%). It was lowest among those aged 45–64 years (20%).

These graphs show the employment patterns for men and women, by age, in 2016.

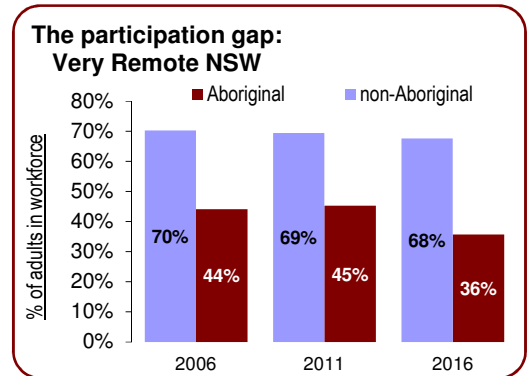

Workforce Gap Indicators

The participation gap

% of adults 15+ in labour force

Employment in the workforce is the main way that people gain income and independence. When the proportion of adults in the workforce is low, communities become more dependent on income support, and poverty increases.

- ⌘ In 2016, the proportion of Aboriginal adults (15+) of Very Remote Australia (NSW) in the workforce was 36%; the proportion of non-Aboriginal adults in the workforce was 68%; the participation gap was -32%.
- ⌘ The participation gap had widened by 8% since 2011, after having closed by 2% over the previous five years.
- ⌘ The participation gap in NSW was -8% and had closed by 3% since 2011. It had changed little between 2006 and 2011.

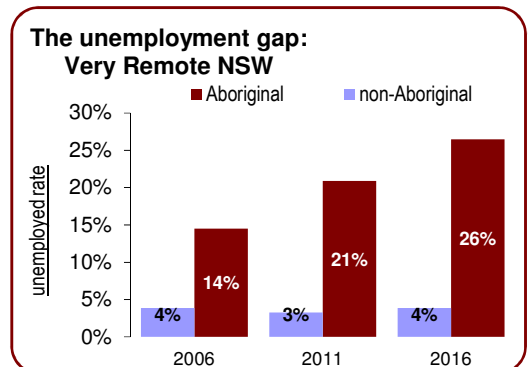

The unemployment gap

% of unemployed in workforce

High unemployment indicates an absence of jobs in occupations for which local people have had training. High unemployment rates have many damaging effects on those unemployed and their community.

- ⌘ In 2016, 26% of the Aboriginal workforce in Very Remote Australia (NSW) were unemployed; 4% of the non-Aboriginal workforce were unemployed; the unemployment gap was +23%.
- ⌘ The unemployment gap had widened by 5% since 2011, after having widened by 7% over the previous five years.
- ⌘ The unemployment gap between in NSW was +9% and had closed by 2% since 2011. It had narrowed by 3% between 2006 and 2011.

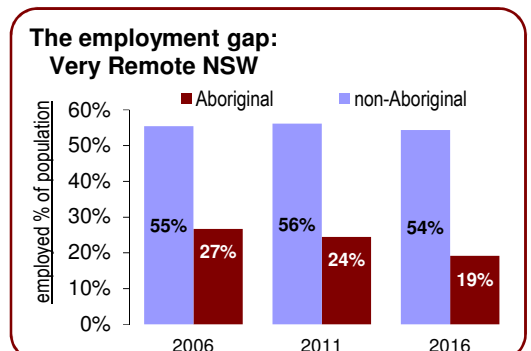

The employment gap

employed adults as % of population

A useful indicator of the financial strength of a community is the proportion of the total population who are employed. A lower proportion means that, on average, each employed person has more people to support.

- ⌘ In 2016, 19% of the Aboriginal population of Very Remote Australia (NSW) were employed; 54% of the non-Aboriginal workforce were employed; the employment gap was -35%.
- ⌘ The employment gap had widened by 3% since 2011, after having widened by 3% over the previous five years.
- ⌘ The employment gap in NSW was -18% and had closed by 3% since 2011. It had narrowed by 1% between 2006 and 2011.

Education participation by age

Having high proportions of people in education is a good indicator of positive individual and community development. In Very Remote Australia (NSW), one in four Aboriginal residents (468 people) was attending an educational institution in 2016.

Aboriginal participation in education varied with age. Here in education were:

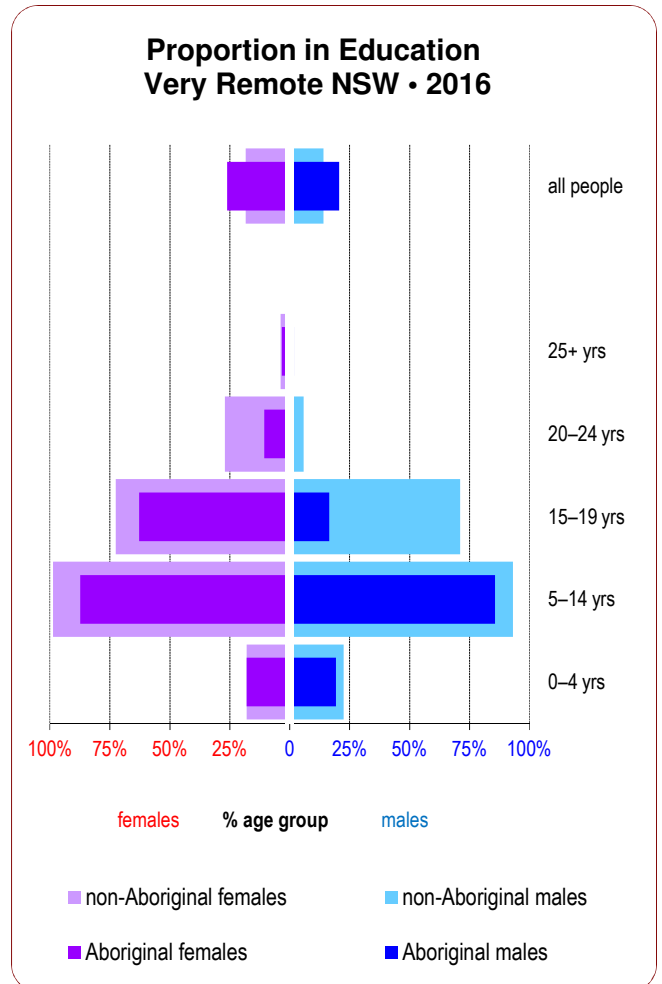

- 22% of the 0–4 year olds
- 88% of the 5–14 year olds
- 51% of the 15–19 year olds
- 6% of the 20–24 year olds
- 3% of those aged 25+

Partly because the Aboriginal population has a higher proportion of children, their overall rate of participation in education, 24%, is higher than the non-Aboriginal rate in this region, 16%. Relative to non-Aboriginal people of the same age, there were, in education:

- similar proportions of 25+ year olds
- similar proportions of 0–4 year olds
- 8% fewer Aboriginal 5–14 year olds
- 13% fewer Aboriginal 20–24 year olds
- 17% fewer Aboriginal 15–19 year olds

Overall, Very Remote Australia (NSW)'s Aboriginal population had 126 females per 100 males in education. This varied with age. Of those in education, there were:

- 1.2 males per female among 0–4 year olds
- 1.1 females per male among 5–14 year olds
- 1.8 females per male among 15–19 year olds
- only females among 20–24 year olds
- 1.8 females per male among 25+ year olds

Since 2011, overall participation in education by Aboriginal people in Very Remote Australia (NSW) had decreased by 3%, but this masks changes among the age groups.

- The proportion of 0–4 year olds in education was down by 3% since 2011, and down by 2% since 2006.
- The proportion of 5–14 year olds in education was up by 1% since 2011, and up by 8% since 2006.
- The proportion of 15–19 year olds in education was up by 3% since 2011, and up by 30% since 2006.
- The proportion of 20–24 year olds in education was up by 1% since 2011, and steady since 2006.
- The proportion of 25+ year olds in education was steady since 2011, and down by 1% since 2006.

Note: In January 2010, the school leaving age in NSW changed from 15 to 17 years of age.

Current education

In 2016, some 412 Aboriginal children and teenagers in Very Remote Australia (NSW) were attending school, with 52 in pre-school, 226 in primary school, and 134 in high school.

The number of Aboriginal pre-schoolers was down by 33 or 39% since 2011 and, from 2006, up by 63%.

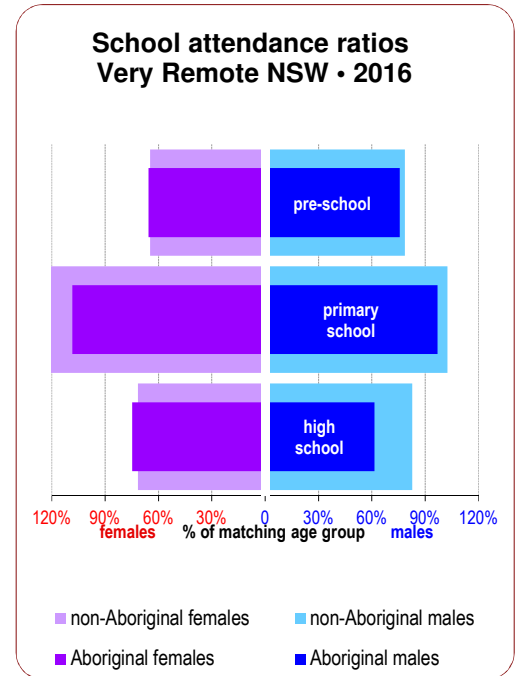

- ⌘ The 52 Aboriginal pre-schoolers equalled 80% of the Aboriginal children aged 4–5.
- ⌘ In NSW, Aboriginal pre-schoolers equalled 72% of the number aged 4–5 years. Non-Aboriginal pre-schoolers in this region represented 66% of their age group.

The number of Aboriginal primary students (226) was down by 150 or 40% since 2011; it was 58% higher than in 2006.

- ⌘ Aboriginal primary students were 103% of the number aged 6–11. This is because some primary students were other ages.
- ⌘ This rate was 6% lower than the Aboriginal rate in NSW and 8% lower than for non-Aboriginal children here.

The number of Aboriginal secondary students (134) was down by 80 or 37% since 2011 and 144% higher than 2006.

- ⌘ Aboriginal secondary students were 68% of the Aboriginal children aged 12–17.
- ⌘ This rate was 8% lower than the rate for non-Aboriginal secondary students; it was 13% lower than for Aboriginal students in NSW.

41 Aboriginal residents of Very Remote Australia (NSW) were in post-school education in 2016. This was 10 less than in 2011, with 27 more than in 2006.

In 2016, there were 11 Aboriginal 15–24 year olds from the region enrolled in TAFE (3% of the number this age); 100% attended full-time.

- ⌘ 8% of Aboriginal 15–24 year olds in this region attended TAFE, with 35% full-time.
- ⌘ 5% of non-Aboriginal 15–24 year olds in this region attended TAFE, with none full-time.

A few Aboriginal 15–24 year olds from the region attended university or other tertiary education (2% of the number this age); 50% were full-time.

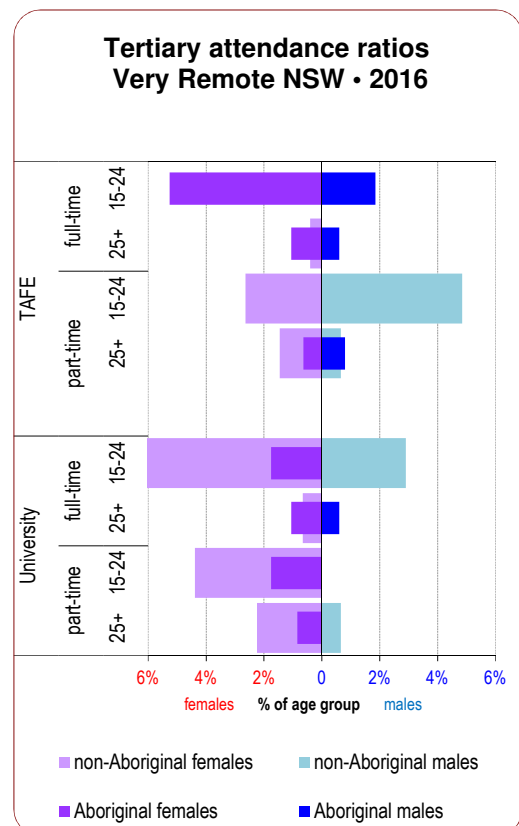

- ⌘ 7% of Aboriginal 15–24 year olds in NSW were at university, with 83% full-time.
- ⌘ 10% of non-Aboriginal 15–24 year olds in this region were at university, with 70% full-time.

There were 17 Aboriginal students aged 25+ attending TAFE in 2016 (2% of those aged 25–64), with 65% full-time.

- ⌘ 4% of Aboriginal 25–64 year olds in NSW attended TAFE, with 30% full-time.
- ⌘ 1% of non-Aboriginal 25–64 year olds in this region attended TAFE, with 20% full-time.

A few Aboriginal residents aged 25+ were in tertiary education in 2016 (1% of 25–64 year olds), with 50% full-time.

- ⌘ 3% of Aboriginal 25–64 year olds in NSW were at university, with 43% full-time.
- ⌘ 2% of non-Aboriginal 25–64 year olds in this region were at university, with 24% full-time.

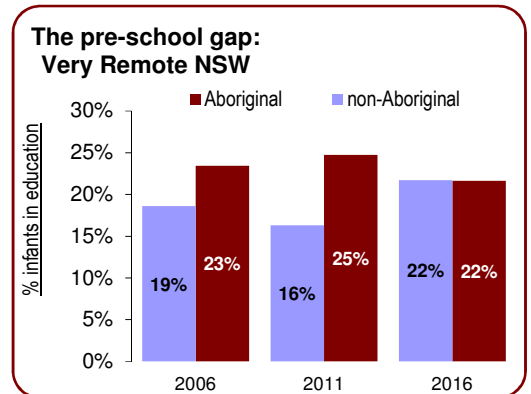

Education Attendance Indicators

The pre-school gap

% of infants under 5 in education

Early childhood education is an important contributor to success in school and later education, and makes paid work more feasible for parents.

- ⌘ In 2016, 22% of Aboriginal infants in Very Remote Australia (NSW) were in education, compared with 22% of non-Aboriginal infants. The pre-school gap was nil.
- ⌘ The pre-school gap had reversed since 2011, after having widened by 4% over the previous five years.
- ⌘ The pre-school rates of Aboriginal and non-Aboriginal infants in NSW were 25% and 25% in 2016, a gap of nil. This gap had narrowed by 2% since 2011.

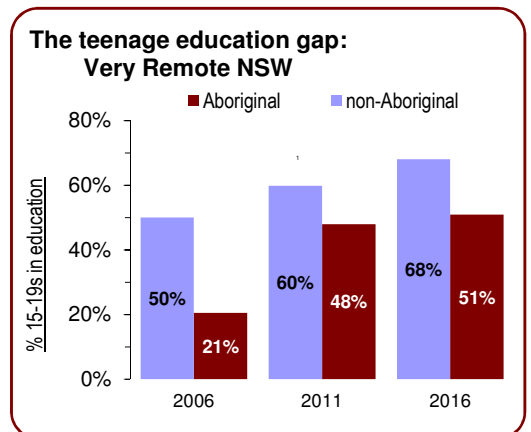

The teenage education gap

% of 15–19 year-olds in education

Education of older teenagers is vital for their future employment, so low levels of participation in education indicates disadvantage.

- ⌘ In 2016, 51% of Very Remote Australia (NSW) Aboriginal teenagers aged 15–19 were in education, compared with 68% of non-Aboriginal teenagers. The teenage education gap was -17%.
- ⌘ The teenage education gap had widened by 5% since 2011, after having closed by 18% over the previous five years.
- ⌘ The teenage education gap between Aboriginal and non-Aboriginal in NSW was -18% and had narrowed by 1% since 2011. It narrowed by 6% over 2006 to 2011.

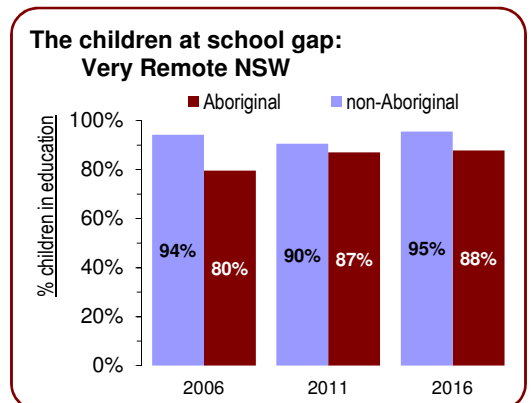

The children at school gap

% of 5–14 year olds in education

School is compulsory for children up to the age of 17*. Low schooling rates suggest truancy and/or underage school leavers.

- ⌘ In 2016, 88% of Very Remote Australia (NSW) Aboriginal children aged 5–14 were in education, and 95% of non-Aboriginal of that age were. The schooling gap was -8%.
- ⌘ The schooling gap had widened by 5% since 2011, after having closed by 12% over the previous five years.
- ⌘ The schooling gap in NSW was -3% and had narrowed by 4% since 2011. It changed little over 2006 to 2011.

* In January 2010, the school leaving age in NSW changed from 15 to 17 years of age.

Schooling levels

In 2016, Aboriginal adults (15+) in Very Remote Australia (NSW) had completed an average of Year 9.6 of school, compared with Year 10.6 for non-Aboriginal adults. In NSW, Aboriginal adults averaged Year 10.3.

- ⌘ 184 Aboriginal adults in the region had completed Year 12, which was 14% fewer than in 2011 and 235% more than in 2006.

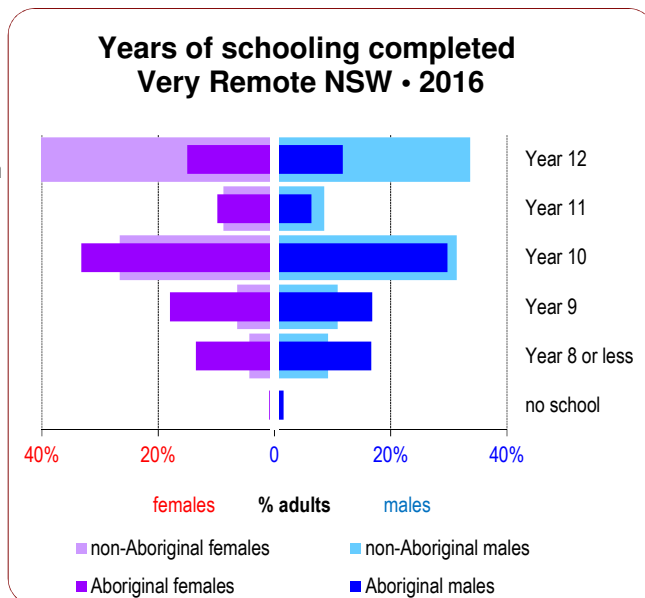

The proportion of Aboriginal adults in the region who had completed Year 12 was 13%, which was 28% lower than that of non-Aboriginal adults.

30% of Aboriginal adults across NSW had completed Year 12.

- ⌘ 53% of Aboriginal adults in the region had completed at least Year 10, which was 17% lower than for Aboriginal adults in NSW.

- ⌘ Of the others, 17% had completed Year 9 and 15% had completed Year 8 or lower; 16 adults did not go to school (1%); 14% did not say.

The average Year of school is calculated by multiplying the number who finished each Year's school by the Year, assuming those who replied '8 years or less' averaged 7 years schooling, those who responded 'no school' had 0 years, and excluding those who did not respond.

The average Year when Aboriginal people in Very Remote Australia (NSW) left school had risen by 5 months since 2011, and was up by 8 months since 2006.

Over the decade to 2016, there was an increase of 235% in the number who had finished Year 12 and an increase of 211% in the number who had finished school at Year 11.

For Aboriginal adults in this region, average schooling:

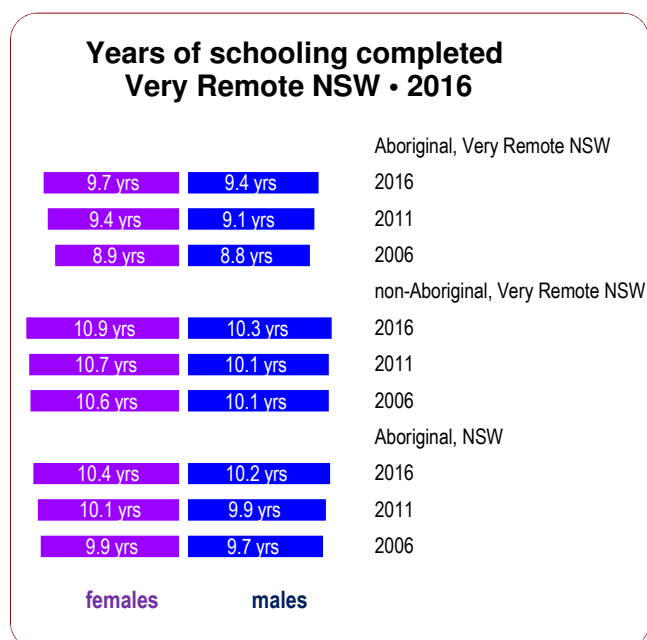

- ⌘ for men had risen by 4 months since 2011, and had risen by 7 months since 2006.
- ⌘ for women had risen by 4 months since 2011, and had risen by 10 months since 2006.

For non-Aboriginal adults, average schooling:

- ⌘ for men had risen by 2 months since 2011, and had risen by 2 months since 2006.
- ⌘ for women had risen by 2 months since 2011, and had risen by 4 months since 2006.

The average schooling of Aboriginal adults in NSW:

- ⌘ for men had risen by 4 months since 2011, and risen by 6 months since 2006.
- ⌘ for women had risen by 4 months since 2011, and risen by 6 months since 2006.

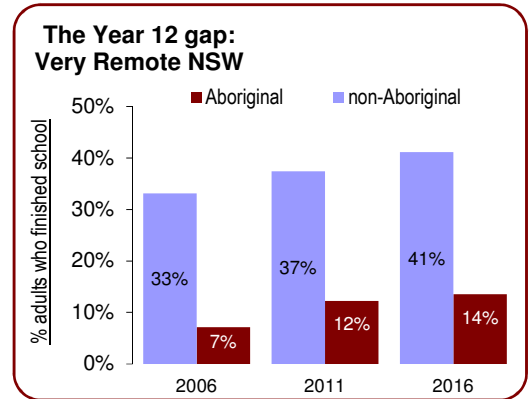

Education Achievement Indicators

The Year 12 gap

% of adults (15+) who have left school

The proportion of adults who have completed Year 12 is an important indicator of a community's educational resources. Nationally, over half of all adults (58%) have completed Year 12.

- ⌘ In 2016, 14% of Very Remote Australia (NSW) Aboriginal adults had completed Year 12, compared with 41% of non-Aboriginal adults. The Year 12 gap was -28%.
- ⌘ The Year 12 gap had widened by 2% since 2011, after having closed by 1% over the previous five years.
- ⌘ The Year 12 gap in NSW was -28% and had narrowed by 1% since 2011. It widened by 2% between 2006 and 2011.

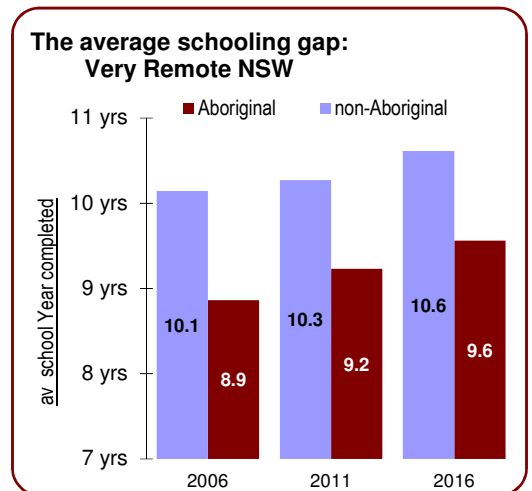

The average schooling gap

average school Year completed

The average Year of schooling completed by adults is an indicator of a community's educational resources. Nationally, the average is Year 11.

- ⌘ In 2016, Very Remote Australia (NSW) Aboriginal adults had completed an average of Year 9.6 at school, compared with Year 10.6 for non-Aboriginal adults. The average schooling gap was -1.1 years.
- ⌘ The average schooling gap had widening by one month since 2011, after having closing by 4 months over the previous five years.
- ⌘ The average schooling gap in NSW was 8 months. It had changed little since 2011, after having changed little between 2006 and 2011.

Tertiary qualifications

The type and extent of post-school qualifications has a major influence on the earning capacities of a community. In the 2016 Census, 587 Aboriginal adults in Very Remote Australia (NSW) reported having tertiary educational qualifications, which was 41% of the number aged 15+.

By comparison, 45% of Aboriginal adults in NSW and 51% of non-Aboriginal adults in Very Remote NSW had a tertiary qualification.

28 Aboriginal adults in the region had a degree or higher qualification (2%), with a few having a postgraduate degree.

- ⌘ In NSW, 7% of the Aboriginal residents had a degree or higher qualification.
- ⌘ 12% of the non-Aboriginal residents of Very Remote NSW had a degree or more.

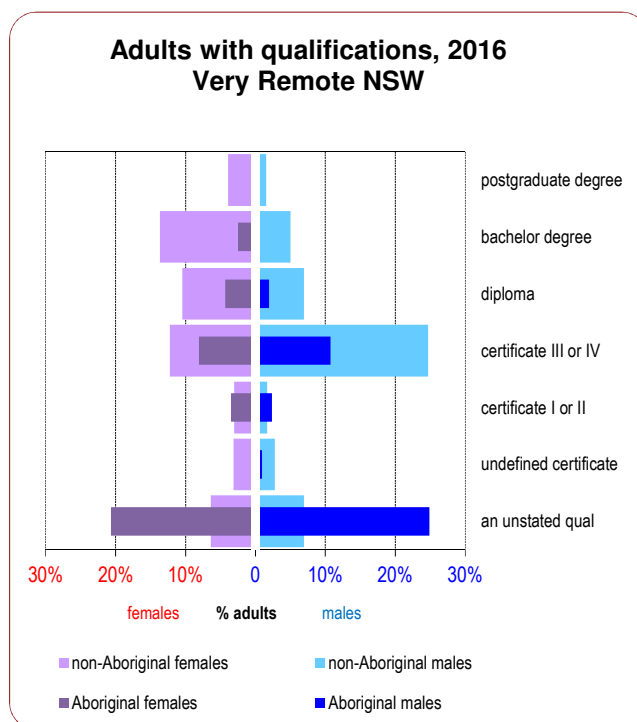

The most common highest qualification held by Aboriginal adults here were:

- an unstated qual, held by 323 people (23%);
- certificate III or IV, by 137 people (10%);
- diploma, by 45 people (3%).

While the number of Aboriginal adults in Very Remote NSW fell by 23% from 2011 to 2016, the number with qualifications changed little. There were:

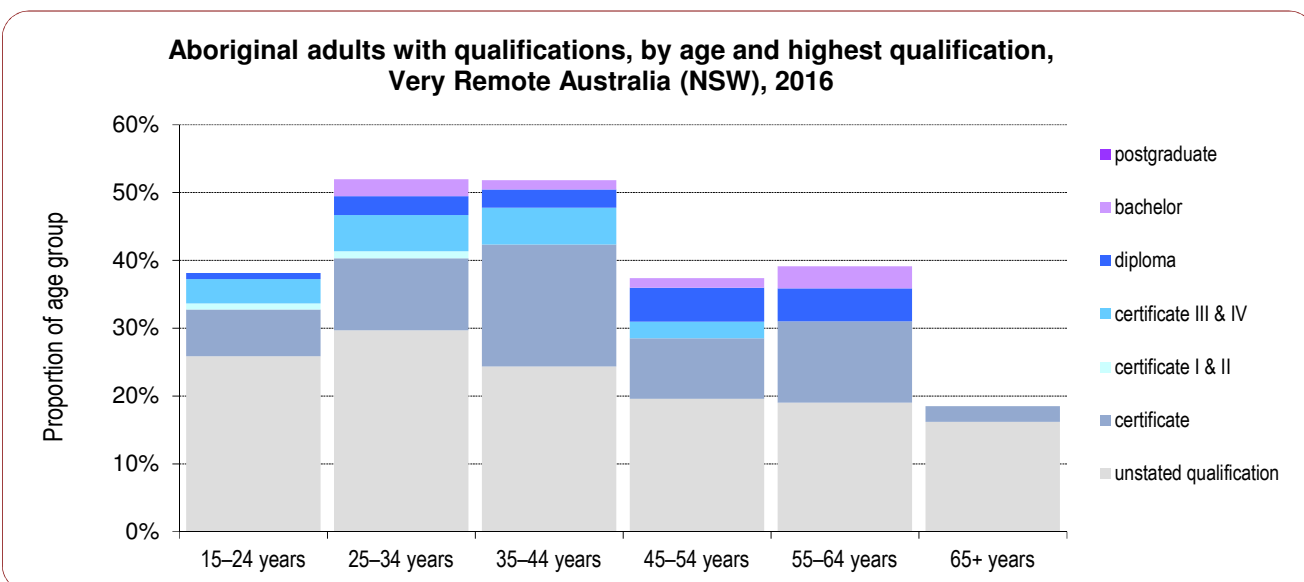

- 5 more with a diploma;
- similar numbers with a certificate I or II;
- similar numbers with a undefined certificate.

In the decade from 2006, the number of Aboriginal adults in the region with qualifications increased by 121%, while the adult population increased by 83%. There were 93 more with a certificate III or IV and 33 more with a certificate I or II qualification.

In this decade, the number of Aboriginal adults in NSW with qualifications increased by 99%. There were 204% more with a diploma and 200% more with a postgraduate degree.

The chart below shows how the level of qualifications varies with age. Here, Aboriginal people aged 25–34 years had the most higher qualifications, then people aged 35–44 years and 55–64 years.

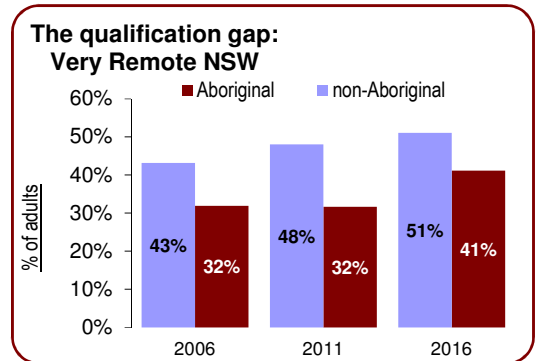

Higher Education Indicators

The qualification gap

% of adults 15+ with a post-school qualification

Tertiary and further education is becoming essential for many occupations, so the proportion of adults with post-school qualifications is a broad indicator of a community's earning capacity.

- ⌘ In 2016, 41% of Very Remote Australia (NSW) Aboriginal adults aged 15+ had a post-school qualification, compared with 51% of non-Aboriginal adults. The qualification gap was -10%.
- ⌘ The qualification gap had closed by 6% since 2011, after having widened by 5% over the previous five years.
- ⌘ The qualification gap between Aboriginal and non-Aboriginal adults in NSW was -14% and had narrowed by 1% since 2011. It widened by 1% over 2006 to 2011.

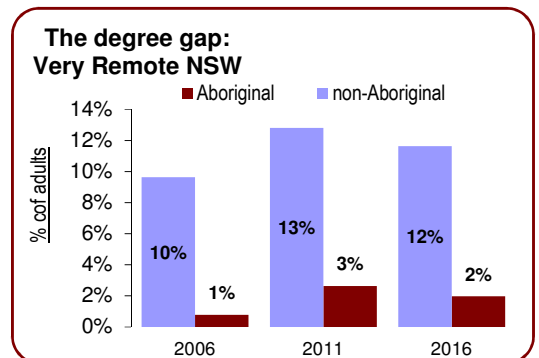

The degree gap

% of adults 15+ with a degree or higher qualification

Most higher skilled and better paid jobs require a university degree or equivalent for entry, so the proportion of adults with a degree or higher indicates the community's capacity to gain these jobs.

- ⌘ In 2016, 2% of Very Remote Australia (NSW) Aboriginal adults aged 15+ had a degree or higher qualification, compared with 12% of non-Aboriginal adults. The degree education gap was -10%.
- ⌘ The degree gap had changed little since 2011, after having widened by 1% over the previous five years.
- ⌘ The degree gap between Aboriginal and non-Aboriginal adults in NSW was -19% and had widened by 3% since 2011. It widened by 3% over 2006 to 2011.

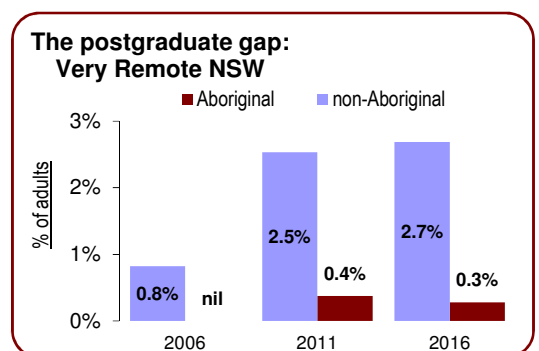

The postgraduate gap

% of adults 15+ with a postgraduate qualification

Increasingly, getting promoted in many industries requires a post-graduate qualification, but the number of Aboriginal people with post-graduate degrees has been low.

- ⌘ In 2016, 0.3% of Very Remote NSW Aboriginal adults aged 15+ had a post-graduate qualification, compared with 2.7% of non-Aboriginal adults. The postgraduate gap was -2.4%.
- ⌘ The postgraduate gap had widened by 0.2% since 2011, after there being no Aboriginal adults so qualified in 2006.
- ⌘ The postgraduate gap between Aboriginal and non-Aboriginal adults in NSW was -6.2% and had widened by 1.3% since 2011. It widened by 2.1% over 2006 to 2011.

Disability levels

In 2016 in Very Remote Australia (NSW), 96 Aboriginal residents had a long-term severe disability; 4.9% of the population. Among all the region's residents, 3.5% reported a disability.

People with a long-term severe disability are those needing help or assistance with self-care, mobility or communication, because of a disability, long-term health condition or old age. This data compares Aboriginal people with the total population.

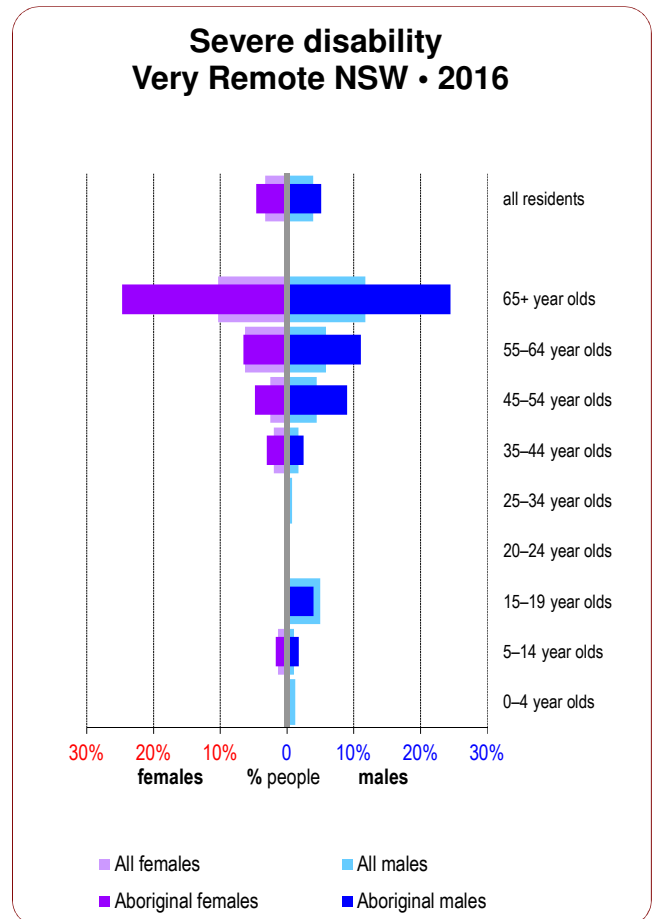

- ⌘ Disability rates tend to rise with age. In 2016, they peaked among Aboriginal 65+ year olds (25%) and 55–64 year olds (12%). Among younger Aboriginal residents, the disability rate was highest among 35–44 year olds at 5%.

Because Aboriginal communities tend to have fewer people in the oldest age groups where disability rates are much higher, the overall disability rate can be lower than in non-Aboriginal communities. This can mask much higher rates in some age groups.

- ⌘ In this region, the overall Aboriginal disability rate was 1.4 times that in the overall population: 4.9% compared with 3.5%. Among 35–44 year olds, the Aboriginal disability rate (5%) was 3 times the overall rate (1.5%); Among 65+ year olds, the Aboriginal disability rate (25%) was 2.1 times that of all residents (12.0%).
- ⌘ Aboriginal disability rates were higher for men than women: 5.1% to 4.6%. Among all residents, they were higher for men than women: 4.0% to 3.3%.

There were 1.5 females per male among 65+ year olds with a disability, and 1.7 males per female among 55–64 year olds.

On the other hand, there were 1.7 males per female among 45–54 year olds with a disability. There were only males among those with a disability aged 15–19.

From 2011 to 2016, the overall disability rate among Aboriginal residents of the region rose from 3.9% to 4.9%.

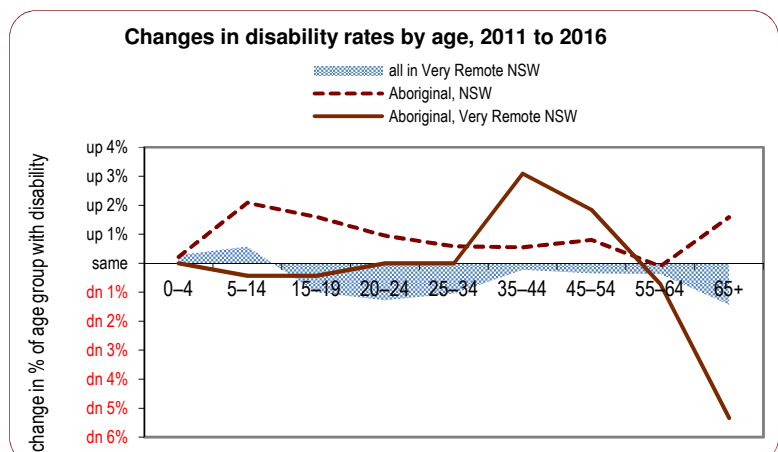

Among Aboriginal people in NSW, the disability rate rose from 6.2% to 7.6%.

Among all Very Remote NSW residents, the disability rate changed little, and was 3.5% in 2016.

In the region, the greatest change in the Aboriginal disability rate was the increase among those aged 35–44, from 1.8% in 2011 to 4.9% in 2016.

Disability rates also rose among 45–54 year olds and 0–4 year olds.

Disability rates fell most among those aged 65+ years.

Disability care given

In the 2016 Census, 138 Aboriginal adults in Very Remote Australia (NSW), 10% of the adult population, reported that they gave assistance to a person with a severe or profound disability. There were at that time 96 Aboriginal residents who reported a severe or profound disability.

⌘ Across the age groups, the proportion of Aboriginal people caring for a person with a disability ranged from 14% of 45–54 year olds and 11% of 25–34 year olds to 4% of 65+ year olds.

⌘ Carers are more often women than men. In this Aboriginal community, there were 1.3 females per male among carers.

Female carers were most common among 55–64 year olds with 2.0 females per male caring, and among 25–34 year olds, with 1.9 females per male caring.

Male carers were most common among carers aged 35–44 with 1.2 males per female caring found among 65+ year olds, but with small numbers.

⌘ The 10% carer rate among Aboriginal residents was similar to the average for all adults in the region (9%).

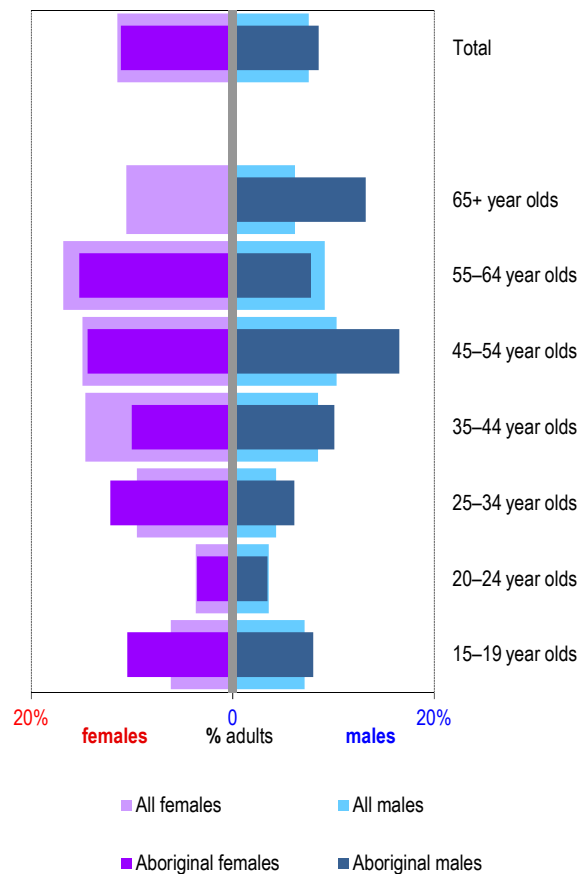

Among 15–19 year olds, the proportion of Aboriginal carers was 1.7 times the average.

Among 25–34 year olds, the proportion of Aboriginal carers was 1.6 times the average.

⌘ In NSW, 15% of Aboriginal adults were caring for a person with a disability.

Relative to the NSW Aboriginal community, there were 2% more carers among Aboriginal people aged 15–19 here. There were 10% fewer carers here among those aged 55–64.

Carers • Very Remote NSW • 2016

From 2011 to 2016, overall caring rates among Aboriginal adults in the region changed only slightly from 12% to 10%.

⌘ Among Aboriginal adults in NSW, caring rates rose by 1%.

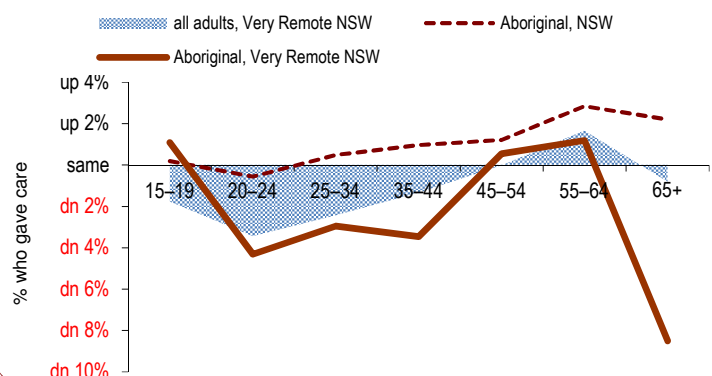

Among all the region's adults, caring rates fell by 1%.

⌘ In the region, Aboriginal caring rates fell fastest among 65+ year olds, down 9% (from 12% in 2011 to 4% in 2016).

Caring rates also fell 4% among 20–24 year olds and 3% for 35–44 year olds.

Caring rates rose most among 55–64 year olds, up by 1%, and among those aged 15–19, up by 1%.

Changes in caring rates, by age, 2011–2016

Disability Indicators

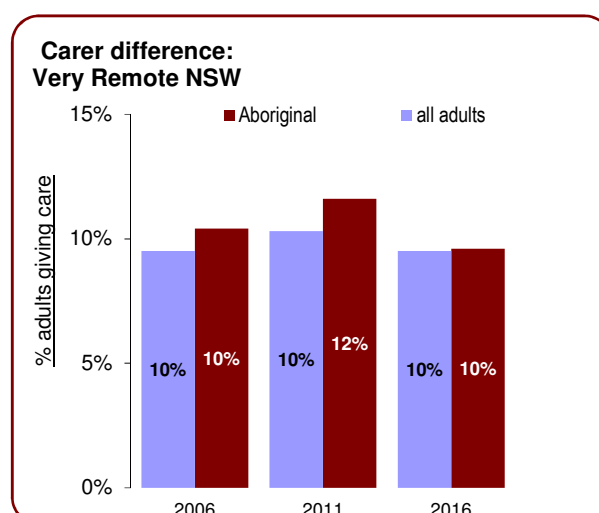

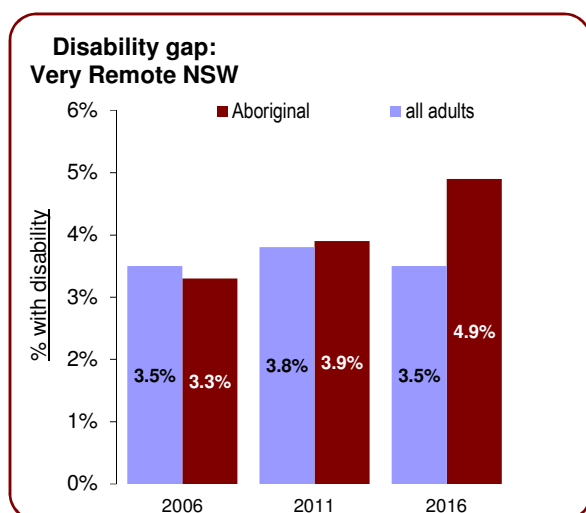

The disability gap

% of people with a severe, long-term disability

Disability rates provide a useful indicator of a community's health and need for support services. Nationally, disability rates among Aboriginal people are about 25% higher than overall rates, across most age groups.

- ⌘ In 2016, 4.9% of the region's Aboriginal residents had a severe, long-term disability, compared with 3.5% for all residents. The disability gap was +1.4%. The Aboriginal disability rate was 1.4 times the overall rate.
- ⌘ The disability gap in Very Remote Australia (NSW) had widened by 1.3% since 2011, after having reversed over the previous five years.
- ⌘ The disability gap in NSW was +2.2% and had widened by 0.9% since 2011.

In the Census, people with disabilities are those with a severe or profound disability lasting more than six months, who require help with daily activities, self-care or communicating.

The carer difference

% of adults caring for a person with a disability

Aboriginal people have higher disability rates and larger families, so often have proportionally more carers than the general population.

- ⌘ In 2016, 10% of the region's Aboriginal adults (aged 15+) provided assistance to a person with a severe disability, compared with 10% of all adults. The carer difference was nil.
- ⌘ The carer difference in Very Remote Australia (NSW) had closed by 1% since 2011, after having changed little over the previous five years.
- ⌘ The carer difference in NSW was +3% in 2016. This had widened by 0.7% since 2011.
