Prepared for Aboriginal Affairs NSW

Glen Innes Severn is the Local Government Area of Glen Innes Severn at the 2016 Census.
Preface

This report uses data from the Census, held every five years by the Australian Bureau of Statistics (ABS), to paint a profile of the Aboriginal population of Glen Innes Severn as it was in August 2016, and show how it had changed over the previous decade.

Language in this report
Where it is used in this Portrait, the term ‘Aboriginal’ is used to describe the many nations, language groups and clans in Glen Innes Severn, including those from the Torres Strait. This usage recognises that Aboriginal people are the original inhabitants of NSW.

Who is included?
The people described in this Portrait were the usual residents of Glen Innes Severn in 2016, even if they completed the Census away from home. People who were visiting Glen Innes Severn on Census night are not included.

Who are Aboriginal?
Aboriginal people, in this Portrait, means all people who, in completing the Census, responded that they had Aboriginal or Torres Strait Islander origins, or both. Non-Aboriginal people are those who said they did not have these origins. Note: the Census question asks people about their origins; it does not ask how they identify in their daily lives.

Are all Aboriginal people counted?
Not all Aboriginal people completed the Census and identified their origins: 6.0% of Glen Innes Severn’s Census respondents said they had Aboriginal origins, but another 9.3% did not answer this question.

The ABS estimates that the net undercount rate for Aboriginal and Torres Strait Islander peoples was 17.5% in 2016 (equivalent to 137,750 persons nationally). This is slightly higher than 2011 (17.2%). This means that, on average, the Aboriginal population was about a fifth larger than counted. However, despite such omissions, the Census is a vital source of information about Aboriginal Australians.

National trends
Nationally, the number of people with Aboriginal origins counted in the Census rose by a fifth (21%) between 2011 and 2016. Almost three-quarters of the increase was from births; the rest was caused by more people identifying Aboriginal origins than previously.

Sources of data
The data for this report are drawn from the Aboriginal and Torres Strait Islander Peoples (Indigenous) Profiles and Community Profiles published by the ABS from the 2006, 2011 and 2016 Censuses. Data in this portrait for 2011 and 2006 censuses have been produced using the 2016 boundary regardless of changes to previous LGA or other geographical classifications over time.

Note: difference and changes shown in this Portrait are rounded to the nearest significant figure but are calculated from the unrounded data, so small anomalies are possible when comparing differences.

Copyright and disclaimer
While care has been taken to ensure that this Portrait accurately transcribes and reports on data loaded from the Australian Bureau of Statistics website, neither The Public Practice nor the Australian Bureau of Statistics, nor any publisher or distributor of this Portrait, in whatever format, gives any guarantee that this report is accurate and correct in every detail. Before making important decisions, you are advised to check the data and calculations yourself using original data sources.

Snapshot: Glen Innes Severn LGA, 2016

In the 2016 Census, 534 of the 8,836 residents (6.0%) counted in Glen Innes Severn said that they had Aboriginal or Torres Strait Islander origins, or both. Of these, 94% were Aboriginal.

- Between 2011 and 2016, the counted Aboriginal population rose by 9%, from 489; the overall population of Glen Innes Severn rose by 2%.
- About 13% of the Aboriginal population were under 5 in 2016. This infant population was larger than the population growth, so other age groups had declined in number.

The Aboriginal community is significantly younger than the non-Aboriginal population, with a median age of 25 vs 49 years.

- There was a higher proportion under 18 years old: 40% compared with 19%.
- There was a lower proportion aged 65 or more: 7% compared with 26%.

Aboriginal households had an average of 2.7 residents, which was larger than non-Aboriginal households (2.2) in the LGA.

- One in four Aboriginal households were couples with children.
- One in four were one-parent families.
- 18% of the Aboriginal households were single persons (vs 35% of non-Aboriginal households).

Aboriginal households most commonly lived in rented dwellings (55%), with 24% in mortgaged and 17% in fully owned dwellings.

- In all, 41% of Aboriginal households in Glen Innes Severn were home-owners (with or without a mortgage), which was up by 5% since 2011.

The median income of Aboriginal adults was about $406 a week, which was 84% that of all adults here ($481).

- The median income gap had closed by 3% since 2011.

Three in ten Aboriginal residents (161 people) were attending an educational institution.

- 59 Aboriginal people had completed Year 12, which was 28% more than in 2011 and 119% more than in 2006.
- Compared with non-Aboriginal residents of the same age, there were:
  - 11% fewer Aboriginal people aged 20–24 year olds in education;
  - 9% fewer Aboriginal people aged 0–4 year olds in education.

42 Aboriginal people (7.9% of the Aboriginal population) reported that they had a severe or profound disability.

- Aboriginal people had higher disability rates than average in most age groups.
  - the disability rate for Aboriginal people aged 5–14 year olds was 4 times the average for this age group in Glen Innes Severn.
  - for 25–34 year olds, the Aboriginal rate was 3 times the average in the LGA.
- 14% of Aboriginal adults (aged 15+) gave assistance to a person with a severe disability.

56% of Glen Innes Severn’s Aboriginal households had an internet connection, which was unchanged from 2011.
### Tracking changes in Glen Innes Severn

In the table below, some indicators of community structure and well-being are calculated for Aboriginal people in Glen Innes Severn. The difference or gap between Aboriginal and non-Aboriginal people in Glen Innes Severn is shown for 2016. Changes in the Aboriginal rates are tracked over the past five years and decade.

* Personal income and disability data compare Aboriginal rates with those of the whole population in Glen Innes Severn.
Aboriginal population and growth

In the 2016 Census, Glen Innes Severn's Aboriginal population was counted as 534 people, of whom 502 identified as Aboriginal and 21 as both Aboriginal and Torres Strait Islander; 7 identified as Torres Strait Islander.

- Aboriginal people comprised 6.0% of Glen Innes Severn's population, compared with 2.9% in NSW.
- 9.3% of Glen Innes Severn people did not say whether they had Aboriginal or Torres Strait Islander origins.
- Among the Aboriginal people here, there were 118 males per 100 females.
- There were 102 females per 100 males among non-Aboriginal people.
- The ABS estimates that the net Census undercount rate nationally for Aboriginal and Torres Strait Islander peoples was 17.5% in 2016.

Between 2011 and 2016, the counted Aboriginal population in Glen Innes Severn rose by 9% (by 45) from 489; the total Glen Innes Severn population rose by 2%

- The number of infants born over the last five years was larger than the population growth, so other age groups had declined in number.
- Between 2006 and 2016, Glen Innes Severn's Aboriginal population rose by 14% (from 467 in 2006).
- Glen Innes Severn's non-Aboriginal population fell by 6% over the decade.
- The Aboriginal population counted in NSW rose by 56% over the decade.

On Census night 2016, 494 Aboriginal residents of Glen Innes Severn were at home (93%), and 45 were staying away from home (8%). Offsetting those away were 55 Aboriginal visitors to the LGA, equivalent to 10% of the Aboriginal residents.

- 7 of the visitors were from the same locality (eg. overnighting with neighbours).
- Of the out-of-area visitors, 65% were from New South Wales and 7% were from Queensland, with the rest from other states.
- The proportion of Aboriginal residents away from home was 1% higher than in 2011.
- The proportion away from home was 2% higher than for non-Aboriginal residents of this LGA; it was 3% higher than for Aboriginal residents of NSW.
- There were 24 more Aboriginal visitors than in 2011, when there were 31, equal to 6% of the Aboriginal population.
Life stages

The Aboriginal population of Glen Innes Severn had a similar proportion in the working stage of life (15–64 years) than the non-Aboriginal population, with a higher proportion of children under 15 and a smaller proportion of people aged 65 or older.

In Glen Innes Severn's Aboriginal population in 2016:

- 288 people (54% or over five in ten) were adults aged 18–64.
  - 48 (or 9%) were aged 18–24
  - 120 (or 22%) were aged 25–44
  - 120 (or 22%) were aged 45–64
  
  The number aged 18–64 was up 7% from 2011; and up 23% from 2006.

- 215 Aboriginal residents (40% or four in ten) were children under 18.
  - 69 (or 13%) were under five
  - 86 (or 16%) were aged 5–11
  - 60 (or 11%) were aged 12–17
  
  The number of children was up 11% from 2011; and down 2% from 2006.

- 38 of Aboriginal residents were aged 65+ years (7% of the total).
  The number aged 65+ had risen by 58% from 2011; this was 192% higher than in 2006.

The proportion aged 18–64 among Aboriginal people was 1% lower than for non-Aboriginal (54%).

3% more of the Aboriginal population were young adults (18–24 yrs), and 6% fewer were mature adults (45–64 yrs), compared with the non-Aboriginal population of the LGA.

Those aged 18–64 made up 54% of the Aboriginal community in NSW; their number had risen by 29% from 2011.

The proportion of Aboriginal children in Glen Innes Severn was 21% higher than the average for non-Aboriginal people.

In NSW, 41% of the Aboriginal community were children under 18; the number was up 18% since 2011.

26% of non-Aboriginal people in Glen Innes Severn were aged 65+.

Across NSW, 5% of Aboriginal people were aged 65+; their number had risen by 58% since 2011, and by 136% since 2006.
Age profile

The Aboriginal population of Glen Innes Severn has an age profile that is significantly younger than the non-Aboriginal population, with a lower median age (25 vs 49 years).

For Glen Innes Severn’s Aboriginal population in 2016:

悬挂图标

- The average age was 30 years in 2016, with half the population aged under 25 years (the median age).
- The largest 5-year age groups were 0–4 years (13%), 5–9 years (12%) and 10–14 years (9%).

悬挂图标

- The average age was 2 years higher than in 2011 and 5 years higher than in 2006.

Proportionally, the biggest increases since 2011 were of 55–59 year olds (140% more), 65+ year olds (58% more) and 60–64 year olds (50% more).

悬挂图标

- Only 38 Aboriginal people (7.1%) were aged 65+ years, compared with 26% of non-Aboriginal residents.

悬挂图标

- In the Aboriginal community, there were noticeably more males than females aged 35–39 years, 45–49 years and 30–34 years.

The average age was 16 years younger than for the non-Aboriginal residents; the median age was 24 years younger.

Non-Aboriginal population: about 5% were 0–4 years and also 5–9 years and 6% were 10–14 years.

The average age of Aboriginal people in NSW had risen by one year since 2011, and risen by 3 years in the decade since 2006.

In the NSW Aboriginal population, the increases since 2011 were: 55–59 year olds (46%); 65+ year olds (58%); and 60–64 year olds (47%).

The number aged 65+ was 58% higher than in 2011; the percentage of people this age was up by 2.2% since 2011, when it was 4.9%.

There were many more females than males among those aged 60–64 years, then in those aged 65+ years and 50–54 years.
Population Indicators

The older people difference
Commonly, Aboriginal communities have a lower proportion of people aged over 65, due to a shorter average life-span and higher birth rates.

- In 2016, 7.1% of Glen Innes Severn's Aboriginal residents were aged 65 or over, compared with 26.3% of non-Aboriginal residents. The older people difference was -19%.
- The older people difference had increased by 1% since 2011, after having increased by 1% over the previous five years.
- The older people difference in NSW was -11%. It had changed little since 2011 and changed little over the previous five years.

The infant difference
Aboriginal communities generally have a higher proportion of young people due to larger families and fewer older people.

- In 2016, 12.9% of Glen Innes Severn's Aboriginal residents were infants, compared with 4.6% of non-Aboriginal residents. The infant difference was +8%.
- The infant difference had widened by 2% since 2011, after having closed by 2% over the previous 5 years.
- The infant difference in NSW was +5%. It had changed little since 2011 and changed little over 2006 to 2011.

The dependency difference
The dependency ratio is the average number of people of dependent age (under 15 or 65+) for each person of working age. The national average is 0.5 dependents per adult. A higher ratio means each person of working age has more dependents to support, on average.

- In 2016, Glen Innes Severn's Aboriginal community had a dependency ratio of 0.69, compared with 0.73 for the non-Aboriginal community. The Aboriginal dependency ratio was 0.04 lower.
- The dependency difference had decreased by 0.03 since 2011, after having reversed over the previous five years.
- The dependency difference in NSW was 0.13 and had closed by 0.04 since 2011. It had closed by 0.05 over 2006 to 2011.
Household types and sizes

In 2016, the 534 Aboriginal residents of Glen Innes Severn were living in 240 households, 17% more than in 2011.

The main types of Aboriginal households* in the LGA in 2016 were:

- One in four were couples with children (59 households, or 25%). 4% higher than non-Aboriginal here
- One in four were one-parent families (58 households, or 24%). 15% more than non-Aboriginal
- One in five were couples without children (49 households, or 20%). 11% less than non-Aboriginal
- Almost two in ten were one-person households (44 households, or 18%). 16% less than non-Aboriginal
- There were 3 multi-family households, and 7 other types of households.

![Average sizes of households, 2016](image)

Aboriginal households had an average of 2.7 residents in 2016, which was 0.4 lower than in 2011, and 0.7 lower than in 2006.

- Aboriginal households here were 0.5 smaller than in NSW, which averaged 3.1 residents.
- The average size of non-Aboriginal households in the LGA was 2.2 residents; Aboriginal households were 23% larger, on average.
- The larger size of Aboriginal households is consistent with lower proportions of people living alone.
- Aboriginal couple families had an average of 2.3 children, compared with 2.0 for non-Aboriginal families here. Aboriginal families in NSW averaged 2.3 children.
- Aboriginal one-parent families averaged 2.6 children, compared with 2.3 in NSW and 1.8 for non-Aboriginal one-parent families here.
- At an average size of 2.7 persons, the 240 Aboriginal households had some 640 members, but only 435 Aboriginal people were counted in these households.

* Aboriginal households are those with at least one Aboriginal resident.
In 2016, the average size of Glen Innes Severn's Aboriginal nuclear families was 4.3 persons (i.e. 2.3 children), compared with 4.0 persons (2.0 children) for non-Aboriginal families, a difference of 0.3 children per family.

The single parent difference
Single parent families often have low incomes because it is difficult for the parent to work without adequate child care and support. High proportions of one-parent families can indicate a higher need for support services.

- In 2016, 50% of Glen Innes Severn’s Aboriginal family households with children had one parent, compared with 32% of non-Aboriginal families. The difference was +18%.
- The single parent difference had decreased by 15% since 2011, after having increased by 11% over the previous five years.
- The single parent difference in NSW was +23%. It had decreased by 2% since 2011 after having decreased by 1% over 2006 to 2011.

The lone person difference
Living alone is less common for Aboriginal people than for others, so most communities have a large lone person difference. The difference is influenced locally by the availability of small dwellings.

- In 2016, 18% of Glen Innes Severn’s Aboriginal households were lone persons, compared with 35% of non-Aboriginal households. The lone person difference was -16%.
- The lone person difference had reduced by 4% since 2011, after having increased by 2% over the previous five years.
- The lone person difference in NSW was -9% and had changed little since 2011. It had decreased by 1% between 2006 and 2011.

The family size difference
The family size difference is the gap between the average sizes of Aboriginal and non-Aboriginal 'nuclear families' (couples with children). Larger families have to spread their income among more members, so living standards tend to be lower.

- In 2016, the average size of Glen Innes Severn’s Aboriginal nuclear families was 4.3 persons (i.e. 2.3 children), compared with 4.0 persons (2.0 children) for non-Aboriginal families, a difference of 0.3 children per family.
- The family size difference had decreased by 0.4 since 2011, after having increased by 0.4 over the previous five years.
- The family size difference in NSW was 0.3 children per family, and had decreased by 0.1 since 2011. It had increased by 0.1 from 2006 to 2011.
Types of housing

In 2016, most Aboriginal households in Glen Innes Severn (90%) were living in detached houses, with 5% living in flats or units and 3% living in caravans or cabins.

- Compared with other households in Glen Innes Severn, 2% more Aboriginal households lived in caravans or cabins, and 3% fewer lived in detached houses.
- The proportion of Aboriginal households living in detached houses in Glen Innes Severn was down by 2% since 2011, and was 8% lower than in 2006.

The proportion in detached houses was 10% higher than that of Aboriginal households in NSW. The proportion in semis/townhouses was 10% lower.

The proportion of non-Aboriginal households in detached houses in Glen Innes Severn was down by 1% since 2011 and little changed since 2006.

In 2016, most Aboriginal households in Glen Innes Severn (90%) were living in detached houses, with 5% living in flats or units and 3% living in caravans or cabins.

42 Aboriginal people in the LGA (9%) were counted living in institutional accommodation on Census night (eg. nursing homes, hospitals, boarding houses, correctional centres, barracks or boarding schools).

- There were 39 Aboriginal people living in institutional accommodation in this LGA in 2011, and 43 in 2006.
- Of the Aboriginal people in institutional accommodation, there were only males.

Note: very small numbers are randomly altered by the ABS to protect privacy, so are not precise.

No Aboriginal people were reported living in improvised accommodation (eg. shacks, tents or sleeping out) in the LGA on Census night.

- This was virtually unchanged since 2011.
Housing costs and tenure

In 2016, Aboriginal households in Glen Innes Severn most commonly lived in dwellings that were rented (55% of the households). Another 24% lived in dwellings that were being purchased, and 17% in homes that were fully owned.

- The proportion of Aboriginal households that rented, 55%, was 31% higher than for other households here.
- The proportion living in rented dwellings was down by 6% since 2011, and was 1% lower than in 2006.
- The median weekly rent paid by Aboriginal households was $200. It was $150 in 2011 and $97 in 2006.
- The proportion living in dwellings that were being bought (24%) was 2% lower than for Other households.
- The proportion living in mortgaged dwellings was up by 3% since 2011; and 5% higher than in 2006.
- The median monthly mortgage paid by Aboriginal households in the LGA in 2016 was $1,083. It was $1,300 in 2011 and $650 for 2006.
- The proportion of Aboriginal households in fully owned dwellings (17%) was 28% lower than for non-Aboriginal households.
- The proportion in fully owned dwellings was up by 1% since 2011; and 1% higher than in 2006.

Among Aboriginal households, the proportion renting in Glen Innes Severn was 1% higher than the rate in NSW.

24% of Other households in Glen Innes Severn were renting, 1% higher than in 2011, and 2% higher than in 2006.

The median weekly rent paid by Other households in Glen Innes Severn was $200. It was $155 in 2011 and $110 in 2006.

In NSW, 27% of Aboriginal households were homebuyers with a mortgage.

26% of the Other households in Glen Innes Severn had a mortgage, little changed since 2011, and up by 1% since 2006.

The median mortgage paid by Other households in Glen Innes Severn was $1,083. It was $1,083 in 2011 and $796 in 2006.

The proportion of Aboriginal households in fully owned dwellings in Glen Innes Severn was 2% higher than the average in NSW.

The proportion of Other households in fully owned dwellings in Glen Innes Severn was down by 2% since 2011, and down by 4% since 2006.

Of 131 Aboriginal rental households, 56% were managed by real estate agents and 17% were managed by public housing.

- 22 Aboriginal households lived in public housing (9% of all households).
- This number had fallen by 5 since 2011.

Only 1% of the Other households lived in public housing.

The number of Other households in public housing in Glen Innes Severn had fallen by 11.
Housing Indicators

The home ownership gap
Ownership of a home is the main way that most Australians accumulate wealth and ensure secure accommodation.

- In 2016, 41% of Aboriginal households in Glen Innes Severn were either buying or owned their home, compared with 71% of Other households, a home ownership gap of ~30%.
- The gap had closed by 6% since 2011, after having closed by 3% over the previous five years.
- The home ownership gap in NSW was -24% and had closed by 4% since 2011. It had closed by 3% between 2006 and 2011.

The 'unhoused' gap
An indicator of homelessness in the Census is the count of people living in improvised housing (eg. shacks, tents or sleeping out).

- In 2016, no Aboriginal residents in the LGA lived in improvised housing; 1.9 per 1000 non-Aboriginal residents did. The unhoused gap was -1.9 per 1000.
- The unhoused gap had not applied in 2011 when there were no Aboriginal people, after there being no Aboriginal people in 2006.
- The unhoused gap in NSW was 0.5 per 1000, and had widened by 0.3 per 1000 since 2011. It had closed by 1.1 per 1000 over 2006 to 2011.

Improvised housing includes sheds, tents, humpies and other improvised dwellings occupied on Census night. It also includes people sleeping on park benches or in other ‘rough’ accommodation (the traditional definition of homeless people).

The institutional difference
Differences in proportion of people in institutional accommodation will reflect the nature and extent of these institutions in the area – they might include hotels, boarding houses, nursing homes, correctional centres, barracks or hospitals.

- In 2016, 9% of Aboriginal residents in Glen Innes Severn were in institutional housing, compared with 30 per 1000 non-Aboriginal residents. The institutional difference was +58 per 1000.
- The institutional gap had increased by 1 per 1000 since 2011, after having increased by 22 per 1000 over the previous five years.
- The institutional difference in NSW was 9 per 1000 and had changed little since 2011. It had also changed little between 2006 and 2011.
**Internet @ home**

In 2016, 56% of Aboriginal households in Glen Innes Severn had an internet connection while 36% did not (87 households); 5% did not answer the question.

- The proportion of Aboriginal households connected to the internet was 17% lower than in NSW (74% connected).
- The proportion of Aboriginal households with internet was unchanged from 57% in 2011.
- In 2006, 35% of Glen Innes Severn's Aboriginal people had the internet at home. ... and 12% lower than non-Aboriginal households in Glen Innes Severn (where 69% of homes were connected).

This compared with 43% of Aboriginal people in NSW and 46% of non-Aboriginal people in this LGA.

The proportion was up by 8% for Aboriginal households in NSW. It was up by 7% for non-Aboriginal households in this LGA (from 61% in 2011).

In 2016, 56% of Glen Innes Severn's Aboriginal households had an internet connection, compared with 69% of other households, an internet gap of -13%.

The internet gap had widened by 9% since 2011, after having closed by 7% over the previous five years.

The internet gap in NSW was 9% and had narrowed by 2% since 2011. It narrowed by 8% between 2006 and 2011.

The internet is becoming increasingly important as a source of communication and information, and is becoming an essential service.

- In 2006, 35% of Glen Innes Severn's Aboriginal households had an internet connection, compared with 69% of other households, an internet gap of -34%.
- The internet gap had widened by 9% since 2011, after having closed by 7% over the previous five years.
- The internet gap in NSW was 9% and had narrowed by 2% since 2011. It narrowed by 8% between 2006 and 2011.

The 2006, 2011 and 2016 Censuses had different questions about the internet.
Personal income

In 2016, the average weekly income of Aboriginal adults (aged 15+) in Glen Innes Severn was about $491, which was 21% less than that of Aboriginal adults in NSW ($621), and 31% less than the average of all adults in the LGA ($709).

- Aboriginal men in Glen Innes Severn averaged $544 a week (69% of the overall male average here). Aboriginal women averaged $385 a week (79% of the overall female average).
- The average weekly income of Aboriginal men was $123 lower in Glen Innes Severn than in NSW. The average weekly income of Aboriginal women here was $122 lower than in NSW.
- Half of the Aboriginal adults received under $406 a week (the median income).

The income distribution pattern among Aboriginal adults in Glen Innes Severn was different from Aboriginal adults in NSW, but somewhat different from all adults in the LGA.

Compared with Aboriginal adults across NSW:
- proportionally more Aboriginal adults here were in the $400–$499 and $150–$299 ranges.
- fewer were in the $1,000 or more and $800–$999 ranges, and in the nil/negative range.

Compared with all adults in this LGA:
- more Aboriginal adults were in the $150–$299 and nil/negative ranges.
- proportionally fewer were in the $1,000 or more and $800–$999 range, and in the $500–$649 range.
Household income

In 2016, the average income of Aboriginal households in Glen Innes Severn was about $1,024 a week. Household income is not a strong indicator of well-being because the benefit the income gives household members is affected by the household’s size.

- The average Aboriginal household income in Glen Innes Severn was 40% less than the average of Aboriginal households in NSW ($1,703 a week).
- It was 16% less than the average of Glen Innes Severn's non-Aboriginal households – $1,219 a week.
- Half the Aboriginal households received less than $803 a week (the median household income).
- Aboriginal households in the LGA had an average size of 2.7 residents, compared with 2.2 for non-Aboriginal households. Household incomes thus had to be spread among more people, compared to other households.

The income distribution pattern among Aboriginal households in Glen Innes Severn was very different from the NSW Aboriginal households, but different from other households in the LGA.

Compared with Aboriginal households across NSW:
- more Aboriginal households in this LGA were in the $800–$999 and $650–$799 income ranges, and in the $300–$399 and $400–$499 ranges.
- fewer Aboriginal households were in the $3,000 or more and $2,000–$2,499 income ranges, with fewer in the $1,500–$1,999 and $1,250–$1,499 ranges.

Compared with non-Aboriginal households in this LGA:
- more Aboriginal households were in the $800–$999 and $300–$399 income ranges.
- fewer Aboriginal households were in the $400–$499 and $2,000–$2,499 income ranges, or in the $1,250–$1,499 range.
Income Indicators

The personal income gap
Income is a major contributor to well-being. One indicator of disadvantage is a low median income – the amount which fewer than half the people earn.

- In 2016, the median income of Aboriginal adults in Glen Innes Severn ($406) was 84% that of non-Aboriginal adults in this LGA ($481). The personal income gap was -16%.
- The personal income gap had closed by 3% since 2011, after having closed by 9% over the previous five years.
- The personal income gap in NSW was -29% and had narrowed by 5% since 2011. It had narrowed 2% between 2006 and 2011.

The household income gap
Another indicator of disadvantage is a low median household income; half of all households receive less than this amount. However, Aboriginal households tend to be larger, with more dependents, so household income does not reflect disadvantage as well as individual income does.

- In 2016, the median income of Aboriginal households in Glen Innes Severn was $803, compared with $842 for Other households in the LGA. This was 5% lower – this is the household income gap.
- The household income gap had reversed since 2011, after having reversed over the previous five years.
- The household income gap in NSW was 19% and had closed by 6% since 2011. It had narrowed by 5% between 2006 and 2011.
Education participation by age

Having high proportions of people in education is a good indicator of positive individual and community development. In Glen Innes Severn, three in ten Aboriginal residents (161 people) were attending an educational institution in 2016.

Aboriginal participation in education varied with age. Here in education were:

- 13% of 0–4 year olds
- 88% of 5–14 year olds
- 67% of 15–19 year olds
- 8% of 20–24 year olds
- 6% of those aged 25+

Because the Aboriginal population has much higher proportions at school age, their overall participation rate in education, 30%, is higher than the non-Aboriginal rate in this LGA, 18%. Relative to non-Aboriginal people of the same age, there were, in education:

- 3% more Aboriginal 25+ year olds
- similar proportions of 15–19 year olds
- 7% fewer Aboriginal 5–14 year olds
- 9% fewer Aboriginal 0–4 year olds
- 11% fewer Aboriginal 20–24 year olds

Overall, Glen Innes Severn's Aboriginal population had 130 females per 100 males in education. This varied with age. Of those in education, there were:

- 2.3 females per male among 0–4 year olds
- 1.0 males per female among 5–14 year olds
- 1.1 females per male among 15–19 year olds
- only females among 20–24 year olds
- only females among 25+ year olds

Since 2011, overall participation in education by Aboriginal people in Glen Innes Severn had decreased by 3%, but this masks changes among the age groups.

- The proportion of 0–4 year olds in education was down by 5% since 2011, and down by 2% since 2006.
- The proportion of 5–14 year olds in education was down by 3% since 2011, and up by 4% since 2006.
- The proportion of 15–19 year olds in education was up by 14% since 2011, and up by 9% since 2006.
- The proportion of 20–24 year olds in education was down by 13% since 2011, and up by 8% since 2006.
- The proportion of 25+ year olds in education was down by 1% since 2011, and down by 5% since 2006.

Note: In January 2010, the school leaving age in NSW changed from 15 to 17 years of age.
Current education

In 2016, some 145 Aboriginal children and teenagers in Glen Innes Severn were attending school, with 14 in pre-school, 81 in primary school, and 50 in high school.

The number of Aboriginal pre-schoolers was unchanged since 2011 and up by 17% since 2006.

- The 14 Aboriginal pre-schoolers equaled 50% of the Aboriginal children aged 4–5.
- In NSW, Aboriginal pre-schoolers equalled 72% of the number aged 1–5 years. Non-Aboriginal pre-schoolers in this LGA represented 62% of their age group.

The number of Aboriginal primary students (81) was up by 22 or 37% since 2011; it was 4% higher than in 2006.

- Aboriginal primary students were 103% of the number aged 6–11. This is because some primary students were other ages.
- This rate was 7% lower than the Aboriginal rate in NSW and 10% lower than for non-Aboriginal children in Glen Innes Severn.

The number of Aboriginal secondary students (50) was down by 3 since 2011 but 22% higher than 2006.

- Aboriginal secondary students were 83% of the Aboriginal children aged 12–17.
- This rate was 1% higher than the rate for non-Aboriginal secondary students; it was 3% higher than for Aboriginal students in NSW.

24 Aboriginal residents of Glen Innes Severn were in post-school education in 2016. This was 7 less than in 2011, and the same as in 2006.

In 2016, there were a few Aboriginal 15–24 year olds from the LGA enrolled in TAFE (6% of the number this age); 100% attended full-time.

- 8% of Aboriginal 15–24 year olds in this LGA attended TAFE, with 35% full-time.
- 8% of non-Aboriginal 15–24 year olds in this LGA attended TAFE, with 31% full-time.

A few Aboriginal 15–24 year olds from the LGA attended university or other tertiary education (4% of the number this age); 100% were full-time.

- 7% of Aboriginal 15–24 year olds in NSW were at university, with 83% full-time.
- 6% of non-Aboriginal 15–24 year olds in this LGA were at university, with 81% full-time.

There were a few Aboriginal students aged 25+ attending TAFE in 2016 (2% of those aged 25–64), with none full-time.

- 4% of Aboriginal 25–64 year olds in NSW attended TAFE, with 30% full-time.
- 2% of non-Aboriginal 25–64 year olds in this LGA attended TAFE, with 22% full-time.

A few Aboriginal students aged 25+ were in tertiary education in 2016 (2% of 25–64 year olds), with none full-time.

- 3% of Aboriginal 25–64 year olds in NSW were at university, with 43% full-time.
- 1% of non-Aboriginal 25–64 year olds in this LGA were at university, with 23% full-time.
In 2016, 67% of Glen Innes Severn Aboriginal teenagers aged 15–19 were in education, compared with 68% of non-Aboriginal teenagers. The teenage education gap was -2%.

The schooling gap had widened by 7% since 2011, after having closed by 1% over the previous five years.

The pre-school rates of Aboriginal and non-Aboriginal infants in NSW were 25% and 25% in 2016, a gap of nil. This gap had closed by 2% since 2011.

Education of older teenagers is vital for their future employment, so low levels of participation in education indicates disadvantage.

In 2016, 67% of Glen Innes Severn Aboriginal teenagers aged 15–19 were in education, compared with 68% of non-Aboriginal teenagers. The teenage education gap was -2%.

The teenage education gap had closed by 17% since 2011, after having widened by 11% over the previous five years.

The teenage education gap between Aboriginal and non-Aboriginal in NSW was -18% and had narrowed by 1% since 2011. It narrowed by 6% over 2006 to 2011.

School is compulsory for children up to the age of 17*. Low schooling rates suggest truancy and/or underage school leavers.

In 2016, 88% of Glen Innes Severn's Aboriginal children aged 5–14 were in education, and 95% of non-Aboriginal of that age were. The schooling gap was 7%.

The schooling gap had widened by 7% since 2011, after having closed by 9% over the previous five years.

The schooling gap in NSW was -3% and had narrowed by 4% since 2011. It changed little over 2006 to 2011.

* In January 2010, the school leaving age in NSW changed from 15 to 17 years of age.
Schooling levels

In 2016, Aboriginal adults (15+) in Glen Innes Severn had completed an average of Year 9.7 of school, compared with Year 10.3 for non-Aboriginal adults. In NSW, Aboriginal adults averaged Year 10.3.

- 59 Aboriginal adults in the LGA had completed Year 12, which was 28% more than in 2011 and 119% more than in 2006.
- The proportion of Aboriginal adults in the LGA who had completed Year 12 was 18%, which was 15% lower than that of non-Aboriginal adults.
- 30% of Aboriginal adults across NSW had completed Year 12.
- 54% of Aboriginal adults in the LGA had completed at least Year 10, which was 16% lower than for Aboriginal adults in NSW.
- Of the others, 15% had completed Year 9 and 13% had completed Year 8 or lower; 5 adults did not go to school (2%); 17% did not say.

The average Year of school is calculated by multiplying the number who finished each Year’s school by the Year, assuming those who replied ‘8 years or less’ averaged 7 years schooling, those who responded ‘no school’ had 0 years, and excluding those who did not respond.

The average Year when Aboriginal people in Glen Innes Severn left school had changed little since 2011, and was up by 7 months since 2006.

Over the decade to 2016, there was an increase of 119% in the number who had finished Year 12 and an increase of 50% in the number who had finished school at Year 11.

For Aboriginal adults in this LGA, average schooling:
- for men had risen by one month since 2011, and had risen by 4 months since 2006.
- for women had risen by 4 months since 2011, and had risen by one year 1 month since 2006.

For non-Aboriginal adults, average schooling:
- for men had risen by one month since 2011, and had risen by 4 months since 2006.
- for women had risen by one month since 2011, and had risen by 4 months since 2006.

The average schooling of Aboriginal adults in NSW:
- for men had risen by 4 months since 2011, and risen by 6 months since 2006.
- for women had risen by 4 months since 2011, and risen by 6 months since 2006.
The proportion of adults who have completed Year 12 is an important indicator of a community’s educational resources. Nationally, over half of all adults (58%) have completed Year 12.

- In 2016, 18% of Glen Innes Severn Aboriginal adults had completed Year 12, compared with 33% of non-Aboriginal adults. The Year 12 gap was -15%.
- The Year 12 gap had changed little since 2011 after closing by 2% from 2006 to 2011.
- The Year 12 gap in NSW was -28% and had narrowed by 1% since 2011. It widened by 2% between 2006 and 2011.

The average schooling gap
The average Year of schooling completed by adults is an indicator of a community’s educational resources. Nationally, the average is Year 11.

- In 2016, Glen Innes Severn Aboriginal adults had completed an average of Year 9.7 at school, compared with Year 10.3 for non-Aboriginal adults. The average schooling gap was 0.6 years (7 months).
- The average schooling gap had widened by one month since 2011, after closing by 4 months over the previous five years.
- The average schooling gap in NSW was 8 months. It had changed little since 2011, after having changed little between 2006 and 2011.
Disability levels

In 2016 in Glen Innes Severn, 42 Aboriginal residents had a long-term severe disability; 7.9% of the population. Among all Glen Innes Severn's residents, 6.8% reported a disability.

People with a long-term severe disability are those needing help or assistance with self-care, mobility or communication, because of a disability, long-term heath condition or old age. This data compares Aboriginal people with the total population.

 Disability rates tend to rise with age. In 2016, they peaked among Aboriginal 65+ year olds (32%).

Among younger Aboriginal residents, the disability rate was highest among 25–34 year olds at 11% and 5–14 year olds at 10%.

Because Aboriginal communities tend to have fewer people in the oldest age groups where disability rates are much higher, the overall disability rate can be lower than in non-Aboriginal communities. This can mask much higher rates in some age groups.

 In this LGA, the overall Aboriginal disability rate was 1.2 times that in the overall population: 7.9% compared with 6.8%.

Among 5–14 year olds, the Aboriginal disability rate (10%) was 4 times the overall rate (2.5%);

Among 25–34 year olds, the Aboriginal disability rate (11%) was 3 times that of all residents (3.7%).

Aboriginal disability rates were similar for men and women: 8.3% to 8.2%. Among all residents, they were similar for men and women: 6.7% to 7.0%.

There were 1.4 females per male among 5–14 year olds with a disability.

On the other hand, there were 1.2 males per female among 45–54 year olds with a disability. There were only males among those with a disability aged 25–34.

From 2011 to 2016, the overall disability rate among Aboriginal residents of the LGA rose significantly from 5.5% to 7.9%.

In the LGA, the greatest change in the Aboriginal disability rate was the increase among those aged 5–14, from 2.9% in 2011 to 10.3% in 2016.

Disability rates also rose among 65+ year olds and 25–34 year olds.

Disability rates fell most among those aged 20–24 years.

Among Aboriginal people in NSW, the disability rate rose from 6.2% to 7.6%.

Among all Glen Innes Severn residents, the disability rate changed little, and was 6.8% in 2016.
Disability care given

In the 2016 Census, 49 Aboriginal adults in Glen Innes Severn, 14% of the adult population, reported that they gave assistance to a person with a severe or profound disability. There were at that time 42 Aboriginal residents who reported a severe or profound disability.

Across the age groups, the proportion of Aboriginal people caring for a person with a disability ranged from 17% of 55–64 year olds and 13% of 45–54 year olds to none of 15–19 year olds.

Carers are more often women than men. In the Glen Innes Severn Aboriginal community, there were 2.1 females per male among carers.

Female carers were most common among 45–54 year olds with 3.7 females per male caring, and among 25–34 year olds, with only females caring.

Male carers were most common among carers aged 55–64 with 2.3 males per female caring, and among those aged 20–24 with 1.3.

The 14% carer rate among Aboriginal residents was similar to the average for all adults in the LGA (13%).

Among 20–24 year olds, the proportion of Aboriginal carers was 1.3 times the average.

Among 25–34 year olds, the proportion of Aboriginal carers was 1.0 times the average.

In NSW, 15% of Aboriginal adults were caring for a person with a disability.

Relative to the NSW Aboriginal community, there were 1% more carers among Aboriginal people aged 20–24 here. There were 8% fewer carers here among those aged 45–54.

From 2011 to 2016, overall caring rates among Aboriginal adults in the LGA changed only slightly from 12% to 14%.

Among Aboriginal adults in NSW, caring rates rose by 1%.

Among all Glen Innes Severn’s adults, caring rates changed little.

In the LGA, Aboriginal caring rates increased most among 65+ year olds, from none in 2011 to 11% in 2016.

Caring rates also rose 4% among 20–24 year olds and 3% among 35–44 year olds.

Caring rates fell most among 15–19 year olds, down by 14%, and among those aged 55–64, down by 10%.
The disability gap
Disability rates provide a useful indicator of a community's health and need for support services. Nationally, disability rates among Aboriginal people are about 25% higher than overall rates, across most age groups.

- In 2016, 7.9% of Glen Innes Severn's Aboriginal residents had a severe, long-term disability, compared with 6.8% for all residents. The disability gap was +1.1%. The Aboriginal disability rate was 1.2 times the overall rate.
- The disability gap in Glen Innes Severn had reversed since 2011, after having widened by 0.3% over the previous five years.
- The disability gap in NSW was +2.2% and had widened by 0.9% since 2011.

In the Census, people with disabilities are those with a severe or profound disability lasting more than six months, who require help with daily activities, self-care or communicating.

The carer difference
Aboriginal people have higher disability rates and larger families, so often have proportionally more carers than the general population.

- In 2016, 14% of Glen Innes Severn's Aboriginal adults (aged 15+) provided assistance to a person with a severe disability, compared with 13% of all adults. The carer difference was +1% (rounded).
- The carer difference in Glen Innes Severn had reversed since 2011, after having closed by 2% over the previous five years.
- The carer difference in NSW was +3% in 2016. This had widened by 0.7% since 2011.
