Prepared for Aboriginal Affairs NSW

Inverell is the Local Government Area of Inverell at the 2016 Census.

## Preface

This report uses data from the Census, held every five years by the Australian Bureau of Statistics (ABS), to paint a profile of the Aboriginal population of Inverell as it was in August 2016, and show how it had changed over the previous decade.

- Language in this report** Where it is used in this Portrait, the term 'Aboriginal' is used to describe the many nations, language groups and clans in Inverell, including those from the Torres Strait. This usage recognises that Aboriginal people are the original inhabitants of NSW.
- Who is included?** The people described in this Portrait were the usual residents of Inverell in 2016, even if they completed the Census away from home. People who were visiting Inverell on Census night are not included.
- Who are Aboriginal?** Aboriginal people, in this Portrait, means all people who, in completing the Census, responded that they had Aboriginal or Torres Strait Islander origins, or both. Non-Aboriginal people are those who said they did not have these origins. Note: the Census question asks people about their origins; it does not ask how they identify in their daily lives.
- Are all Aboriginal people counted?** Not all Aboriginal people completed the Census and identified their origins: 8.5% of Inverell's Census respondents said they had Aboriginal origins, but another 7.9% did not answer this question. The ABS estimates that the net undercount rate for Aboriginal and Torres Strait Islander peoples was 17.5% in 2016 (equivalent to 137,750 persons nationally). This is slightly higher than 2011 (17.2%). This means that, on average, the Aboriginal population was about a fifth larger than counted. However, despite such omissions, the Census is a vital source of information about Aboriginal Australians.
- National trends** Nationally, the number of people with Aboriginal origins counted in the Census rose by a fifth (21%) between 2011 and 2016. Almost three-quarters of the increase was from births; the rest was caused by more people identifying Aboriginal origins than previously.
- Sources of data** The data for this report are drawn from the Aboriginal and Torres Strait Islander Peoples (Indigenous) Profiles and Community Profiles published by the ABS from the 2006, 2011 and 2016 Censuses. Data in this portrait for 2011 and 2006 censuses have been produced using the 2016 boundary regardless of changes to previous LGA or other geographical classifications over time.
- Note: difference and changes shown in this Portrait are rounded to the nearest significant figure but are calculated from the unrounded data, so small anomalies are possible when comparing differences. Small Census counts are randomised by the ABS to protect privacy so are not precise; in this Portrait, numbers less than 5 are reported as 'a few'.

### Copyright and disclaimer

# Snapshot: Inverell LGA, 2016

- ⌘ In the 2016 Census, 1,408 of the 16,483 residents (8.5%) counted in Inverell said that they had Aboriginal or Torres Strait Islander origins, or both. Of these, 97% were Aboriginal.
  - ⌘ Between 2011 and 2016, the counted Aboriginal population rose by 34%, from 1,054; the overall population of the LGA rose by 3%.
  - ⌘ About 13% of the Aboriginal population were under 5 in 2016. This infant population accounted for half of the Aboriginal population growth between 2011 and 2016.
- ⌘ The Aboriginal community is significantly younger than the non-Aboriginal population, with a median age of 21 vs 44 years.
  - ⌘ There was a higher proportion under 18 years old: 43% compared with 22%.
  - ⌘ There was a lower proportion aged 65 or more: 6% compared with 23%.
- ⌘ Aboriginal households had an average of 3.0 residents, which was larger than non-Aboriginal households (2.3) in the LGA.
  - ⌘ One in three Aboriginal households were one parent families.
  - ⌘ One in four were couples with children.
  - ⌘ 15% of the Aboriginal households were single persons (vs 29% of non-Aboriginal households).
- ⌘ Aboriginal households most commonly lived in rented dwellings (61%), with 23% in mortgaged and 12% in fully owned dwellings.
  - ⌘ In all, 35% of Aboriginal households in Inverell were home-owners (with or without a mortgage), which was up by 2% since 2011.
- ⌘ The median income of Aboriginal adults in Inverell was about \$388 a week, which was 73% that of all adults here (\$528).
  - ⌘ The median income gap had closed by 4% since 2011.
- ⌘ 46% of Aboriginal adults were in the labour force, compared with 57% of non-Aboriginal adults.
  - ⌘ 28% of the Aboriginal workforce were unemployed, compared with 6% of the non-Aboriginal workforce.
- ⌘ One in three Aboriginal residents (482 people) was attending an educational institution.
  - ⌘ 189 Aboriginal people had completed Year 12, which was 117% more than in 2011 and 2.2 times the number in 2006.
  - ⌘ Compared with non-Aboriginal residents of the same age, there were:
    - 17% fewer Aboriginal people aged 15–19 year olds in education;
    - 9% fewer Aboriginal people aged 20–24 year olds in education.
  - ⌘ 39% of Aboriginal adults had some type of post-school qualification, compared with 59% of non-Aboriginal adults in the LGA (3% had a degree or higher, compared with 25%).
- ⌘ 115 Aboriginal people (8.2% of the Aboriginal population) reported that they had a severe or profound disability.
  - ⌘ Aboriginal people had higher disability rates than average in most age groups.
    - the disability rate for Aboriginal people aged 45–54 year olds was 2.8 times the average for this age group in Inverell.
    - for 55–64 year olds, the Aboriginal rate was 2.5 times the average in the LGA.
  - ⌘ 14% of Aboriginal adults (aged 15+) gave assistance to a person with a severe disability.
- ⌘ 59% of Inverell's Aboriginal households had an internet connection, which was 8% higher than in 2011.

## Tracking changes in Inverell

In the table below, some indicators of community structure and well-being are calculated for Aboriginal people in Inverell. The difference or gap between Aboriginal and non-Aboriginal people in Inverell is shown for 2016. Changes in the Aboriginal rates are tracked over the past five years and decade.

Indicator	Inverell LGA, 2016			Change in Aboriginal rate	
	Aboriginal	non-Aboriginal	Gap in 2016	last 5 years 2011–2016	last decade 2006–2016
				up 2%	up 4%
<b>home ownership</b> % of households owning/buying their home	35%	69%	-34%	up 2%	up 4%
<b>personal income*</b> median weekly income of adults (15+)	\$388	\$528	-27%	up 27%	up 58%
<b>household income</b> median weekly income of households	\$864	\$960	-10%	up 18%	up 41%

<b>unemployment</b> % of unemployed in workforce	28%	6%	+22%	same	dn 10%
<b>employment</b> employed adults as % of population	21%	44%	-23%	up 4%	up 5%
<b>pre-school</b> % of infants under 5 in education	23%	26%	-3%	up 2%	up 9%
<b>teenage education</b> % of 15–19 year-olds in education	55%	71%	-17%	dn 7%	up 17%
<b>children at school</b> % of 5–14 year olds in education	94%	95%	-1%	up 11%	up 8%
<b>Year 12 completion</b> % of adults (15+) who have left school	23%	36%	-13%	up 8%	up 10%
<b>average schooling</b> average school Year completed	10.0 yrs	10.4 yrs	-0.4 yrs	0.5 yrs	0.3 yrs
<b>tertiary qualifications</b> % of adults 15+ with a post-school qualification	39%	50%	-11%	up 3%	up 4%
<b>degree</b> % of adults 15+ with a degree or higher qualification	3%	10%	-7%	up 1%	up 2%
<b>postgrad</b> % of adults 15+ with a postgraduate qualification	0%	2%	-2%	up 0%	up 0%
<b>disability*</b> % of people with a severe, long-term disability	8.2%	6.5%	+1.7%	up 2%	up 4%

\* Personal income and disability data compare Aboriginal rates with those of the whole population in Inverell.

## Aboriginal population and growth

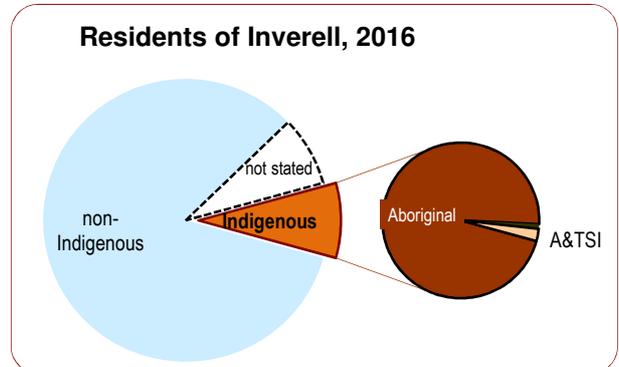

In the 2016 Census, Inverell's Aboriginal population was counted as 1,408 people, of whom 1,359 identified as Aboriginal and 36 as both Aboriginal and Torres Strait Islander; 14 identified as Torres Strait Islander.

- ⌘ Aboriginal people comprised 8.5% of Inverell's population, compared with 2.9% in NSW. 7.9% of Inverell people did not say whether they had Aboriginal or Torres Strait Islander origins.

- ⌘ Among the Aboriginal people here, there were 104 females per 100 males.

There were also 104 females per 100 males among non-Aboriginal people.

- ⌘ The ABS estimates that the net Census undercount rate nationally for Aboriginal and Torres Strait Islander peoples was 17.5% in 2016.

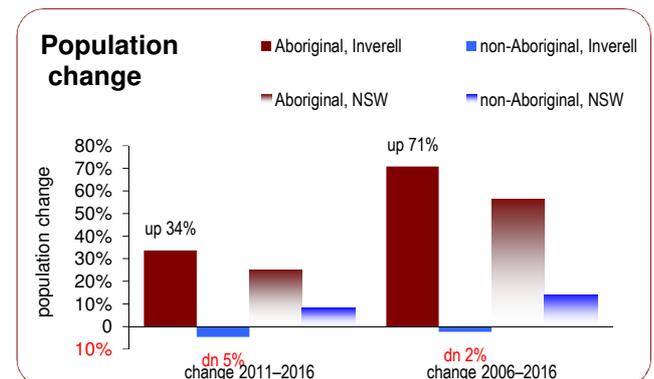

Between 2011 and 2016, the counted Aboriginal population in Inverell rose by 34% (by 354) from 1,054; in total, Inverell's population rose by 3%.

The number of infants born over the last five years accounted for half of the Aboriginal population growth between 2011 and 2016.

- ⌘ Between 2006 and 2016, Inverell's Aboriginal population rose by 71% (from 825 in 2006).

Inverell's non-Aboriginal population fell by 2% over the decade.

The Aboriginal population counted in NSW rose by 56% over the decade.

On Census night 2016, 1,314 Aboriginal residents of Inverell were at home (93%), and 96 were staying away from home (7%). Offsetting those away, there were 112 Aboriginal visitors staying in the LGA that night, equivalent to 8% of the Aboriginal resident population.

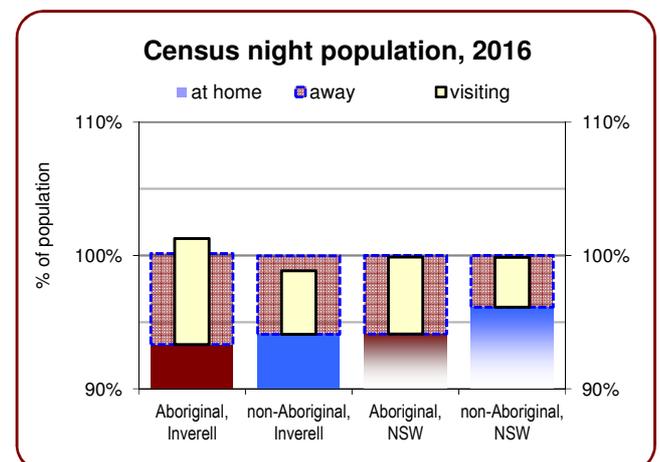

- ⌘ There were 12 visitors from the same locality (eg. overnighting with neighbours).

86% of the visitors were from elsewhere in NSW.

- ⌘ The proportion of Aboriginal residents away from home was similar to 2011.

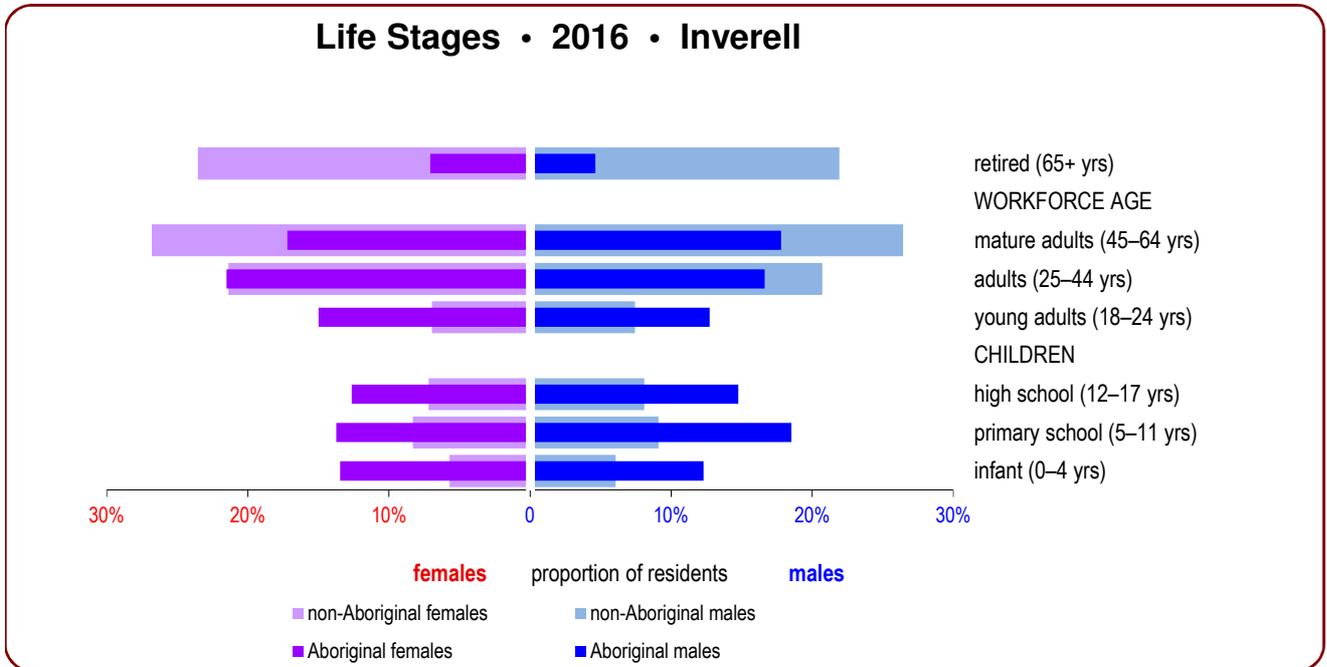

The proportion away from home was 1% higher than for non-Aboriginal residents of this LGA; it was 1% higher than for Aboriginal residents of NSW.

- ⌘ There were 41 more Aboriginal visitors than in 2011, when there were 71, equal to 7% of the Aboriginal population.

## Life stages

The Aboriginal population of Inverell had a smaller proportion in the working stage of life (15–64 years) than the non-Aboriginal population, with a higher proportion of children under 15 and a smaller proportion of people aged 65 or older.

In Inverell's Aboriginal population in 2016:

⌘ 702 people (50% or five in ten) were adults aged 18–64.

- 186 (or 13%) were aged 18–24
- 273 (or 19%) were aged 25–44
- 243 (or 17%) were aged 45–64

The number aged 18–64 was up 35% from 2011; and up 87% from 2006.

⌘ 611 Aboriginal residents (43% or over four in ten) were children under 18.

- 180 (or 13%) were under five
- 239 (or 17%) were aged 5–11
- 192 (or 14%) were aged 12–17

The number of children was up 25% since 2011; and up 44% since 2006.

⌘ 86 of Aboriginal residents were aged 65+ years (6% of the total).

The number aged 65+ had risen by 110% since 2011; it was 244% higher than in 2006.

The proportion aged 18–64 among Aboriginal people was 5% lower than for non-Aboriginal (55%).

6% more of the Aboriginal population were young adults (18–24 yrs), and 9% fewer were mature adults (45–64 yrs), compared with the non-Aboriginal population of the LGA.

Those aged 18–64 made up 54% of the Aboriginal community in NSW; their number had risen by 29% from 2011.

The proportion of Aboriginal children in Inverell was 21% higher than the average for non-Aboriginal people.

In NSW, 41% of the Aboriginal community were children under 18; the number was up 18% since 2011.

23% of non-Aboriginal people in Inverell were aged 65+.

Across NSW, 5% of Aboriginal people were aged 65+; their number had risen by 58% since 2011, and by 136% since 2006.

## Age profile

The Aboriginal population of Inverell has an age profile that is significantly younger than the non-Aboriginal population, with a lower median age (21 vs 44 years).

For Inverell's Aboriginal population in 2016:

- ⌘ The average age was 27 years in 2016, with half the population aged under 21 years (the median age).  
The largest 5-year age groups were 5–9 years (13%), 0–4 years (13%) and 15–19 years (11%).
- ⌘ The average age was one year higher than in 2011 and 3 years higher than in 2006.

Proportionally, the biggest increases since 2011 were of 65+ year olds (110% more), 20–24 year olds (103% more) and 5–9 year olds (84% more).

- ⌘ 86 Aboriginal people (6.1%) were aged 65+ years, compared with 23% of non-Aboriginal residents.
- ⌘ There were noticeably more males than females aged 55–59 years, 5–9 years and 10–14 years.

The average age was 16 years younger than for the non-Aboriginal residents; the median age was 23 years younger.

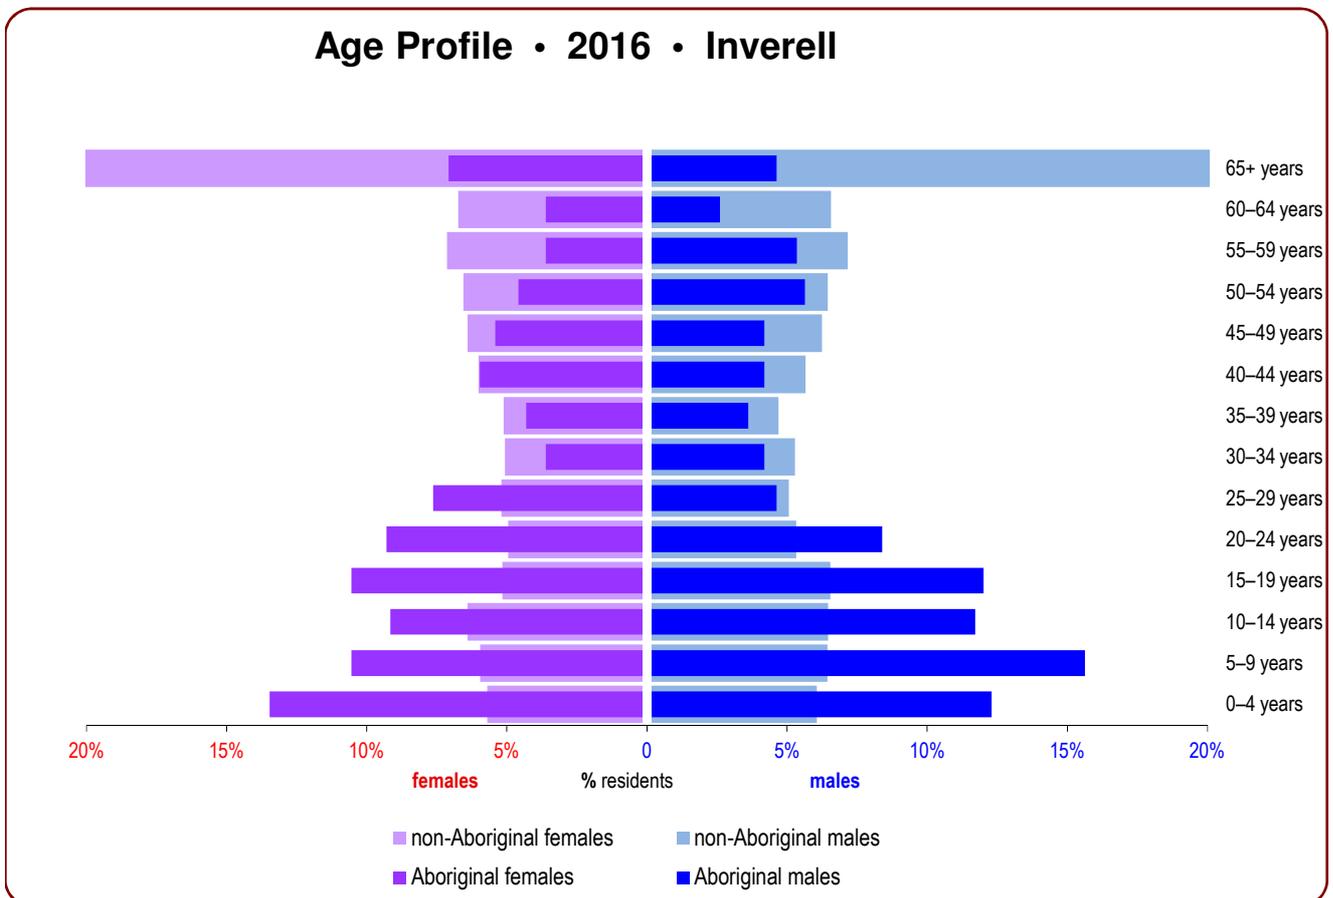

Non-Aboriginal population: about 6% were 5–9 years and also 0–4 years and 15–19 years.

The average age of Aboriginal people in NSW had risen by one year since 2011, and risen by 3 years in the decade since 2006.

In the NSW Aboriginal population, the increases since 2011 were: 65+ year olds (58%); 20–24 year olds (36%); and 5–9 year olds (24%).

The number aged 65+ was 110% higher than in 2011; the percentage of people this age was up by 2.2% since 2011, when it was 3.9%.

There were many more females than males among those aged 25–29 years, then those aged 65+ years and 40–44 years.

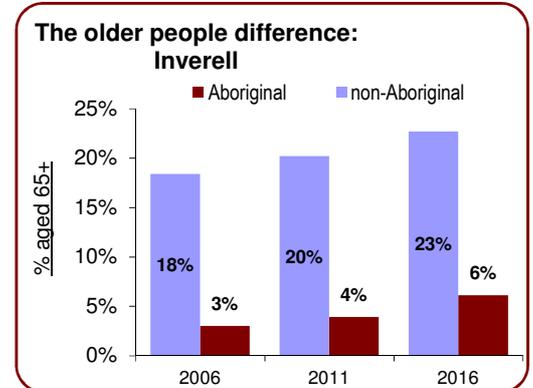

## Population Indicators

### The older people difference

% aged 65+ in population

Commonly, Aboriginal communities have a lower proportion of people aged over 65, due to a shorter average life-span and higher birth rates.

- ⌘ In 2016, 6.1% of Inverell's Aboriginal residents were aged 65 or over, compared with 22.7% of non-Aboriginal residents. The older people difference was -17%.
- ⌘ The older people difference had changed little since 2011, after having increased by 1% over the previous five years.
- ⌘ The older people difference in NSW was -11%. It had changed little since 2011 and changed little over the previous five years.

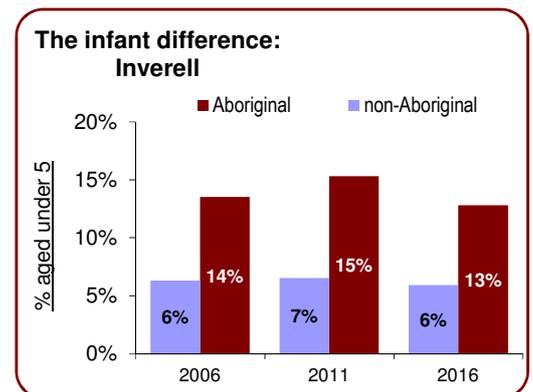

### The infant difference

% aged under 5 in population

Aboriginal communities generally have a higher proportion of young people due to larger families and fewer older people.

- ⌘ In 2016, 12.8% of Inverell's Aboriginal residents were infants, compared with 5.9% of non-Aboriginal residents. The infant difference was +7%.
- ⌘ The infant difference had closed by 2% since 2011, after having widened by 2% over the previous five years.
- ⌘ The infant difference in NSW was +5%. It had changed little since 2011 and changed little over 2006 to 2011.

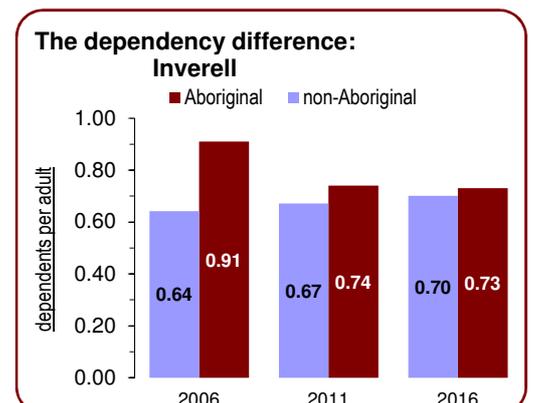

### The dependency difference

ratio of dependents to working age adults

The dependency ratio is the average number of people of dependent age (under 15 or 65+) for each person of working age. The national average is 0.5 dependents per adult. A higher ratio means each person of working age has more dependents to support, on average.

- ⌘ In 2016, Inverell's Aboriginal community had a dependency ratio of 0.73, compared with 0.70 for the non-Aboriginal community. The Aboriginal dependency ratio was similar.
- ⌘ The dependency difference had decreased by 0.04 since 2011, after having narrowed by 0.20 over the previous five years.
- ⌘ The dependency difference in NSW was 0.13 and had closed by 0.04 since 2011. It had closed by 0.05 over 2006 to 2011.

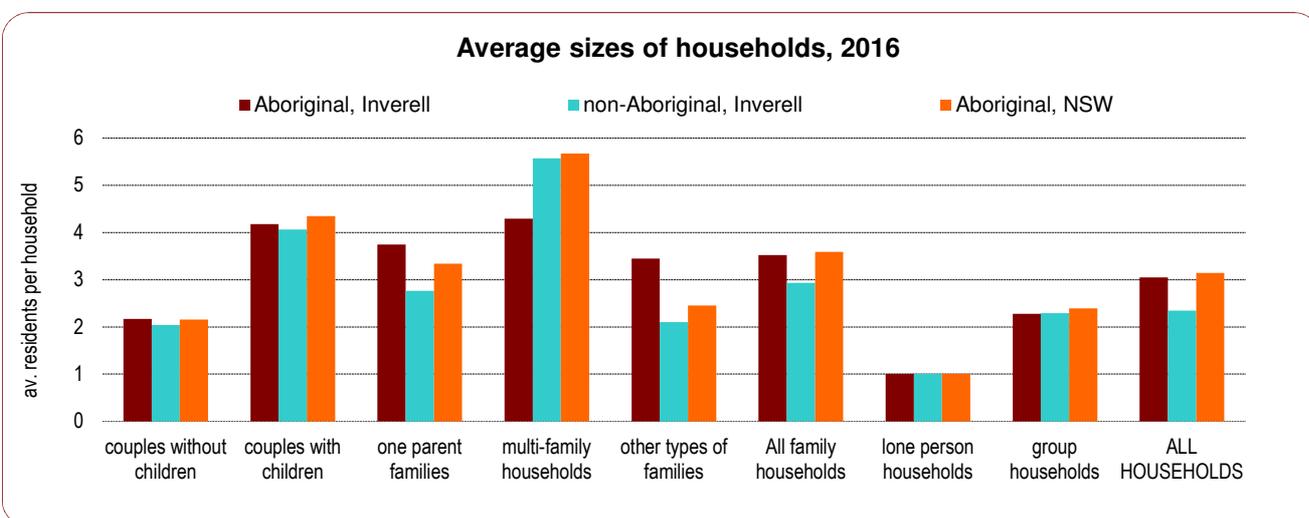

## Household types and sizes

In 2016, the 1,408 Aboriginal residents of Inverell were living in 575 households, 47% more than in 2011.

The main types of Aboriginal households\* in the LGA in 2016 were:

- ⌘ One in three were one parent families (200 households, or 35%). 25% higher than non-Aboriginal here
- ⌘ One in four were couples with children (134 households, or 23%). similar to non-Aboriginal
- ⌘ One in six were couples without children (91 households, or 16%). 15% less than non-Aboriginal
- ⌘ One in six were one-person households (89 households, or 15%). 14% less than non-Aboriginal
- ⌘ There were 27 multi-family households, and 9 other types of households.

\* Aboriginal households are those with at least one Aboriginal resident.

Aboriginal households had an average of 3.0 residents in 2016, which was 0.3 lower than in 2011, and 0.5 lower than in 2006.

- ⌘ Aboriginal households here were similarly sized to NSW, which averaged 3.1 residents.
 

The average size of the NSW Aboriginal households was little changed since 2011.
- ⌘ The average size of non-Aboriginal households in the LGA was 2.3 residents; Aboriginal households were 30% larger, on average.
 

The average size of non-Aboriginal households changed little from 2011.
- ⌘ The larger size of Aboriginal households is consistent with lower proportions of people living alone.
 

Aboriginal households: 15% lone person; Other households: 29%.
- ⌘ Aboriginal couple families had an average of 2.2 children, compared with 2.1 for non-Aboriginal families here. Aboriginal families in NSW averaged 2.3 children.
 

The average size of Aboriginal nuclear families was down by 0.4 since 2011, and down by 0.4 from 2006.
- ⌘ Aboriginal one-parent families averaged 2.7 children, compared with 2.3 in NSW and 1.8 for non-Aboriginal one-parent families here.
 

The average number of children per one-parent family was little changed since 2011, and up by 0.2 since 2006.
- ⌘ At an average size of 3.0 persons, the 575 Aboriginal households had some 1,700 members, but only 1,309 Aboriginal people were counted in these households.
 

This suggests that some 440 people in Inverell's Aboriginal households (one in four) did not identify as Aboriginal in the Census.

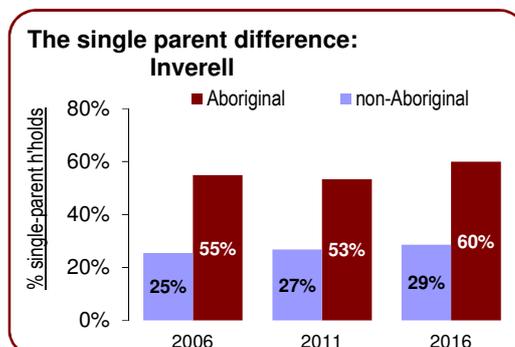

## Household Indicators

### The single parent difference

% of families with children having one parent

Single parent families often have low incomes because it is difficult for the parent to work without adequate child care and support. High proportions of one-parent families can indicate a higher need for support services.

- ⌘ In 2016, 60% of Inverell's Aboriginal family households with children had one parent, compared with 29% of non-Aboriginal families. The difference was +31%.
- ⌘ The single parent difference had increased by 5% since 2011, after having decreased by 3% over the previous five years.
- ⌘ The single parent difference in NSW was +23%. It had decreased by 2% since 2011 after having decreased by 1% over 2006 to 2011.

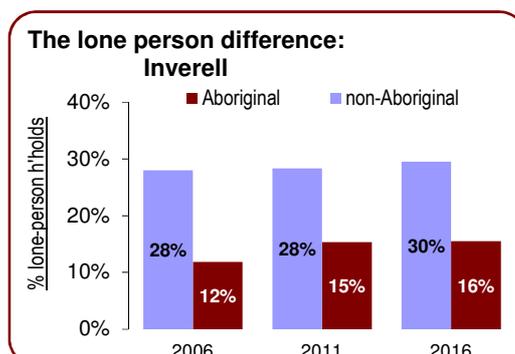

### The lone person difference

% of households with one person

Living alone is less common for Aboriginal people than for others, so most communities have a large lone person difference. The difference is influenced locally by the availability of small dwellings.

- ⌘ In 2016, 16% of Inverell's Aboriginal households were lone persons, compared with 30% of non-Aboriginal households. The lone person difference was -14%.
- ⌘ The lone person difference had increased by 1% since 2011, after having reduced by 3% over the previous five years.
- ⌘ The lone person difference in NSW was -9% and had changed little since 2011. It had decreased by 1% between 2006 and 2011.

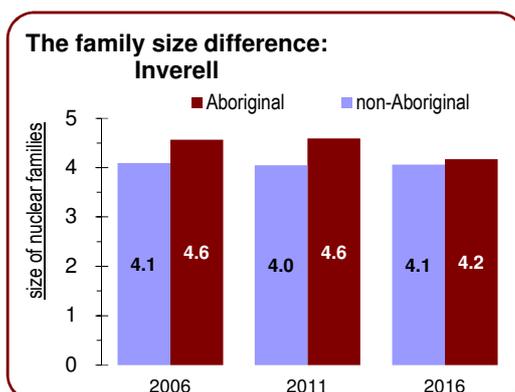

### The family size difference

average size of two-parent families

The family size difference is the gap between the average sizes of Aboriginal and non-Aboriginal 'nuclear families' (couples with children). Larger families have to spread their income among more members, so living standards tend to be lower.

- ⌘ In 2016, the average size of Inverell's Aboriginal nuclear families was 4.2 persons (i.e. 2.2 children), compared with 4.1 persons (2.1 children) for non-Aboriginal families, a difference of 0.1 children per family.
- ⌘ The family size difference had decreased by 0.4 since 2011, after having changed little over the previous five years.
- ⌘ The family size difference in NSW was 0.3 children per family, and had decreased by 0.1 since 2011. It had increased by 0.1 from 2006 to 2011.

## Types of housing

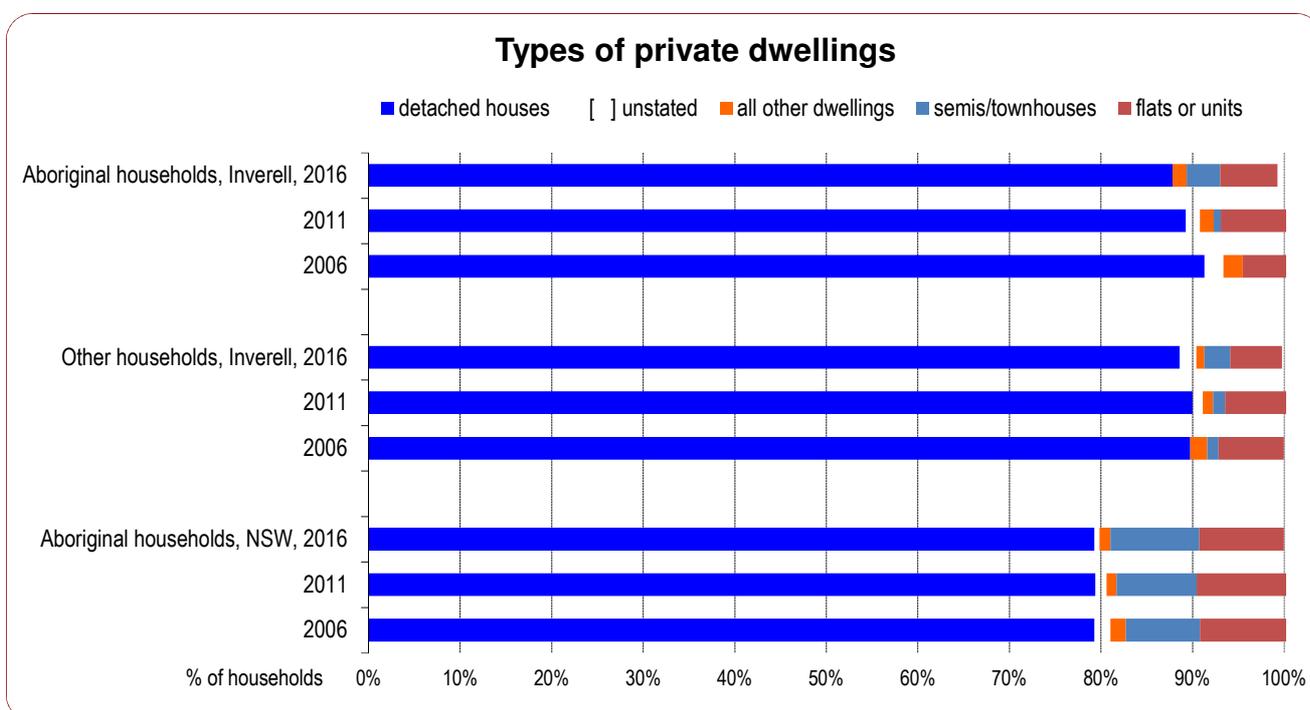

In 2016, most Aboriginal households in Inverell (88%) were living in detached houses, with 6% living in flats or units and 4% living in semis/townhouses.

⌘ Compared with other households in Inverell, 1% more Aboriginal households lived in semis/townhouses.

The proportion in detached houses was 9% higher than that of Aboriginal households in NSW. The proportion in semis/townhouses was 6% lower.

⌘ The proportion of Aboriginal households living in detached houses in Inverell was down by 1% since 2011, and was 3% lower than in 2006.

The proportion of non-Aboriginal households in detached houses in Inverell was down by 1% since 2011 and down by 1% since 2006.

A few Aboriginal people in the LGA were counted living in institutional accommodation on Census night (eg. nursing homes, hospitals, boarding houses, correctional centres, barracks or boarding schools).

⌘ There were 7 Aboriginal people living in institutional accommodation in this LGA in 2011, and 23 in 2006.

In 2016, there were 256 people living in institutional accommodation in Inverell; 1% of the non-Aboriginal population lived in institutions.

⌘ Note: very small numbers are randomly altered by the ABS to protect privacy, so are not precise.

No Aboriginal people were reported living in improvised accommodation (eg. shacks, tents or sleeping out) in the LGA on Census night.

⌘ This was virtually unchanged since 2011.

There were 6 non-Aboriginal people in improvised accommodation in Inverell in 2016.

## Housing costs and tenure

In 2016, Aboriginal households in Inverell most commonly lived in dwellings that were rented (61% of the households). Another 23% lived in dwellings that were being purchased, and 12% in homes that were fully owned.

⌘ The proportion of Aboriginal households that rented, 61%, was 34% higher than for other households here.

The proportion living in rented dwellings was down by 1% since 2011, and was similar to 2006.

The median weekly rent paid by Aboriginal households was \$220. It was \$170 in 2011 and \$115 in 2006.

⌘ The proportion living in dwellings that were being bought (23%) was 7% lower than for Other households.

The proportion living in mortgaged dwellings was up by 2% since 2011; and 3% higher than in 2006.

The median monthly mortgage paid by Aboriginal households in the LGA in 2016 was \$1,073. It was \$1,083 in 2011 and \$802 for 2006.

⌘ The proportion of Aboriginal households in fully owned dwellings (12%) was 27% lower than for non-Aboriginal households.

The proportion in fully owned dwellings was unchanged since 2011; and 1% higher than in 2006.

Among Aboriginal households, the proportion renting in Inverell was 7% higher than the rate in NSW.

27% of Other households in Inverell were renting, 2% higher than in 2011, and 3% higher than in 2006.

The median weekly rent paid by Other households in Inverell was \$210. It was \$160 in 2011 and \$120 in 2006.

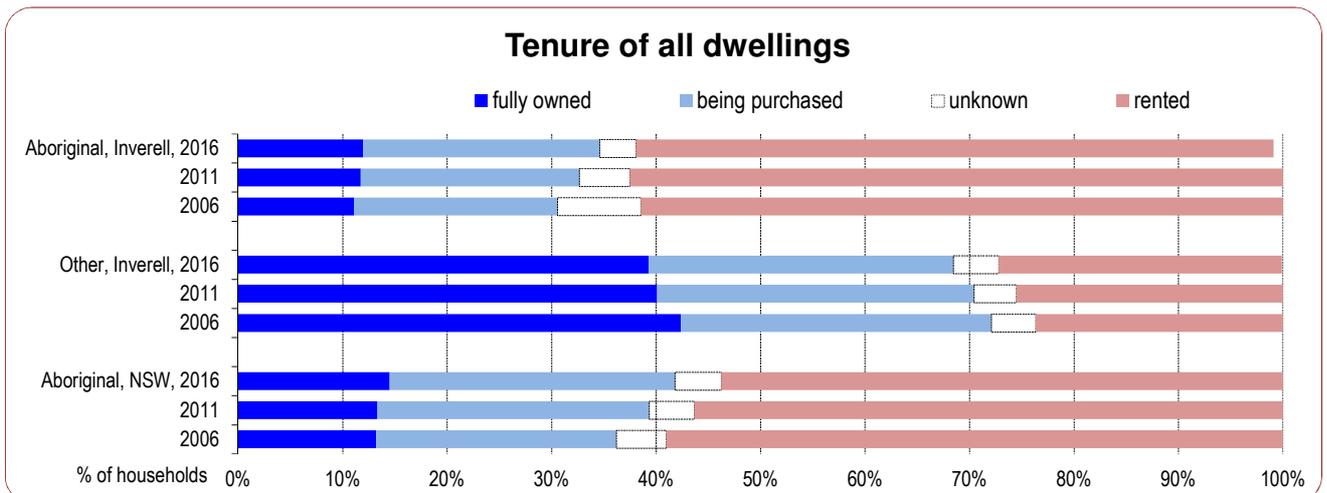

In NSW, 27% of Aboriginal households were home-buyers with a mortgage.

29% of the Other households in Inverell had a mortgage, down by 1% since 2011, and steady since 2006.

The median mortgage paid by Other households in Inverell was \$1,213. It was \$1,200 in 2011 and \$867 in 2006.

The proportion of Aboriginal households in fully owned dwellings in Inverell was 3% less than the average in NSW.

The proportion of Other households in fully owned dwellings in Inverell was down by 1% since 2011, and down by 3% since 2006.

Of 351 Aboriginal rental households, 49% were managed by real estate agents and 29% were managed by public housing.

⌘ 101 Aboriginal households lived in public housing (18% of all households).

This number had risen by 12 since 2011.

Only 2% of the Other households lived in public housing.

The number of Other households in public housing in Inverell had fallen by 15.

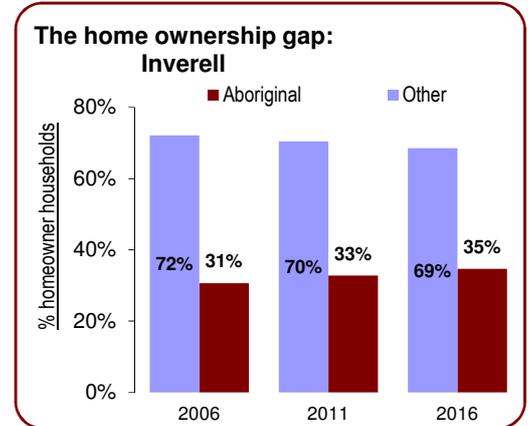

## Housing Indicators

### The home ownership gap

% of households owning/buying their home

Ownership of a home is the main way that most Australians accumulate wealth and ensure secure accommodation.

- ⌘ In 2016, 35% of Aboriginal households in Inverell were either buying or owned their home, compared with 69% of other households, a home ownership gap of -34%.
- ⌘ The gap had closed by 4% since 2011, after having closed by 4% over the previous five years.
- ⌘ The home ownership gap in NSW was -24% and had closed by 4% since 2011. It had closed by 3% between 2006 and 2011.

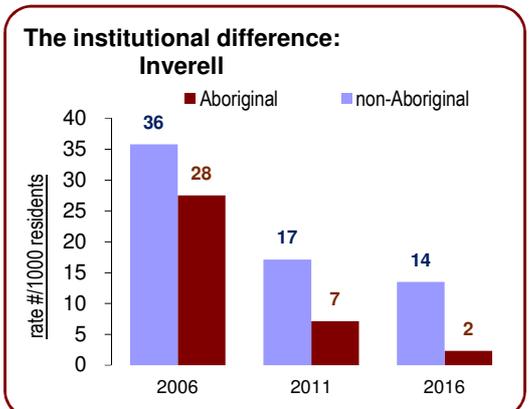

### The institutional difference

rate per 1000 of residents in non-private dwellings

Differences in proportion of people in institutional accommodation will reflect the nature and extent of these institutions in the area – they might include hotels, boarding houses, nursing homes, correctional centres, barracks or hospitals.

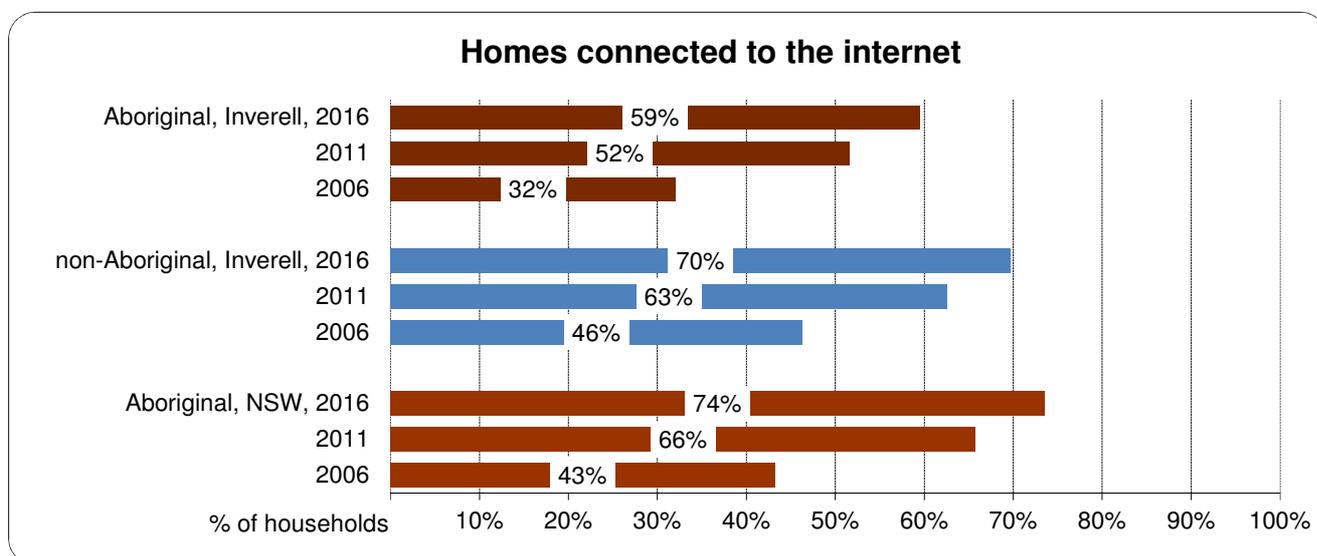

- ⌘ In 2016, 2 in every 1000 Aboriginal residents in Inverell were in institutional housing, compared with 14 per 1000 non-Aboriginal residents. The institutional difference was -11 per 1000.
- ⌘ The institutional gap had increased by 1 per 1000 since 2011, after having increased by 2 per 1000 over the previous five years.
- ⌘ The institutional difference in NSW was 9 per 1000 and had changed little since 2011. It had also changed little between 2006 and 2011.

## Internet @ home

In 2016, 59% of Aboriginal households in Inverell had an internet connection while 35% did not (202 households); 5% did not answer the question.

- ⌘ The proportion of Aboriginal households connected to the internet was 14% lower than in NSW (74% connected), ... and 10% lower than non-Aboriginal households in Inverell (where 70% of homes were connected).
- ⌘ The proportion of Aboriginal households with internet was up by 8% from 52% in 2011. The proportion was up by 8% for Aboriginal households in NSW. It was up by 7% for non-Aboriginal households in this LGA (from 63% in 2011).
- ⌘ In 2006, 32% of Inverell's Aboriginal people had the internet at home. This compared with 43% of Aboriginal people in NSW and 46% of non-Aboriginal people in this LGA.

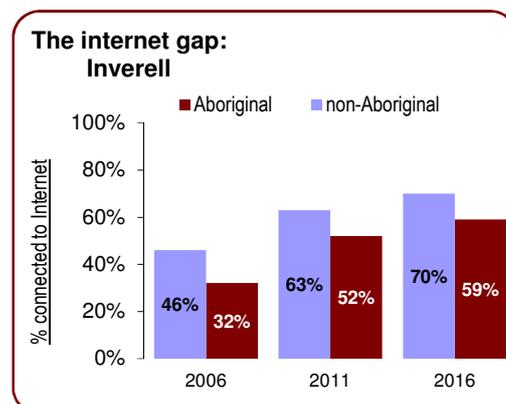

## The internet gap

% of households with an internet connection

The internet is becoming increasingly important as a source of communication and information, and is becoming an essential service.

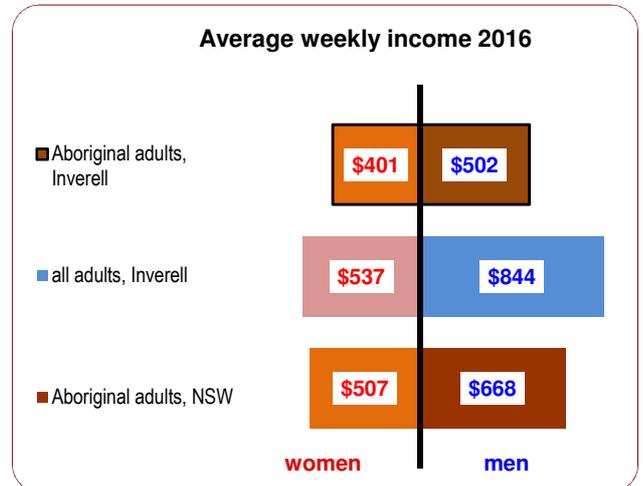

- ⌘ In 2016, 59% of Inverell's Aboriginal households had an internet connection, compared with 70% of other households, an internet gap of -11%.
- ⌘ The internet gap had changed little since 2011, after having closed by 3% over the previous five years.
- ⌘ The internet gap in NSW was 9% and had narrowed by 2% since 2011. It narrowed by 8% between 2006 and 2011.  
The 2006, 2011 and 2016 Censuses had different questions about the internet.

## Personal income

In 2016, the average weekly income of Aboriginal adults (aged 15+) in Inverell was about \$482, which was 22% less than that of Aboriginal adults in NSW (\$621), and 36% less than the average of all adults in the LGA (\$752).

- ⌘ Aboriginal men in Inverell averaged \$502 a week (59% of the overall male average here).  
Aboriginal women averaged \$401 a week (75% of the overall female average).
- ⌘ The average weekly income of Aboriginal men was \$166 lower in the LGA than in NSW.  
The average weekly income of Aboriginal women here was \$105 lower than in NSW.
- ⌘ Half of the Aboriginal adults received under \$388 a week (the median income).

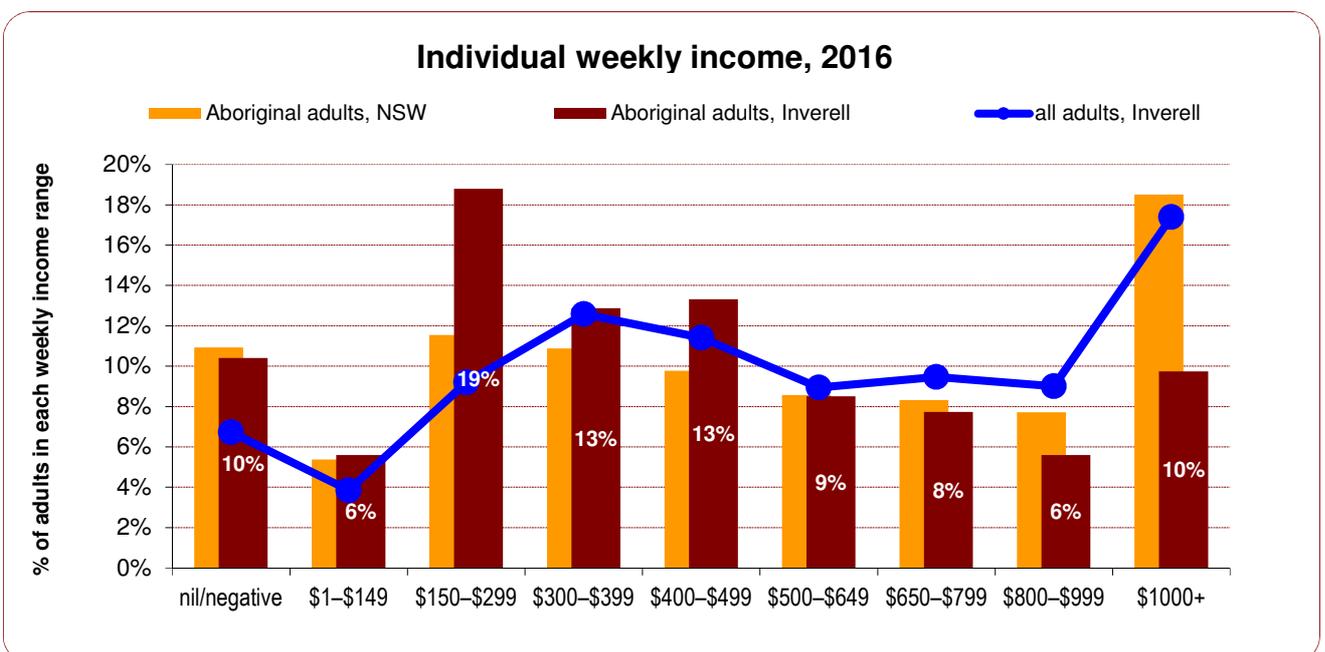

The income distribution pattern among Aboriginal adults in Inverell was different from Aboriginal adults in NSW, and different from all adults in the LGA.

Compared with Aboriginal adults across NSW:

- ⌘ proportionally more Aboriginal adults here were in the \$150–\$299 and \$400–\$499 ranges.
- ⌘ fewer were in the \$1000+ and \$800–\$999 ranges.

Compared with all adults in this LGA:

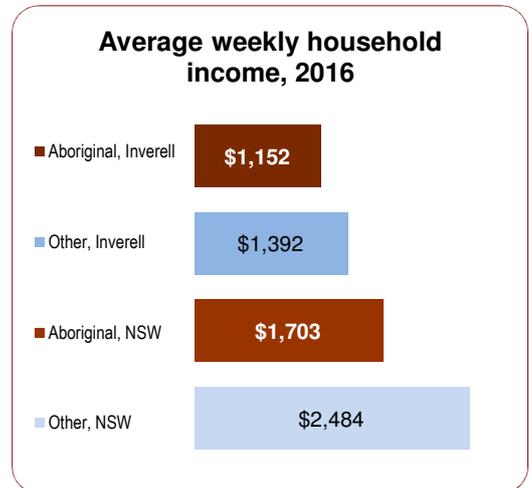

- ⌘ more Aboriginal adults were in the \$150–\$299 and nil/negative ranges.
- ⌘ proportionally fewer were in the \$1000+ and \$800–\$999 range.

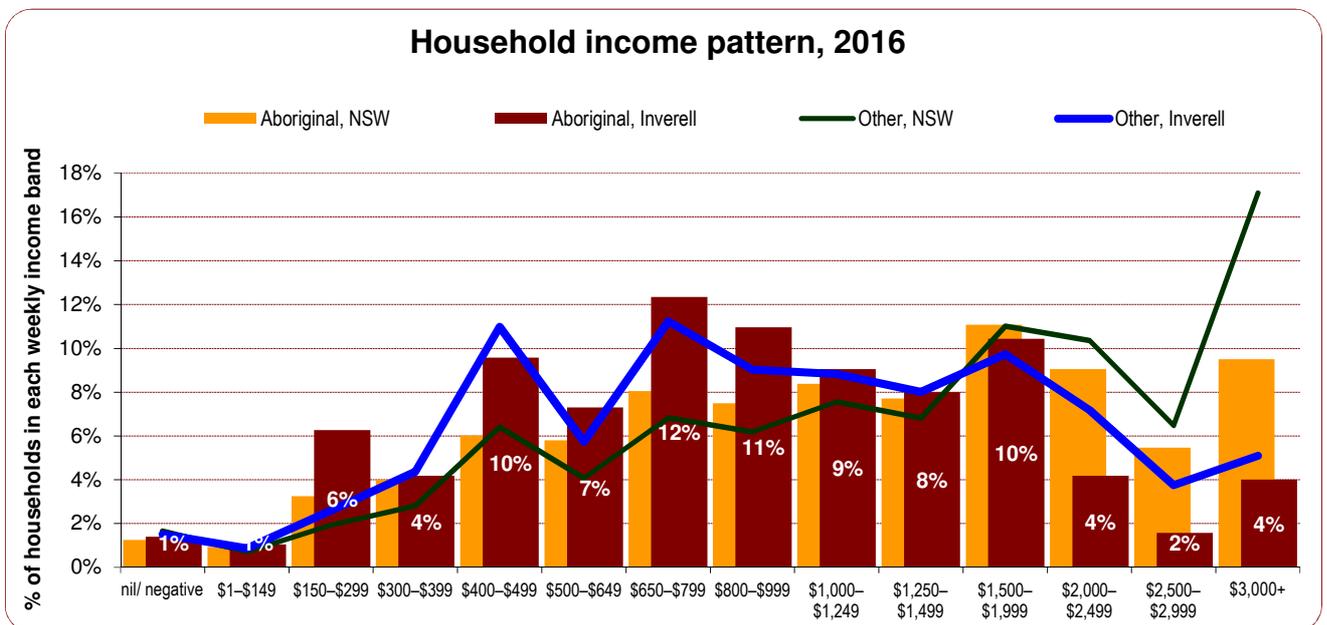

## Household income

In 2016, the average income of Aboriginal households in Inverell was about \$1,152 a week. Household income is not a strong indicator of well-being because the benefit the income gives household members is affected by the household's size.

- ⌘ The average Aboriginal household income in Inverell was 32% less than the average of Aboriginal households in NSW (\$1,703 a week).
- ⌘ It was 17% less than the average of other households in Inverell – \$1,392 a week.
- ⌘ Half the Aboriginal households received less than \$864 a week (the median household income).
- ⌘ Aboriginal households in the LGA had an average size of 3.0 residents, compared with 2.3 for non-Aboriginal households. Household incomes thus had to be spread among more people, compared to other households.

The income distribution pattern among Aboriginal households in Inverell was different from the NSW Aboriginal households, but otherwise partly different from other households in the LGA.

Compared with Aboriginal households across NSW:

- ⌘ more Aboriginal households here were in the \$650–\$799 and \$400–\$499 income ranges, and in the \$800–\$999 and \$150–\$299 ranges.
- ⌘ fewer Aboriginal households were in the \$3,000+ and \$2,000–\$2,499 income ranges, with fewer in the \$2,500–\$2,999 range.

Compared with non-Aboriginal households in this LGA:

- ⌘ more Aboriginal households were in the \$150–\$299 and \$800–\$999 income ranges.
- ⌘ fewer Aboriginal households were in the \$2,000–\$2,499 and \$2,500–\$2,999 income ranges.

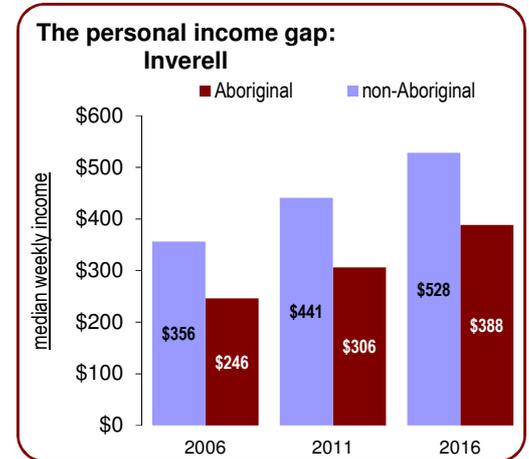

## Income Indicators

### The personal income gap

median weekly income of adults (15+)

Income is a major contributor to well-being. One indicator of disadvantage is a low median income – the amount which fewer than half the people earn.

- ⌘ In 2016, the median income of Aboriginal adults in Inverell (\$388) was 73% that of non-Aboriginal adults in this LGA (\$528). The personal income gap was -27%.
- ⌘ The personal income gap had closed by 4% since 2011, after having changed little over the previous five years.
- ⌘ The personal income gap in NSW was -29% and had narrowed by 5% since 2011. It had narrowed 2% between 2006 and 2011.

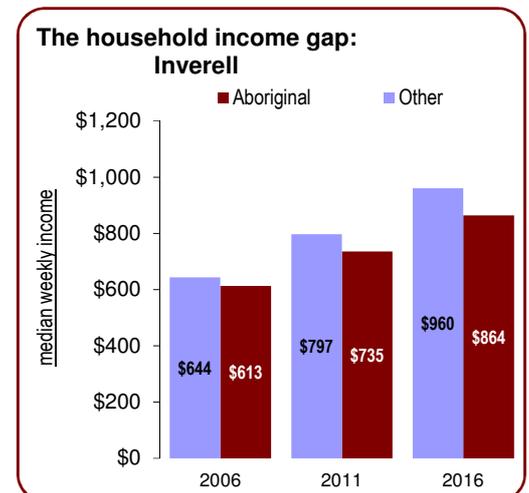

### The household income gap

median weekly income of households

Another indicator of disadvantage is a low median household income; half of all households receive less than this amount. However, Aboriginal households tend to be larger, with more dependents, so household income does not reflect disadvantage as well as individual income does.

- ⌘ In 2016, the median income of Aboriginal households in Inverell was \$864, compared with \$960 for other households in the LGA. This was 10% lower – this is the household income gap.
- ⌘ The household income gap had widened by about 2% since 2011, after having widened by about 3% over the previous five years.
- ⌘ The household income gap in NSW was 19% and had closed by 6% since 2011. It had narrowed by 5% between 2006 and 2011.

# Employment

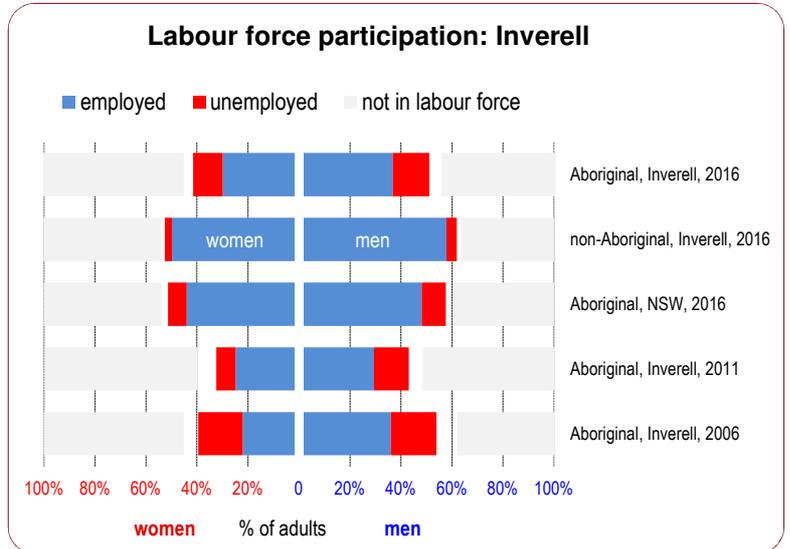

Employment is a prime determinant of a community's income, so it is an important indicator of well-being. In Inverell, 299 out of 894 Aboriginal adults (15+) were employed in 2016 – 33% of adults.

115 Aboriginal adults were unemployed (13%), so the overall workforce participation rate (employed + unemployed) was 46%.

Aboriginal workforce participation was ...

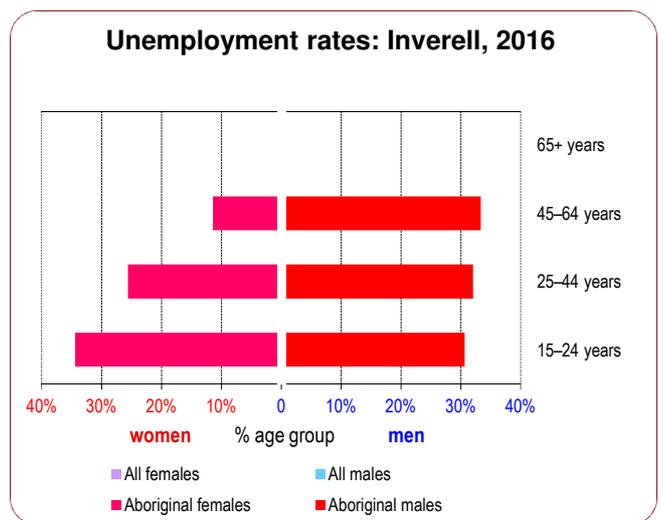

- ⌘ lower for women (42%) than men (50%).
- ⌘ 11% lower than the average for non-Aboriginal adults in the LGA.
- ⌘ 8% lower than the average for Aboriginal adults in NSW.

The Aboriginal workforce participation rate here was 8% higher than in 2011 and similar to 2006.

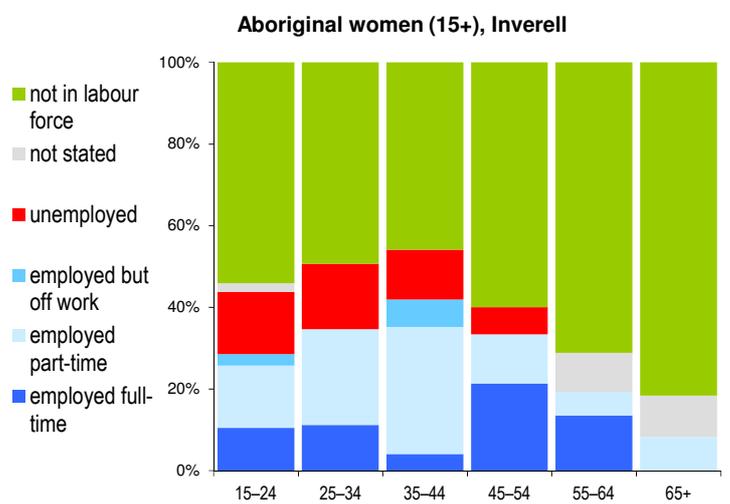

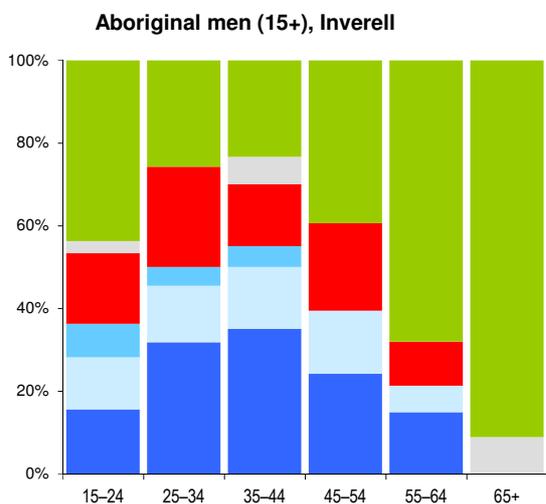

In 2016, the Aboriginal unemployment rate in Inverell was 28%, with 115 people out of work.

- ⌘ This rate was higher than the 6% rate among non-Aboriginal adults in the LGA.
- ⌘ The Aboriginal unemployment rate was 29% for men and 28% for women.
- ⌘ The Aboriginal unemployment rate was steady since 2011, and 10% lower than in 2006.
- ⌘ Aboriginal unemployment was highest among those aged 15–24 years (32%) and 25–44 years (29%). It was lowest among those aged 45–64 years (23%).

These graphs show the employment patterns for men and women, by age, in 2016.

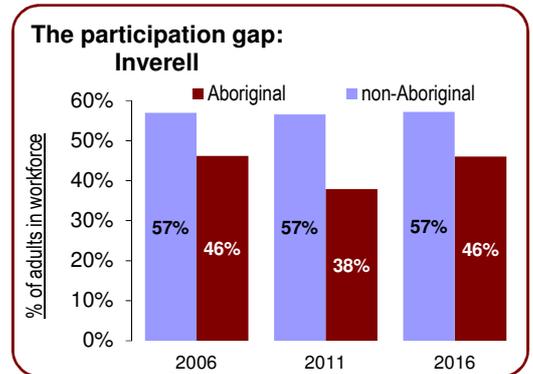

## Workforce Gap Indicators

### The participation gap

% of adults 15+ in labour force

Employment in the workforce is the main way that people gain income and independence. When the proportion of adults in the workforce is low, communities become more dependent on income support, and poverty increases.

- ⌘ In 2016, the proportion of Aboriginal adults (15+) of Inverell in the workforce was 46%; the proportion of non-Aboriginal adults in the workforce was 57%; the participation gap was -11%.
- ⌘ The participation gap had closed by 8% since 2011, after having widened by 8% over the previous five years.
- ⌘ The participation gap in NSW was -8% and had closed by 3% since 2011. It had changed little between 2006 and 2011.

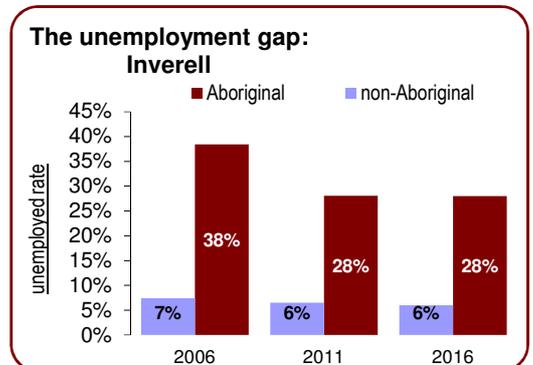

### The unemployment gap

% of unemployed in workforce

High unemployment indicates an absence of jobs in occupations for which local people have had training. High unemployment rates have many damaging effects on those unemployed and their community.

- ⌘ In 2016, 28% of the Aboriginal workforce in Inverell were unemployed; 6% of the non-Aboriginal workforce were unemployed; the unemployment gap was +22%.
- ⌘ The unemployment gap had changed little since 2011, after having closed by 9% over the previous five years.
- ⌘ The unemployment gap between in NSW was +9% and had closed by 2% since 2011. It had narrowed by 3% between 2006 and 2011.

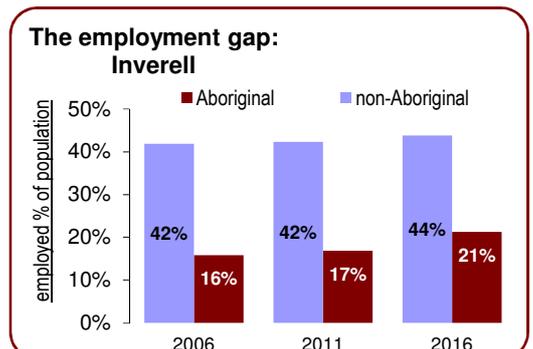

### The employment gap

employed adults as % of population

A useful indicator of the financial strength of a community is the proportion of the total population who are employed. A lower proportion means that, on average, each employed person has more people to support.

- ⌘ In 2016, 21% of the Aboriginal population of Inverell were employed; 44% of the non-Aboriginal workforce were employed; the employment gap was -23%.
- ⌘ The employment gap had closed by 2% since 2011, after having closed by 1% over the previous five years.
- ⌘ The employment gap in NSW was -18% and had closed by 3% since 2011. It had narrowed by 1% between 2006 and 2011.

## Education participation by age

Having high proportions of people in education is a good indicator of positive individual and community development. In Inverell, one in three Aboriginal residents (482 people) was attending an educational institution in 2016.

Aboriginal participation in education varied with age. Here in education were:

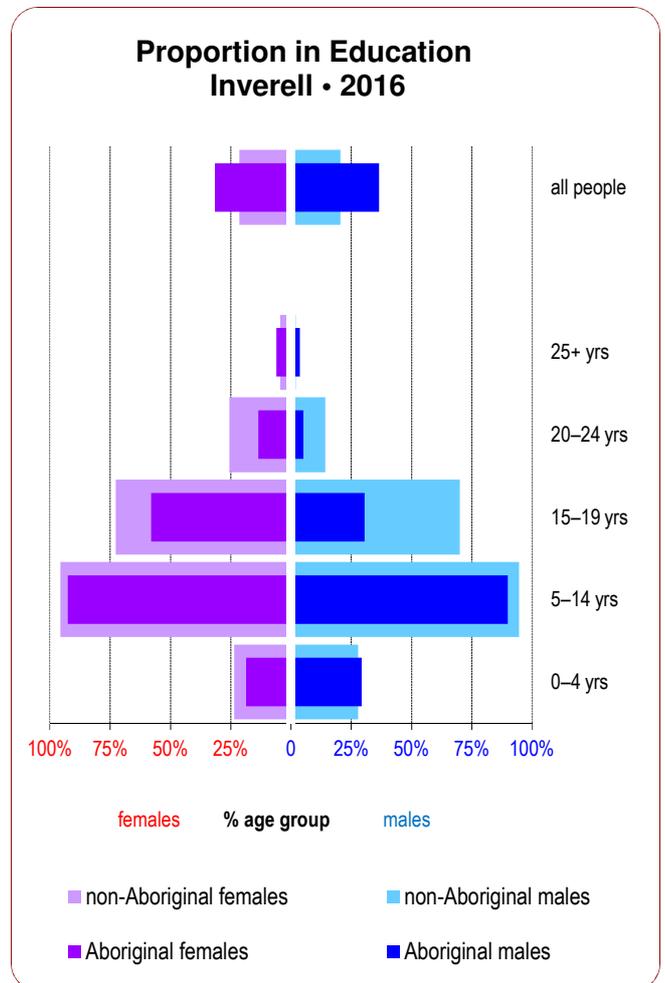

- 23% of the 0–4 year olds
- 94% of the 5–14 year olds
- 55% of the 15–19 year olds
- 11% of the 20–24 year olds
- 5% of those aged 25+

Partly because the Aboriginal population has a much higher proportion of children, their overall rate of participation in education, 34%, is higher than the non-Aboriginal rate in this LGA, 21%. Relative to non-Aboriginal people of the same age, there were, in education:

- similar proportions of 25+ year olds
- similar proportions of 5–14 year olds
- 3% fewer Aboriginal 0–4 year olds
- 9% fewer Aboriginal 20–24 year olds
- 17% fewer Aboriginal 15–19 year olds

Overall, Inverell's Aboriginal population had 111 males per 100 females in education. This varied with age. Of those in education, there were:

- 1.4 males per female among 0–4 year olds
- 1.3 males per female among 5–14 year olds
- 1.0 males per female among 15–19 year olds
- 3.0 females per male among 20–24 year olds
- 2.0 females per male among 25+ year olds

Since 2011, overall participation in education by Aboriginal people in Inverell had increased by 1%, but this masks changes among the age groups.

- The proportion of 0–4 year olds in education was up by 2% since 2011, and up by 9% since 2006.
- The proportion of 5–14 year olds in education was up by 11% since 2011, and up by 8% since 2006.
- The proportion of 15–19 year olds in education was down by 7% since 2011, and up by 17% since 2006.
- The proportion of 20–24 year olds in education was up by 1% since 2011, and up by 3% since 2006.
- The proportion of 25+ year olds in education was down by 1% since 2011, and up by 1% since 2006.

Note: In January 2010, the school leaving age in NSW changed from 15 to 17 years of age.

## Current education

In 2016, some 418 Aboriginal children and teenagers in Inverell were attending school, with 48 in pre-school, 226 in primary school, and 144 in high school.

The number of Aboriginal pre-schoolers was up by 12 or 33% since 2011 and, from 2006, up by 182%.

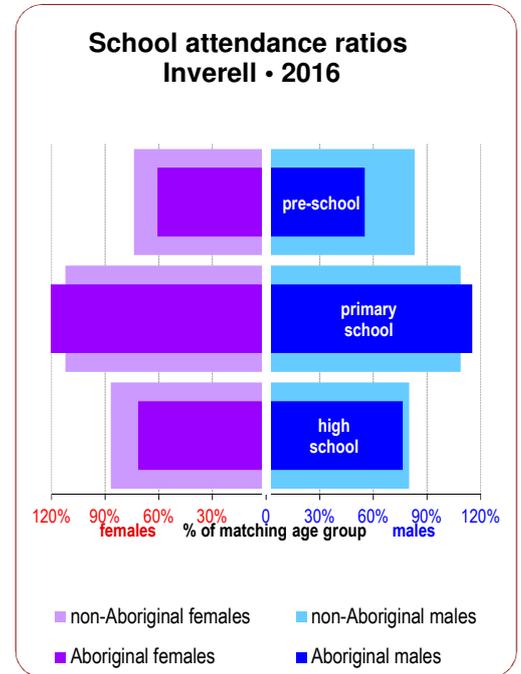

- ⌘ The 48 Aboriginal pre-schoolers equalled 62% of the Aboriginal children aged 4–5.
- ⌘ In NSW, Aboriginal pre-schoolers equalled 72% of the number aged 4–5 years. Non-Aboriginal pre-schoolers in this LGA represented 78% of their age group.

The number of Aboriginal primary students (226) was up by 103 or 84% since 2011; it was 35% higher than in 2006.

- ⌘ Aboriginal primary students were 111% of the number aged 6–11. This is because some primary students were other ages.
- ⌘ This rate was 1% higher than the Aboriginal rate in NSW and similar to for non-Aboriginal children here.

The number of Aboriginal secondary students (144) was up by 6 or 4% since 2011 and 82% higher than 2006.

- ⌘ Aboriginal secondary students were 75% of the Aboriginal children aged 12–17.
- ⌘ This rate was 9% lower than the rate for non-Aboriginal secondary students; it was 6% lower than for Aboriginal students in NSW.

45 Aboriginal residents of Inverell were in post-school education in 2016. This was little changed since 2011, with 22 more than in 2006.

In 2016, there were 11 Aboriginal 15–24 year olds from the LGA enrolled in TAFE (4% of the number this age); 27% attended full-time.

- ⌘ 8% of Aboriginal 15–24 year olds in this LGA attended TAFE, with 35% full-time.
- ⌘ 7% of non-Aboriginal 15–24 year olds in this LGA attended TAFE, with 20% full-time.

A few Aboriginal 15–24 year olds from the LGA attended university or other tertiary education (1% of the number this age); none were full-time.

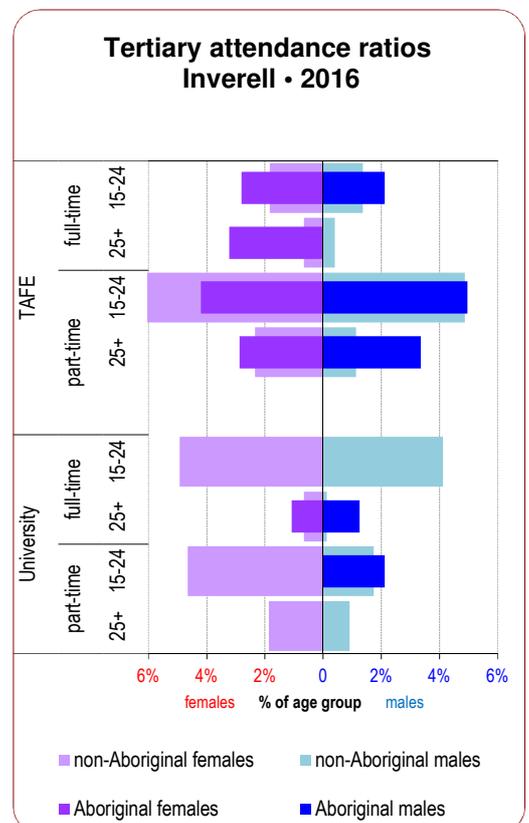

- ⌘ 7% of Aboriginal 15–24 year olds in NSW were at university, with 83% full-time.
- ⌘ 7% of non-Aboriginal 15–24 year olds in this LGA were at university, with 62% full-time.

There were 19 Aboriginal students aged 25+ attending TAFE in 2016 (4% of those aged 25–64), with 26% full-time.

- ⌘ 4% of Aboriginal 25–64 year olds in NSW attended TAFE, with 30% full-time.
- ⌘ 2% of non-Aboriginal 25–64 year olds in this LGA attended TAFE, with 22% full-time.

7 Aboriginal residents aged 25+ were in tertiary education in 2016 (1% of 25–64 year olds), with all full-time.

- ⌘ 3% of Aboriginal 25–64 year olds in NSW were at university, with 43% full-time.
- ⌘ 2% of non-Aboriginal 25–64 year olds in this LGA were at university, with 21% full-time.

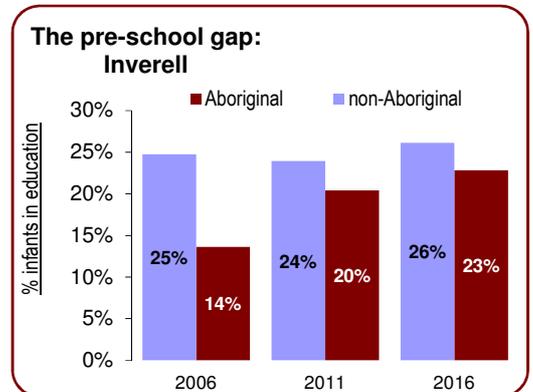

## Education Attendance Indicators

### The pre-school gap

% of infants under 5 in education

Early childhood education is an important contributor to success in school and later education, and makes paid work more feasible for parents.

- ⌘ In 2016, 23% of Aboriginal infants in Inverell were in education, compared with 26% of non-Aboriginal infants. The pre-school gap was -3%.
- ⌘ The pre-school gap had changed little since 2011, after having closed by 8% over the previous five years.
- ⌘ The pre-school rates of Aboriginal and non-Aboriginal infants in NSW were 25% and 25% in 2016, a gap of nil. This gap had narrowed by 2% since 2011.

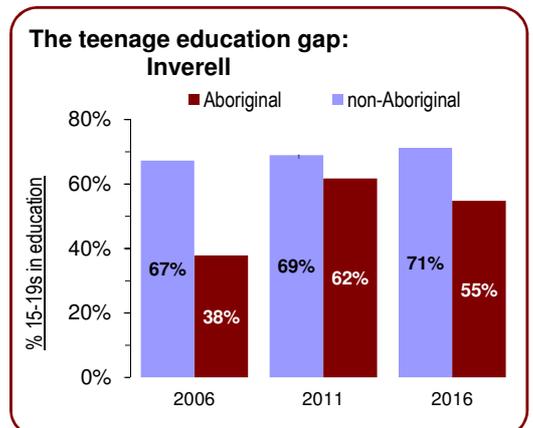

### The teenage education gap

% of 15–19 year-olds in education

Education of older teenagers is vital for their future employment, so low levels of participation in education indicates disadvantage.

- ⌘ In 2016, 55% of Inverell Aboriginal teenagers aged 15–19 were in education, compared with 71% of non-Aboriginal teenagers. The teenage education gap was -17%.
- ⌘ The teenage education gap had widened by 9% since 2011, after having closed by 22% over the previous five years.
- ⌘ The teenage education gap between Aboriginal and non-Aboriginal in NSW was -18% and had narrowed by 1% since 2011. It narrowed by 6% over 2006 to 2011.

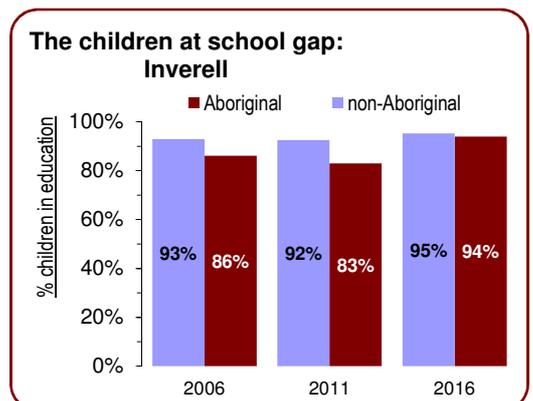

### The children at school gap

% of 5–14 year olds in education

School is compulsory for children up to the age of 17\*. Low schooling rates suggest truancy and/or underage school leavers.

- ⌘ In 2016, 94% of Inverell Aboriginal children aged 5–14 were in education, and 95% of non-Aboriginal of that age were. The schooling gap was -1%.
- ⌘ The schooling gap had closed by 9% since 2011, after having widened by 3% over the previous five years.
- ⌘ The schooling gap in NSW was -3% and had narrowed by 4% since 2011. It changed little over 2006 to 2011.

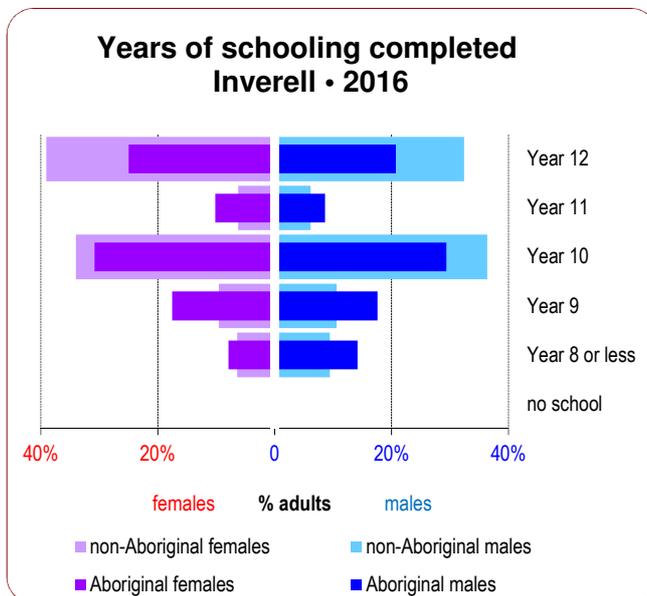

\* In January 2010, the school leaving age in NSW changed from 15 to 17 years of age.

## Schooling levels

In 2016, Aboriginal adults (15+) in Inverell had completed an average of Year 10.0 of school, compared with Year 10.4 for non-Aboriginal adults. In NSW, Aboriginal adults averaged Year 10.3.

- ⌘ 189 Aboriginal adults in the LGA had completed Year 12, which was 2.2 times the number in 2011 and 2.2 times the number in 2006.  
The proportion of Aboriginal adults in the LGA who had completed Year 12 was 23%, which was 13% lower than that of non-Aboriginal adults.  
30% of Aboriginal adults across NSW had completed Year 12.
- ⌘ 62% of Aboriginal adults in the LGA had completed at least Year 10, which was 8% lower than for Aboriginal adults in NSW.
- ⌘ Of the others, 17% had completed Year 9 and 11% had completed Year 8 or lower; 5 adults did not go to school; 8% did not say.

The average Year of school is calculated by multiplying the number who finished each Year's school by the Year, assuming those who replied '8 years or less' averaged 7 years schooling, those who responded 'no school' had 0 years, and excluding those who did not respond.

The average Year when Aboriginal people in Inverell left school had risen by 6 months since 2011, and was up by 4 months since 2006.

Over the decade to 2016, there was an increase of 210% in the number who had finished Year 12 and an increase of 103% in the number who had finished school at Year 11.

For Aboriginal adults in this LGA, average schooling:

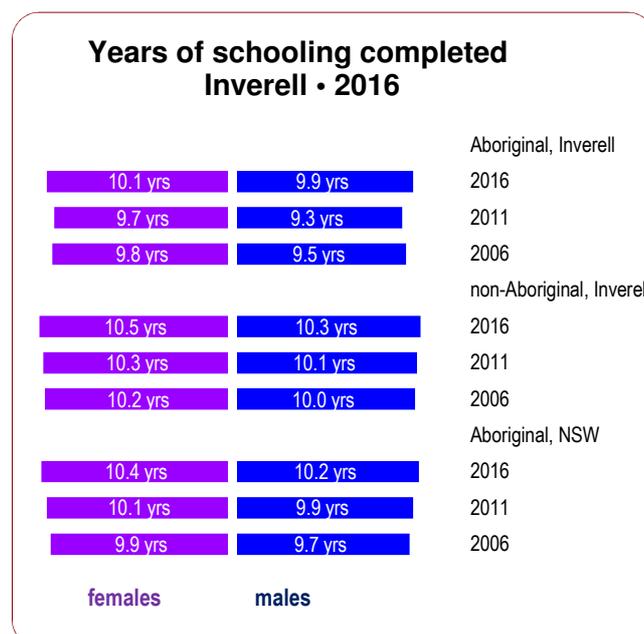

- ⌘ for men had risen by 7 months since 2011, and had risen by 5 months since 2006.
- ⌘ for women had risen by 5 months since 2011, and had risen by 4 months since 2006.

For non-Aboriginal adults, average schooling:

- ⌘ for men had risen by 2 months since 2011, and had risen by 4 months since 2006.
- ⌘ for women had risen by 2 months since 2011, and had risen by 4 months since 2006.

The average schooling of Aboriginal adults in NSW:

- ⌘ for men had risen by 4 months since 2011, and risen by 6 months since 2006.
- ⌘ for women had risen by 4 months since 2011, and risen by 6 months since 2006.

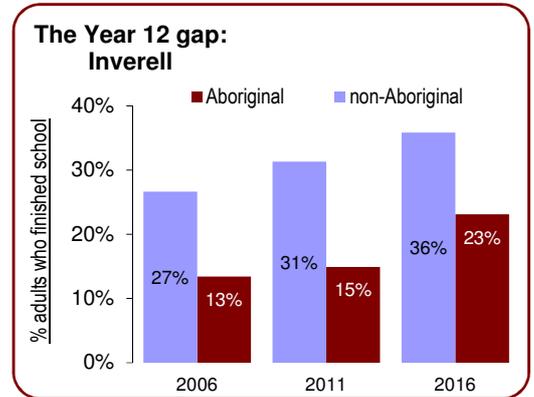

## Education Achievement Indicators

### The Year 12 gap

% of adults (15+) who have left school

The proportion of adults who have completed Year 12 is an important indicator of a community's educational resources. Nationally, over half of all adults (58%) have completed Year 12.

- ⌘ In 2016, 23% of Inverell Aboriginal adults had completed Year 12, compared with 36% of non-Aboriginal adults. The Year 12 gap was -13%.
- ⌘ The Year 12 gap had closed by 4% since 2011, after having widened by 3% over the previous five years.
- ⌘ The Year 12 gap in NSW was -28% and had narrowed by 1% since 2011. It widened by 2% between 2006 and 2011.

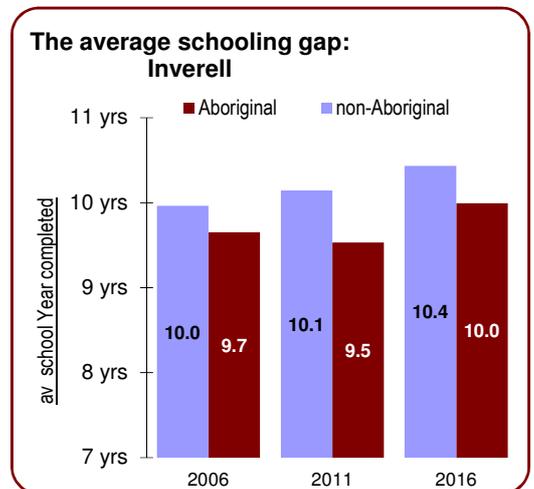

### The average schooling gap

average school Year completed

The average Year of schooling completed by adults is an indicator of a community's educational resources. Nationally, the average is Year 11.

- ⌘ In 2016, Inverell Aboriginal adults had completed an average of Year 10.0 at school, compared with Year 10.4 for non-Aboriginal adults. The average schooling gap was -0.4 years.
- ⌘ The average schooling gap had closing by 2 months since 2011, after having widening by 4 months over the previous five years.
- ⌘ The average schooling gap in NSW was 8 months. It had changed little since 2011, after having changed little between 2006 and 2011.

## Tertiary qualifications

The type and extent of post-school qualifications has a major influence on the earning capacities of a community. In the 2016 Census, 349 Aboriginal adults in Inverell reported having tertiary educational qualifications, which was 39% of the number aged 15+.

By comparison, 45% of Aboriginal adults in NSW and 50% of non-Aboriginal adults in Inverell had a tertiary qualification.

27 Aboriginal adults in the LGA had a degree or higher qualification (3%), with a few having a postgraduate degree.

- ⌘ In NSW, 7% of the Aboriginal residents had a degree or higher qualification.
- ⌘ 10% of the non-Aboriginal residents of Inverell had a degree or more.

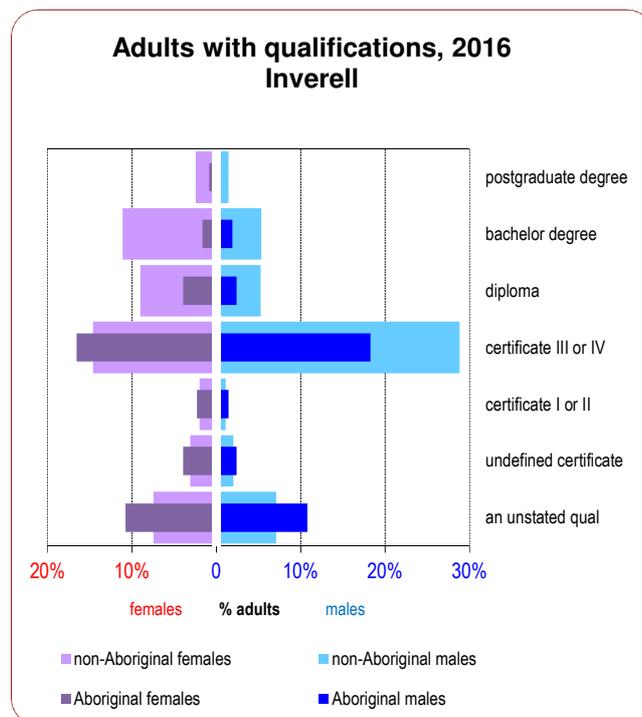

The most common highest qualification held by Aboriginal adults here were:

- certificate III or IV, held by 151 people (17%);
- an unstated qual, by 98 people (11%);
- undefined certificate, by 29 people (3%).

While the number of Aboriginal adults in Inverell rose by 38% from 2011 to 2016, the number with qualifications rose by 49%. There were:

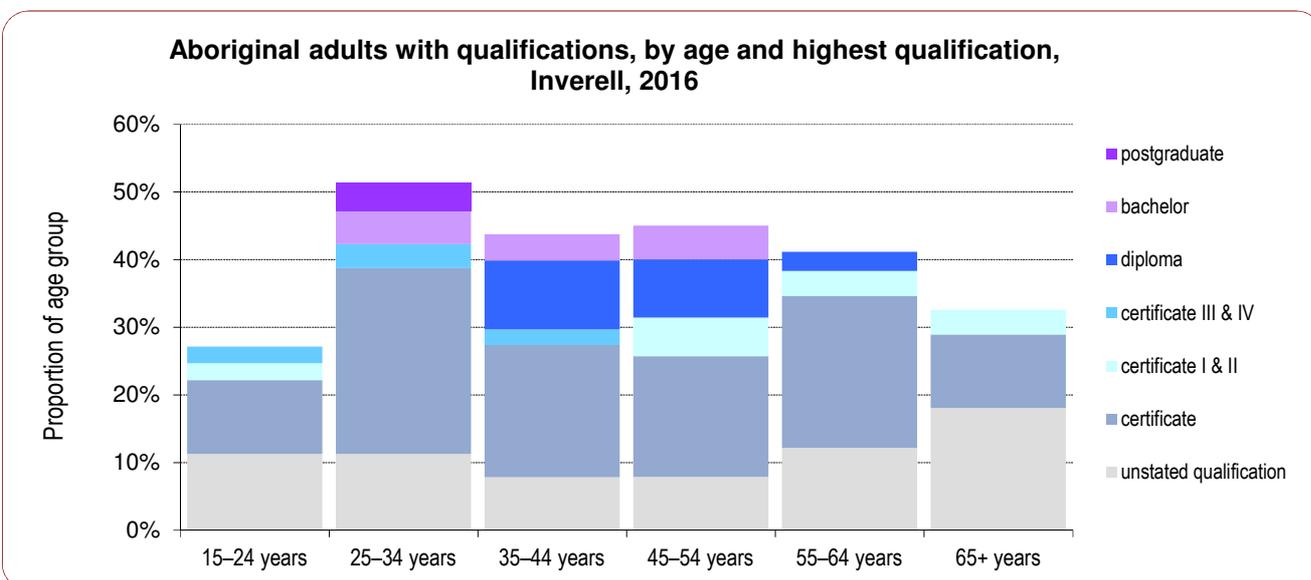

- 85 more with a certificate III or IV;
- 21 more with a undefined certificate;
- 11 more with a diploma.

In the decade from 2006, the number of Aboriginal adults in the LGA with qualifications increased by 115%, while the adult population increased by 96%. There were 112 more with a certificate III or IV and 22 more with a undefined certificate qualification.

In this decade, the number of Aboriginal adults in NSW with qualifications increased by 99%. There were 204% more with a diploma and 200% more with a postgraduate degree.

The chart below shows how the level of qualifications varies with age. Here, Aboriginal people aged 25–34 years had the most higher qualifications, then people aged 45–54 years and 35–44 years.

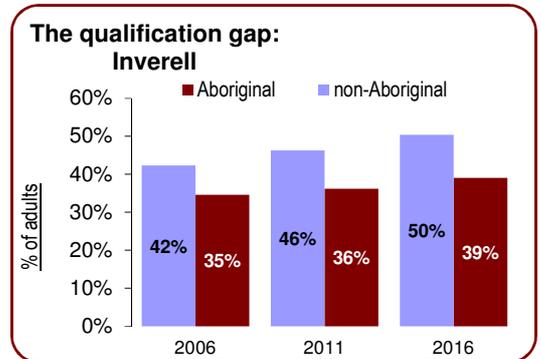

## Higher Education Indicators

### The qualification gap

% of adults 15+ with a post-school qualification

Tertiary and further education is becoming essential for many occupations, so the proportion of adults with post-school qualifications is a broad indicator of a community's earning capacity.

- ⌘ In 2016, 39% of Inverell Aboriginal adults aged 15+ had a post-school qualification, compared with 50% of non-Aboriginal adults. The qualification gap was -11%.
- ⌘ The qualification gap had widened by 1% since 2011, after having widened by 2% over the previous five years.
- ⌘ The qualification gap between Aboriginal and non-Aboriginal adults in NSW was -14% and had narrowed by 1% since 2011. It widened by 1% over 2006 to 2011.

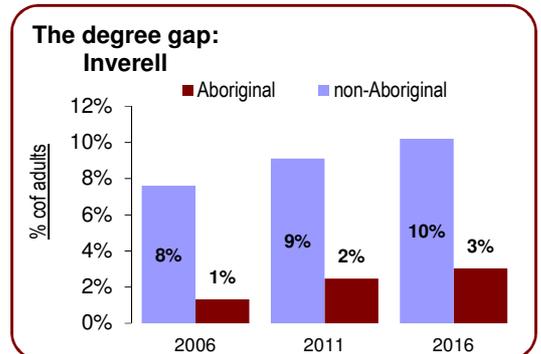

### The degree gap

% of adults 15+ with a degree or higher qualification

Most higher skilled and better paid jobs require a university degree or equivalent for entry, so the proportion of adults with a degree or higher indicates the community's capacity to gain these jobs.

- ⌘ In 2016, 3% of Inverell Aboriginal adults aged 15+ had a degree or higher qualification, compared with 10% of non-Aboriginal adults. The degree education gap was -7%.
- ⌘ The degree gap had changed little since 2011, after having widened by 1% over the previous five years.
- ⌘ The degree gap between Aboriginal and non-Aboriginal adults in NSW was -19% and had widened by 3% since 2011. It widened by 3% over 2006 to 2011.

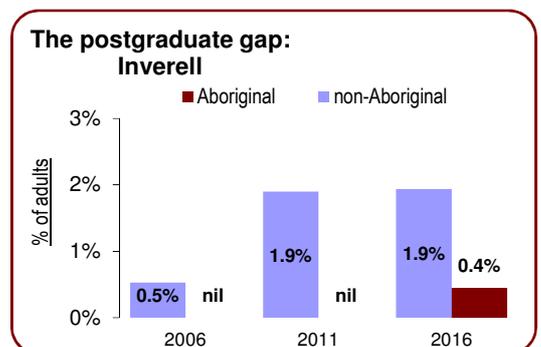

### The postgraduate gap

% of adults 15+ with a postgraduate qualification

Increasingly, getting promoted in many industries requires a post-graduate qualification, but the number of Aboriginal people with post-graduate degrees has been low.

- ⌘ In 2016, 0.4% of Inverell Aboriginal adults aged 15+ had a post-graduate qualification, compared with 1.9% of non-Aboriginal adults. The postgraduate gap was -1.5%.
- ⌘ The postgraduate gap had not applied in 2011 when there were no Aboriginal adults so qualified, after there being no Aboriginal adults so qualified in 2006.
- ⌘ The postgraduate gap between Aboriginal and non-Aboriginal adults in NSW was -6.2% and had widened by 1.3% since 2011. It widened by 2.1% over 2006 to 2011.

## Disability levels

In 2016 in Inverell, 115 Aboriginal residents had a long-term severe disability; 8.2% of the population. Among all Inverell's residents, 6.5% reported a disability.

People with a long-term severe disability are those needing help or assistance with self-care, mobility or communication, because of a disability, long-term health condition or old age. This data compares Aboriginal people with the total population.

- ⌘ Disability rates tend to rise with age. In 2016, they peaked among Aboriginal 65+ year olds (21%) and 55–64 year olds (18%).  
Among younger Aboriginal residents, the disability rate was highest among 5–14 year olds at 7% and 25–34 year olds at 6%.

Because Aboriginal communities tend to have fewer people in the oldest age groups where disability rates are much higher, the overall disability rate can be lower than in non-Aboriginal communities. This can mask much higher rates in some age groups.

- ⌘ In this LGA, the overall Aboriginal disability rate was 1.2 times that in the overall population: 8.2% compared with 6.5%.

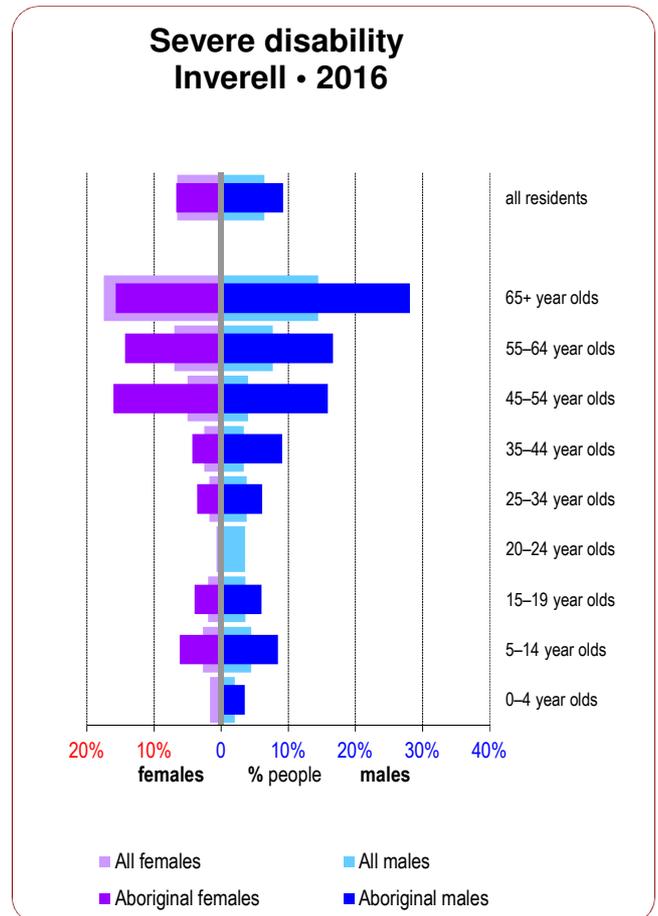

Among 45–54 year olds, the Aboriginal disability rate (13%) was 2.8 times the overall rate (4.7%);

Among 55–64 year olds, the Aboriginal disability rate (18%) was 2.5 times that of all residents (7.2%).

- ⌘ Aboriginal disability rates were higher for men than women: 9.3% to 6.7%. Among all residents, they were similar for men and women: 6.5% to 6.5%.

There were 1.1 females per male among 45–54 year olds with a disability, and 1.1 males per female among 65+ year olds.

On the other hand, there were 1.8 males per female among 5–14 year olds with a disability. There were only males among those with a disability aged 0–4.

From 2011 to 2016, the overall disability rate among Aboriginal residents of the LGA rose from 6.6% to 8.2%.

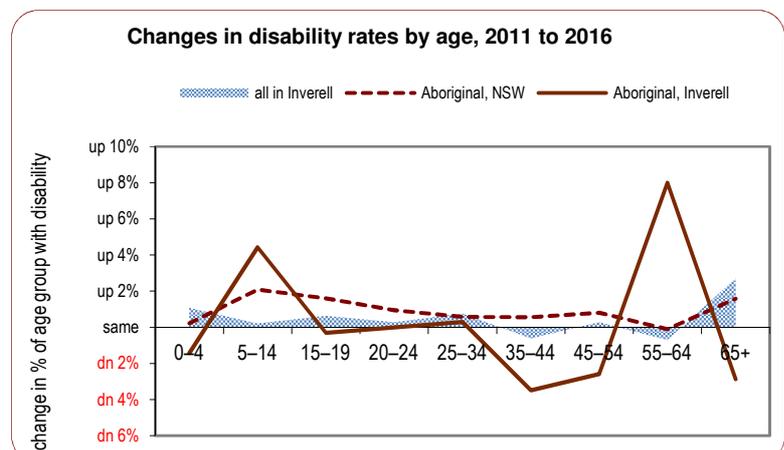

Among Aboriginal people in NSW, the disability rate rose from 6.2% to 7.6%.

Among all Inverell residents, the disability rate rose 0.9%, and was 6.5% in 2016.

In the LGA, the greatest change in the Aboriginal disability rate was the increase among those aged 55–64, from 10.0% in 2011 to 18.0% in 2016.

Disability rates also rose among 5–14 year olds and 25–34 year olds.

Disability rates fell most among those aged 35–44 years.

## Disability care given

In the 2016 Census, 127 Aboriginal adults in Inverell, 14% of the adult population, reported that they gave assistance to a person with a severe or profound disability. There were at that time 115 Aboriginal residents who reported a severe or profound disability.

⌘ Across the age groups, the proportion of Aboriginal people caring for a person with a disability ranged from 22% of 35–44 year olds and 16% of 65+ year olds to 7% of 15–19 year olds.

⌘ Carers are more often women than men. In this Aboriginal community, there were 1.8 females per male among carers.

Female carers were most common among 35–44 year olds with 3.6 females per male caring, and among 55–64 year olds, with 2.2 females per male caring.

No age group had more male than female carers.

⌘ The 14% carer rate among Aboriginal residents was similar to the average for all adults in the LGA (13%).

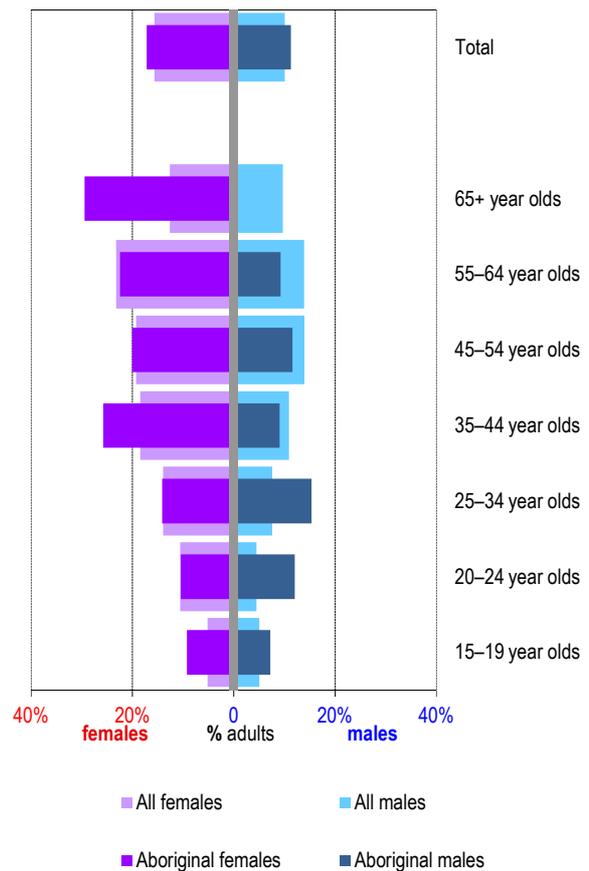

Among 25–34 year olds, the proportion of Aboriginal carers was 1.5 times the average.

Among 35–44 year olds, the proportion of Aboriginal carers was 1.4 times the average.

⌘ In NSW, 15% of Aboriginal adults were caring for a person with a disability.

Relative to the NSW Aboriginal community, there were 3% more carers among Aboriginal people aged 35–44 here. There were 5% fewer carers here among those aged 55–64.

**Carers • Inverell • 2016**

From 2011 to 2016, overall caring rates among Aboriginal adults in the LGA changed only slightly from 15%.

⌘ Among Aboriginal adults in NSW, caring rates rose by 1%.

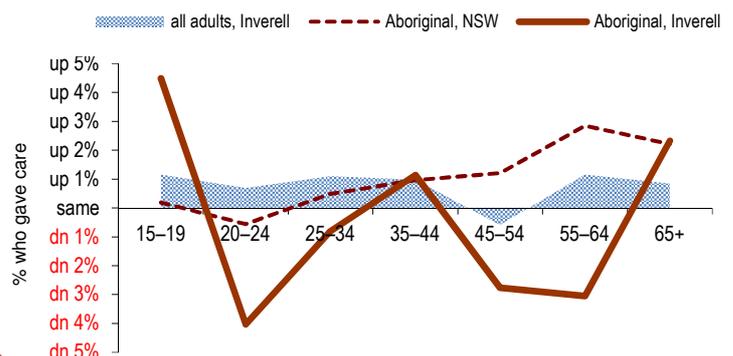

Among all Inverell's adults, caring rates rose by 1%.

⌘ In the LGA, Aboriginal caring rates fell fastest among 20–24 year olds, down 4% (from 15% in 2011 to 10% in 2016).

Caring rates also fell 3% among 55–64 year olds and 3% for 45–54 year olds.

Caring rates rose most among 15–19 year olds, up by 4%, and among those aged 65+, up by 2%.

**Changes in caring rates, by age, 2011–2016**

## Disability Indicators

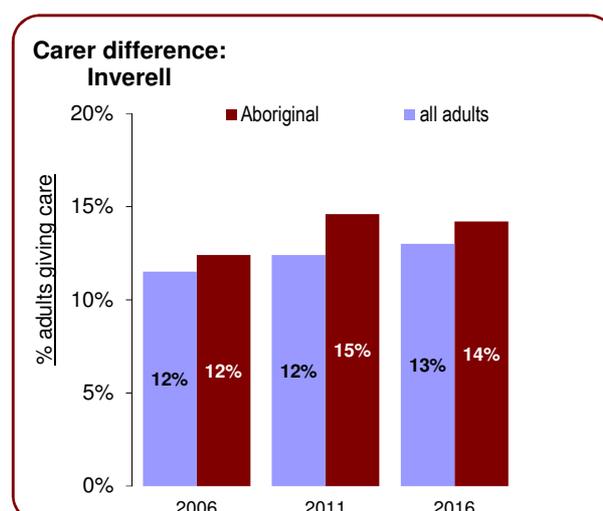

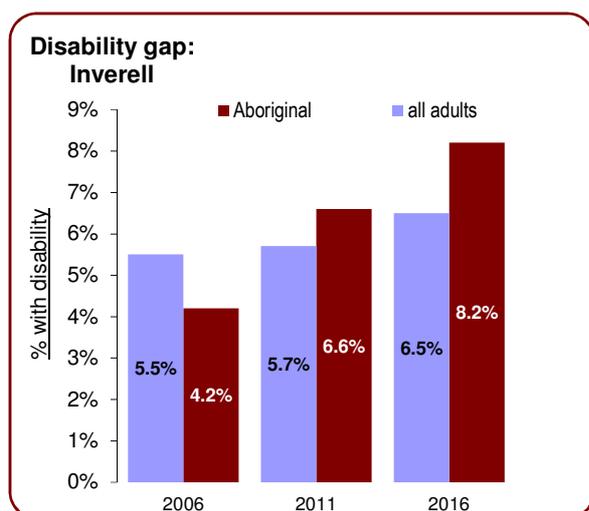

### The disability gap

% of people with a severe, long-term disability

Disability rates provide a useful indicator of a community's health and need for support services. Nationally, disability rates among Aboriginal people are about 25% higher than overall rates, across most age groups.

- ⌘ In 2016, 8.2% of Inverell's Aboriginal residents had a severe, long-term disability, compared with 6.5% for all residents. The disability gap was +1.7%. The Aboriginal disability rate was 1.3 times the overall rate.
- ⌘ The disability gap in Inverell had widened by 0.8% since 2011, after having reversed over the previous five years.
- ⌘ The disability gap in NSW was +2.2% and had widened by 0.9% since 2011.

In the Census, people with disabilities are those with a severe or profound disability lasting more than six months, who require help with daily activities, self-care or communicating.

### The carer difference

% of adults caring for a person with a disability

Aboriginal people have higher disability rates and larger families, so often have proportionally more carers than the general population.

- ⌘ In 2016, 14% of Inverell's Aboriginal adults (aged 15+) provided assistance to a person with a severe disability, compared with 13% of all adults. The carer difference was +1% (rounded).
- ⌘ The carer difference in Inverell had closed by 1% since 2011, after having widened by 1% over the previous five years.
- ⌘ The carer difference in NSW was +3% in 2016. This had widened by 0.7% since 2011.
