Prepared for Aboriginal Affairs NSW

Lithgow is the Local Government Area of Lithgow at the 2016 Census.

Preface

This report uses data from the Census, held every five years by the Australian Bureau of Statistics (ABS), to paint a profile of the Aboriginal population of Lithgow as it was in August 2016, and show how it had changed over the previous decade.

- Language in this report** Where it is used in this Portrait, the term 'Aboriginal' is used to describe the many nations, language groups and clans in Lithgow, including those from the Torres Strait. This usage recognises that Aboriginal people are the original inhabitants of NSW.
- Who is included?** The people described in this Portrait were the usual residents of Lithgow in 2016, even if they completed the Census away from home. People who were visiting Lithgow on Census night are not included.
- Who are Aboriginal?** Aboriginal people, in this Portrait, means all people who, in completing the Census, responded that they had Aboriginal or Torres Strait Islander origins, or both. Non-Aboriginal people are those who said they did not have these origins. Note: the Census question asks people about their origins; it does not ask how they identify in their daily lives.
- Are all Aboriginal people counted?** Not all Aboriginal people completed the Census and identified their origins: 5.7% of Lithgow's Census respondents said they had Aboriginal origins, but another 9.3% did not answer this question. The ABS estimates that the net undercount rate for Aboriginal and Torres Strait Islander peoples was 17.5% in 2016 (equivalent to 137,750 persons nationally). This is slightly higher than 2011 (17.2%). This means that, on average, the Aboriginal population was about a fifth larger than counted. However, despite such omissions, the Census is a vital source of information about Aboriginal Australians.
- National trends** Nationally, the number of people with Aboriginal origins counted in the Census rose by a fifth (21%) between 2011 and 2016. Almost three-quarters of the increase was from births; the rest was caused by more people identifying Aboriginal origins than previously.
- Sources of data** The data for this report are drawn from the Aboriginal and Torres Strait Islander Peoples (Indigenous) Profiles and Community Profiles published by the ABS from the 2006, 2011 and 2016 Censuses. Data in this portrait for 2011 and 2006 censuses have been produced using the 2016 boundary regardless of changes to previous LGA or other geographical classifications over time.
- Note: difference and changes shown in this Portrait are rounded to the nearest significant figure but are calculated from the unrounded data, so small anomalies are possible when comparing differences. Small Census counts are randomised by the ABS to protect privacy so are not precise; in this Portrait, numbers less than 5 are reported as 'a few'.

Snapshot: Lithgow LGA, 2016

- ⌘ In the 2016 Census, 1,208 of the 21,090 residents (5.7%) counted in Lithgow said that they had Aboriginal or Torres Strait Islander origins, or both. Of these, 96% were Aboriginal.
 - ⌘ Between 2011 and 2016, the counted Aboriginal population rose by 34%, from 900; the overall population of the LGA rose by 5%.
 - ⌘ About 11% of the Aboriginal population were under 5 in 2016. This infant population accounted for two-fifths of the Aboriginal population growth between 2011 and 2016.
- ⌘ The Aboriginal community is significantly younger than the non-Aboriginal population, with a median age of 25 vs 46 years.
 - ⌘ There was a higher proportion under 18 years old: 38% compared with 19%.
 - ⌘ There was a lower proportion aged 65 or more: 7% compared with 23%.
- ⌘ Aboriginal households had an average of 2.9 residents, which was larger than non-Aboriginal households (2.3) in the LGA.
 - ⌘ One in three Aboriginal households were couples with children.
 - ⌘ One in four were one parent families.
 - ⌘ 19% of the Aboriginal households were single persons (vs 34% of non-Aboriginal households).
- ⌘ Aboriginal households most commonly lived in rented dwellings (41%), with 31% in mortgaged and 23% in fully owned dwellings.
 - ⌘ In all, 54% of Aboriginal households in Lithgow were home-owners (with or without a mortgage), which was up by 4% since 2011.
- ⌘ The median income of Aboriginal adults in Lithgow was about \$443 a week, which was 86% that of all adults here (\$517).
 - ⌘ The median income gap had closed by 5% since 2011.
- ⌘ 48% of Aboriginal adults were in the labour force, compared with 53% of non-Aboriginal adults.
 - ⌘ 15% of the Aboriginal workforce were unemployed, compared with 7% of the non-Aboriginal workforce.
- ⌘ Three in ten Aboriginal residents (385 people) were attending an educational institution.
 - ⌘ 173 Aboriginal people had completed Year 12, which was 97% more than in 2011 and 260% more than in 2006.
 - ⌘ Compared with non-Aboriginal residents of the same age, there were:
 - 12% fewer Aboriginal people aged 20–24 year olds in education;
 - 4% fewer Aboriginal people aged 15–19 year olds in education.
 - ⌘ 50% of Aboriginal adults had some type of post-school qualification, compared with 59% of non-Aboriginal adults in the LGA (4% had a degree or higher, compared with 25%).
- ⌘ 101 Aboriginal people (8.4% of the Aboriginal population) reported that they had a severe or profound disability.
 - ⌘ Aboriginal people had higher disability rates than average in most age groups.
 - the disability rate for Aboriginal people aged 35–44 year olds was 3 times the average for this age group in Lithgow.
 - for 0–4 year olds, the Aboriginal rate was 3 times the average in the LGA.
 - ⌘ 14% of Aboriginal adults (aged 15+) gave assistance to a person with a severe disability.
- ⌘ 71% of Lithgow's Aboriginal households had an internet connection, which was 4% higher than in 2011.

Tracking changes in Lithgow

In the table below, some indicators of community structure and well-being are calculated for Aboriginal people in Lithgow. The difference or gap between Aboriginal and non-Aboriginal people in Lithgow is shown for 2016. Changes in the Aboriginal rates are tracked over the past five years and decade.

Indicator	Lithgow LGA, 2016			Change in Aboriginal rate	
	Aboriginal	non-Aboriginal	Gap in 2016	last 5 years 2011–2016	last decade 2006–2016
home ownership % of households owning/buying their home	54%	72%	-19%	up 4%	up 4%
personal income* median weekly income of adults (15+)	\$443	\$517	-14%	up 20%	up 82%
household income median weekly income of households	\$1,031	\$980	+5%	up 7%	up 66%
workforce participation % of adults 15+ in labour force	48%	53%	-4%	up 3%	up 8%
unemployment % of unemployed in workforce	15%	7%	+8%	dn 3%	dn 14%
employment employed adults as % of population	28%	41%	-14%	up 4%	up 8%
pre-school % of infants under 5 in education	22%	24%	-2%	dn 1%	up 6%
teenage education % of 15–19 year-olds in education	67%	71%	-4%	up 17%	up 7%
children at school % of 5–14 year olds in education	91%	94%	-3%	up 4%	up 3%
Year 12 completion % of adults (15+) who have left school	23%	32%	-10%	up 6%	up 11%
average schooling average school Year completed	10.1 yrs	10.4 yrs	-0.3 yrs	0.2 yrs	0.3 yrs
tertiary qualifications % of adults 15+ with a post-school qualification	50%	53%	-3%	up 7%	up 6%
degree % of adults 15+ with a degree or higher qualification	4%	10%	-5%	same	up 2%
postgrad % of adults 15+ with a postgraduate qualification	1%	3%	-2%	dn 0%	up 1%
disability* % of people with a severe, long-term disability	8.4%	6.6%	+1.8%	up 2%	up 2%

* Personal income and disability data compare Aboriginal rates with those of the whole population in Lithgow.

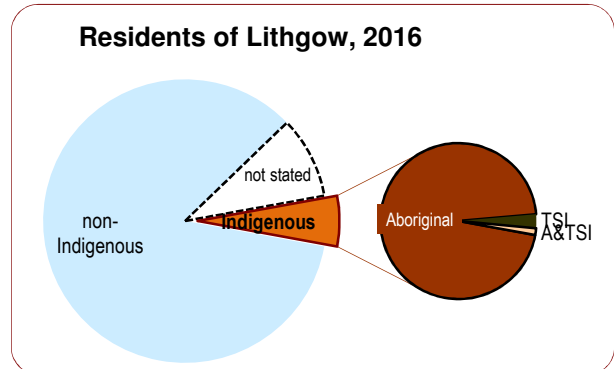

Aboriginal population and growth

In the 2016 Census, Lithgow's Aboriginal population was counted as 1,208 people, of whom 1,158 identified as Aboriginal and 35 as Torres Strait Islander; 17 identified as both Aboriginal and Torres Strait Islander.

- ⌘ Aboriginal people comprised 5.7% of Lithgow's population, compared with 2.9% in NSW. 9.3% of Lithgow people did not say whether they had Aboriginal or Torres Strait Islander origins.

- ⌘ Among the Aboriginal people here, there were 112 males per 100 females. There were 102 males per 100 females among non-Aboriginal people.

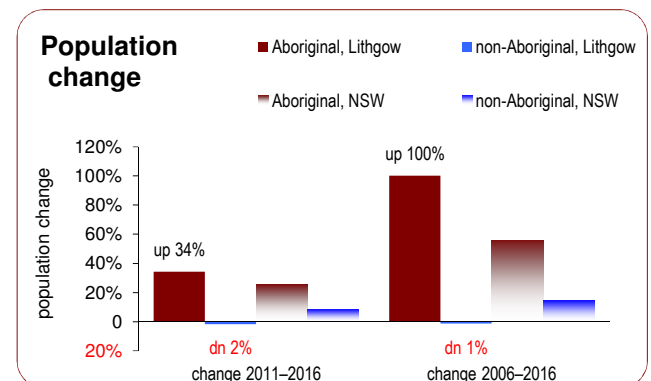

- ⌘ The ABS estimates that the net Census undercount rate nationally for Aboriginal and Torres Strait Islander peoples was 17.5% in 2016.

Between 2011 and 2016, the counted Aboriginal population in Lithgow rose by 34% (by 308) from 900; in total, Lithgow's population rose by 5%.

The number of infants born over the last five years accounted for two-fifths of the Aboriginal population growth between 2011 and 2016.

- ⌘ Between 2006 and 2016, Lithgow's Aboriginal population rose by 100% (from 604 in 2006). Lithgow's non-Aboriginal population fell by 1% over the decade. The Aboriginal population counted in NSW rose by 56% over the decade.

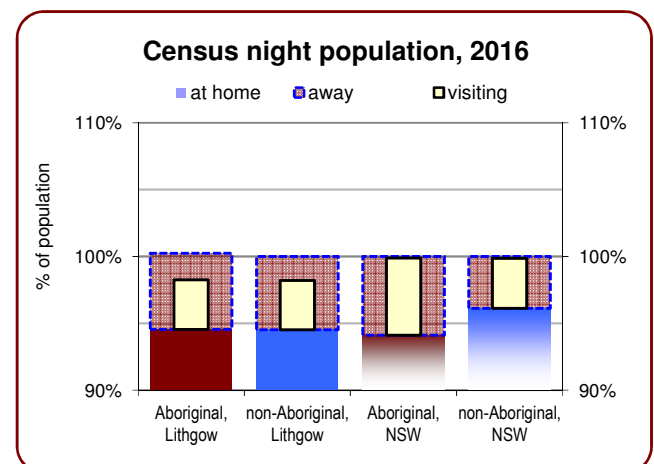

On Census night 2016, 1,142 Aboriginal residents of Lithgow were at home (95%), and 69 were staying away from home (6%). Offsetting those away, there were 45 Aboriginal visitors staying in the LGA that night, equivalent to 4% of the Aboriginal resident population.

- ⌘ There were a few visitors from the same locality (eg. overnighting with neighbours). 84% of the visitors were from elsewhere in NSW.

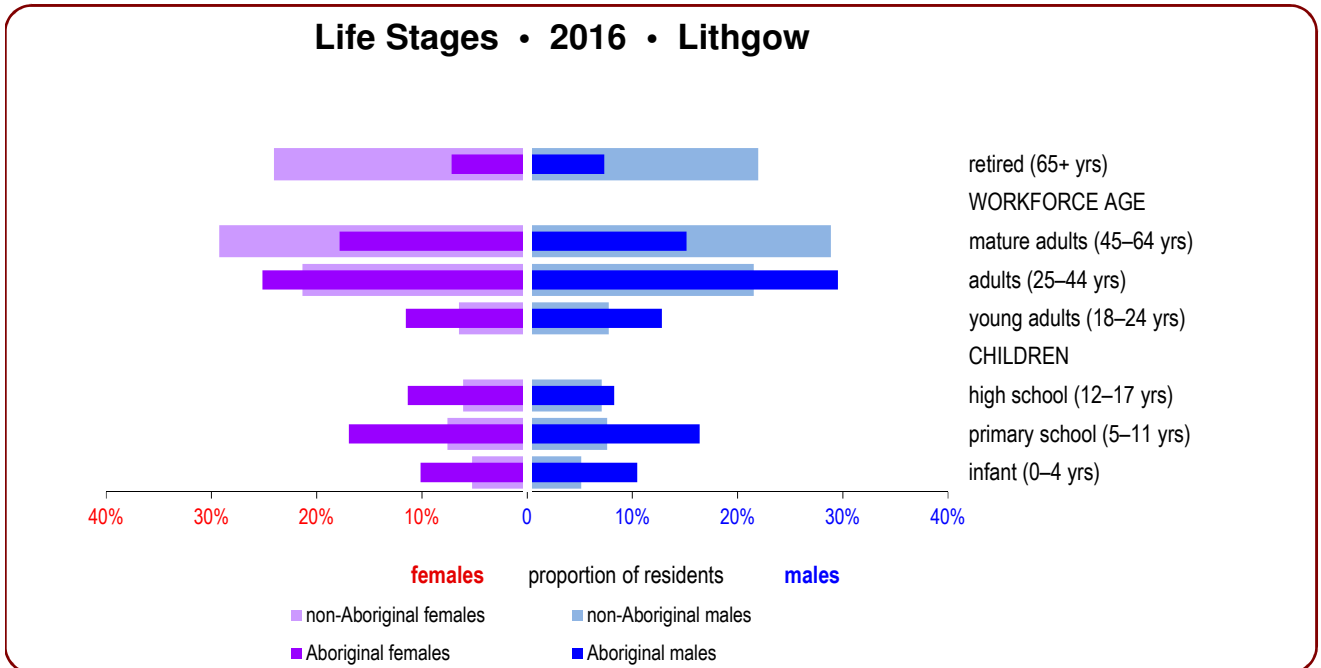

- ⌘ The proportion of Aboriginal residents away from home was 1% higher than in 2011. The proportion away from home was similar to non-Aboriginal residents of this LGA; it was similar to Aboriginal residents of NSW.

- ⌘ There were no more Aboriginal visitors than in 2011, when there were 45, equal to 5% of the Aboriginal population.

Life stages

The Aboriginal population of Lithgow had a similar proportion in the working stage of life (15–64 years) than the non-Aboriginal population, with a higher proportion of children under 15 and a smaller proportion of people aged 65 or older.

In Lithgow's Aboriginal population in 2016:

⌘ 676 people (56% or over five in ten) were adults aged 18–64.

- 148 (or 12%) were aged 18–24
- 323 (or 27%) were aged 25–44
- 205 (or 17%) were aged 45–64

The number aged 18–64 was up 47% from 2011; and up 99% from 2006.

⌘ 455 Aboriginal residents (38% or almost four in ten) were children under 18.

- 131 (or 11%) were under five
- 196 (or 16%) were aged 5–11
- 128 (or 11%) were aged 12–17

The number of children was up 15% since 2011; and up 94% since 2006.

⌘ 85 of Aboriginal residents were aged 65+ years (7% of the total).

The number aged 65+ had risen by 89% since 2011; it was 174% higher than in 2006.

The proportion aged 18–64 among Aboriginal people was 2% lower than for non-Aboriginal (58%).

5% more of the Aboriginal population were adults (25–44 yrs), and 12% fewer were mature adults (45–64 yrs), compared with the non-Aboriginal population of the LGA.

Those aged 18–64 made up 54% of the Aboriginal community in NSW; their number had risen by 29% from 2011.

The proportion of Aboriginal children in Lithgow was 18% higher than the average for non-Aboriginal people.

In NSW, 41% of the Aboriginal community were children under 18; the number was up 18% since 2011.

23% of non-Aboriginal people in Lithgow were aged 65+.

Across NSW, 5% of Aboriginal people were aged 65+; their number had risen by 58% since 2011, and by 136% since 2006.

Age profile

The Aboriginal population of Lithgow has an age profile that is significantly younger than the non-Aboriginal population, with a lower median age (25 vs 46 years).

For Lithgow's Aboriginal population in 2016:

- ⌘ The average age was 29 years in 2016, with half the population aged under 25 years (the median age).
The largest 5-year age groups were 5–9 years (11%), 0–4 years (11%) and 10–14 years (10%).
- ⌘ The average age was 2 years higher than in 2011 and similar to in 2006.

Proportionally, the biggest increases since 2011 were of 40–44 year olds (107% more), 60–64 year olds (100% more) and 25–29 year olds (89% more).

- ⌘ 85 Aboriginal people (7.0%) were aged 65+ years, compared with 23% of non-Aboriginal residents.
- ⌘ There were noticeably more males than females aged 25–29 years, 30–34 years and 20–24 years.

The average age was 15 years younger than for the non-Aboriginal residents; the median age was 21 years younger.

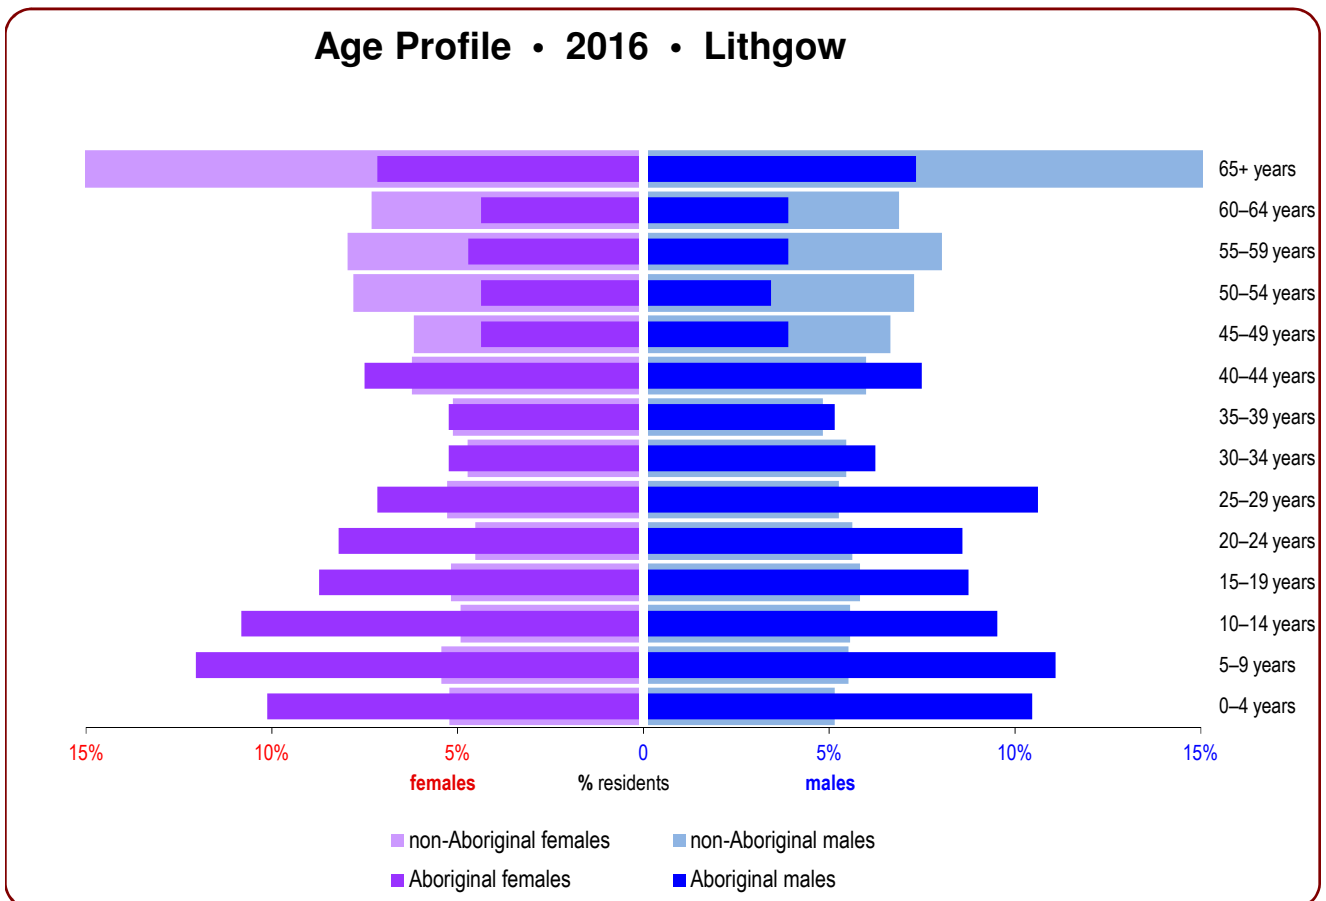

Non-Aboriginal population: about 5% were 5–9 years and also 0–4 years and 10–14 years.

The average age of Aboriginal people in NSW had risen by one year since 2011, and risen by 3 years in the decade since 2006.

In the NSW Aboriginal population, the increases since 2011 were: 40–44 year olds (15%); 60–64 year olds (47%); and 25–29 year olds (36%).

The number aged 65+ was 89% higher than in 2011; the percentage of people this age was up by 2.0% since 2011, when it was 5.0%.

There were many more females than males among those aged 50–54 years, then those aged 55–59 years and 10–14 years.

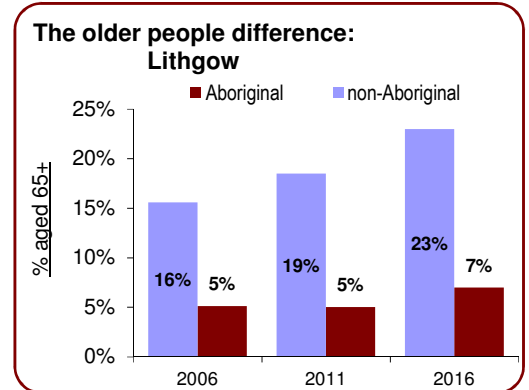

Population Indicators

The older people difference

% aged 65+ in population

Commonly, Aboriginal communities have a lower proportion of people aged over 65, due to a shorter average life-span and higher birth rates.

- ⌘ In 2016, 7.0% of Lithgow's Aboriginal residents were aged 65 or over, compared with 23.0% of non-Aboriginal residents. The older people difference was -16%.
- ⌘ The older people difference had increased by 3% since 2011, after having increased by 3% over the previous five years.
- ⌘ The older people difference in NSW was -11%. It had changed little since 2011 and changed little over the previous five years.

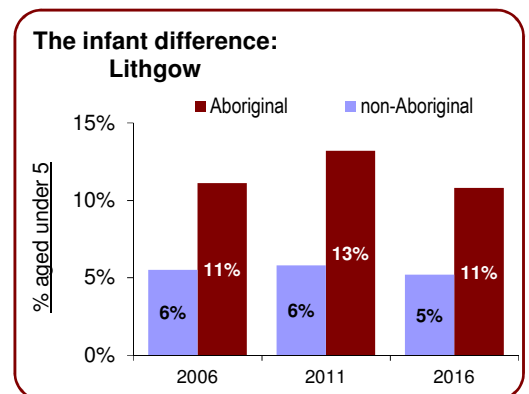

The infant difference

% aged under 5 in population

Aboriginal communities generally have a higher proportion of young people due to larger families and fewer older people.

- ⌘ In 2016, 10.8% of Lithgow's Aboriginal residents were infants, compared with 5.2% of non-Aboriginal residents. The infant difference was +6%.
- ⌘ The infant difference had closed by 2% since 2011, after having widened by 2% over the previous five years.
- ⌘ The infant difference in NSW was +5%. It had changed little since 2011 and changed little over 2006 to 2011.

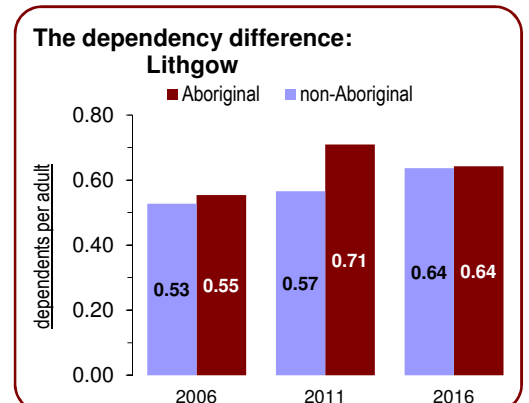

The dependency difference

ratio of dependents to working age adults

The dependency ratio is the average number of people of dependent age (under 15 or 65+) for each person of working age. The national average is 0.5 dependents per adult. A higher ratio means each person of working age has more dependents to support, on average.

- ⌘ In 2016, Lithgow's Aboriginal community had a dependency ratio of 0.64, compared with 0.64 for the non-Aboriginal community. The Aboriginal dependency ratio was similar.
- ⌘ The dependency difference had decreased by 0.13 since 2011, after having widened by 0.11 over the previous five years.
- ⌘ The dependency difference in NSW was 0.13 and had closed by 0.04 since 2011. It had closed by 0.05 over 2006 to 2011.

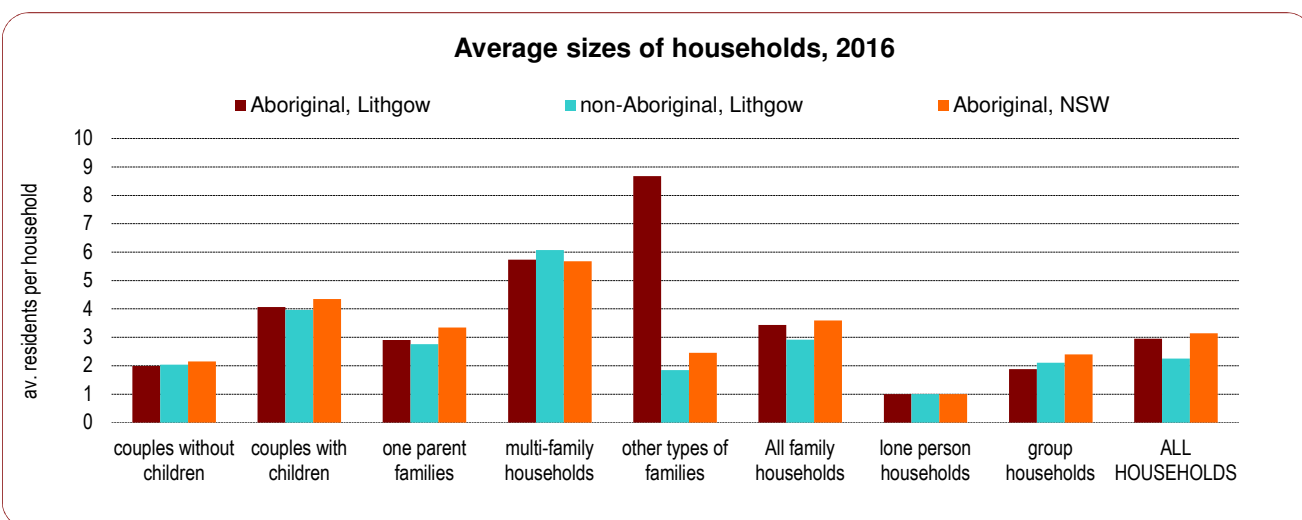

Household types and sizes

In 2016, the 1,208 Aboriginal residents of Lithgow were living in 547 households, 42% more than in 2011.

The main types of Aboriginal households* in the LGA in 2016 were:

- ⌘ One in three were couples with children (180 households, or 33%). 9% higher than non-Aboriginal here
- ⌘ One in four were one parent families (126 households, or 23%). 12% more than non-Aboriginal
- ⌘ One in six were couples without children (86 households, or 16%). 12% less than non-Aboriginal
- ⌘ One in five were one-person households (105 households, or 19%). 14% less than non-Aboriginal
- ⌘ There were 25 multi-family households, and 3 other types of households.

* Aboriginal households are those with at least one Aboriginal resident.

Aboriginal households had an average of 2.9 residents in 2016, which was 0.2 lower than in 2011, and similar to 2006.

- ⌘ Aboriginal households here were 0.2 smaller than in NSW, which averaged 3.1 residents. The average size of the NSW Aboriginal households was little changed since 2011.
- ⌘ The average size of non-Aboriginal households in the LGA was 2.3 residents; Aboriginal households were 31% larger, on average. The average size of non-Aboriginal households changed little from 2011.
- ⌘ The larger size of Aboriginal households is consistent with lower proportions of people living alone. Aboriginal households: 19% lone person; Other households: 34%.
- ⌘ Aboriginal couple families had an average of 2.1 children, compared with 2.0 for non-Aboriginal families here. Aboriginal families in NSW averaged 2.3 children. The average size of Aboriginal nuclear families was down by 0.4 since 2011, and down by 0.1 from 2006.
- ⌘ Aboriginal one-parent families averaged 1.9 children, compared with 2.3 in NSW and 1.8 for non-Aboriginal one-parent families here. The average number of children per one-parent family was down by 0.5 since 2011, and down by 0.3 since 2006.
- ⌘ At an average size of 2.9 persons, the 547 Aboriginal households had some 1,600 members, but only 1,057 Aboriginal people were counted in these households. This suggests that some 550 people in Lithgow's Aboriginal households (one in three) did not identify as Aboriginal in the Census.

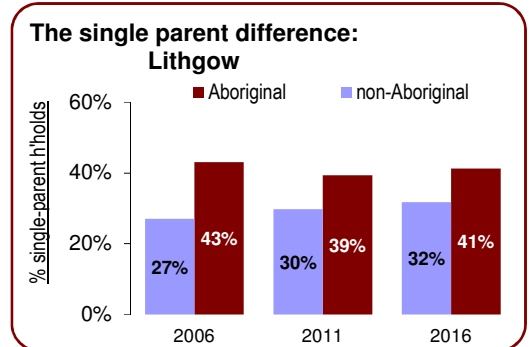

Household Indicators

The single parent difference

% of families with children having one parent

Single parent families often have low incomes because it is difficult for the parent to work without adequate child care and support. High proportions of one-parent families can indicate a higher need for support services.

- ⌘ In 2016, 41% of Lithgow's Aboriginal family households with children had one parent, compared with 32% of non-Aboriginal families. The difference was +10%.
- ⌘ The single parent difference had changed little since 2011, after having decreased by 6% over the previous five years.
- ⌘ The single parent difference in NSW was +23%. It had decreased by 2% since 2011 after having decreased by 1% over 2006 to 2011.

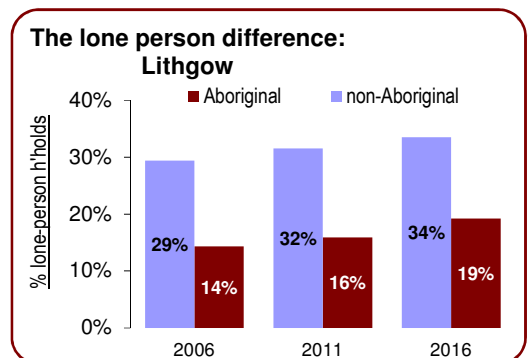

The lone person difference

% of households with one person

Living alone is less common for Aboriginal people than for others, so most communities have a large lone person difference. The difference is influenced locally by the availability of small dwellings.

- ⌘ In 2016, 19% of Lithgow's Aboriginal households were lone persons, compared with 34% of non-Aboriginal households. The lone person difference was -14%.
- ⌘ The lone person difference had reduced by 1% since 2011, after having changed little over the previous five years.
- ⌘ The lone person difference in NSW was -9% and had changed little since 2011. It had decreased by 1% between 2006 and 2011.

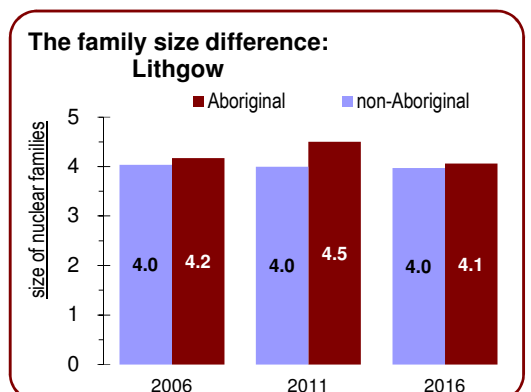

The family size difference

average size of two-parent families

The family size difference is the gap between the average sizes of Aboriginal and non-Aboriginal 'nuclear families' (couples with children). Larger families have to spread their income among more members, so living standards tend to be lower.

- ⌘ In 2016, the average size of Lithgow's Aboriginal nuclear families was 4.1 persons (i.e. 2.1 children), compared with 4.0 persons (2.0 children) for non-Aboriginal families, a difference of 0.1 children per family.
- ⌘ The family size difference had decreased by 0.4 since 2011, after having increased by 0.4 over the previous five years.
- ⌘ The family size difference in NSW was 0.3 children per family, and had decreased by 0.1 since 2011. It had increased by 0.1 from 2006 to 2011.

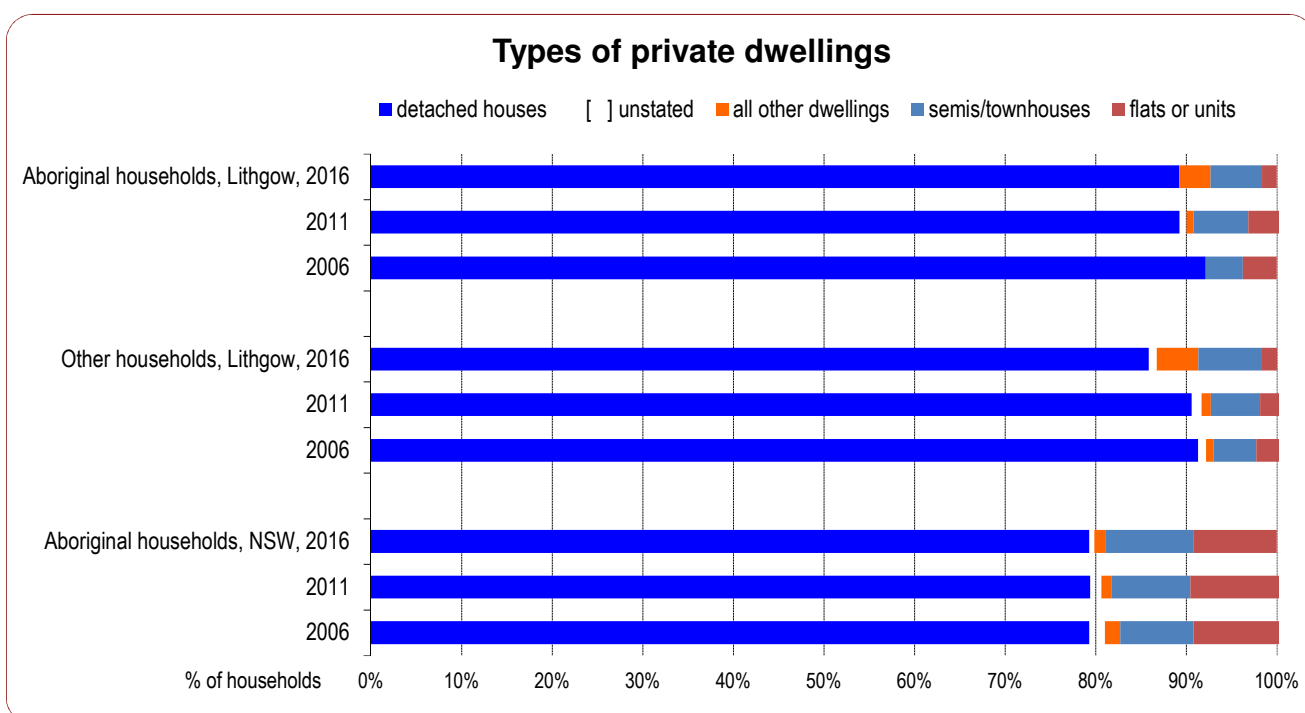

Types of housing

In 2016, most Aboriginal households in Lithgow (89%) were living in detached houses, with 6% living in semis/townhouses and 3% living in flats on shops.

- ⌘ Compared with other households in Lithgow, 3% more Aboriginal households lived in detached houses.
- ⌘ The proportion of Aboriginal households living in detached houses in Lithgow was little changed since 2011, and was 3% lower than in 2006.

The proportion in detached houses was 10% higher than that of Aboriginal households in NSW. The proportion in flats or units was 8% lower.

The proportion of non-Aboriginal households in detached houses in Lithgow was down by 5% since 2011 and down by 5% since 2006.

80 Aboriginal people in the LGA (7%) were counted living in institutional accommodation on Census night (eg. nursing homes, hospitals, boarding houses, correctional centres, barracks or boarding schools).

- ⌘ There were 59 Aboriginal people living in institutional accommodation in this LGA in 2011, and 55 in 2006.
- ⌘ There were only males among Aboriginal people in institutional accommodation.

In 2016, there were 716 people living in institutional accommodation in Lithgow; 4% of the non-Aboriginal population lived in institutions.

Note: very small numbers are randomly altered by the ABS to protect privacy, so are not precise.

No Aboriginal people were reported living in improvised accommodation (eg. shacks, tents or sleeping out) in the LGA on Census night.

- ⌘ This was virtually unchanged since 2011.

There were 9 non-Aboriginal people in improvised accommodation in Lithgow in 2016.

Housing costs and tenure

In 2016, Aboriginal households in Lithgow most commonly lived in dwellings that were rented (41% of the households). Another 31% lived in dwellings that were being purchased, and 23% in homes that were fully owned.

⌘ The proportion of Aboriginal households that rented, 41%, was 18% higher than for other households here.

The proportion living in rented dwellings was down by 6% since 2011, and was 5% lower than in 2006.

The median weekly rent paid by Aboriginal households was \$220. It was \$180 in 2011 and \$130 in 2006.

⌘ The proportion living in dwellings that were being bought (31%) was 2% higher than for Other households.

The proportion living in mortgaged dwellings was down by 3% since 2011; and 7% higher than in 2006.

The median monthly mortgage paid by Aboriginal households in the LGA in 2016 was \$1,300. It was \$1,560 in 2011 and \$1,300 for 2006.

⌘ The proportion of Aboriginal households in fully owned dwellings (23%) was 20% lower than for non-Aboriginal households.

The proportion in fully owned dwellings was up by 6% since 2011; and 3% lower than in 2006.

Among Aboriginal households, the proportion renting in Lithgow was 13% lower than the rate in NSW.

23% of Other households in Lithgow were renting, similar to 2011, and 1% lower than in 2006.

The median weekly rent paid by Other households in Lithgow was \$230. It was \$170 in 2011 and \$135 in 2006.

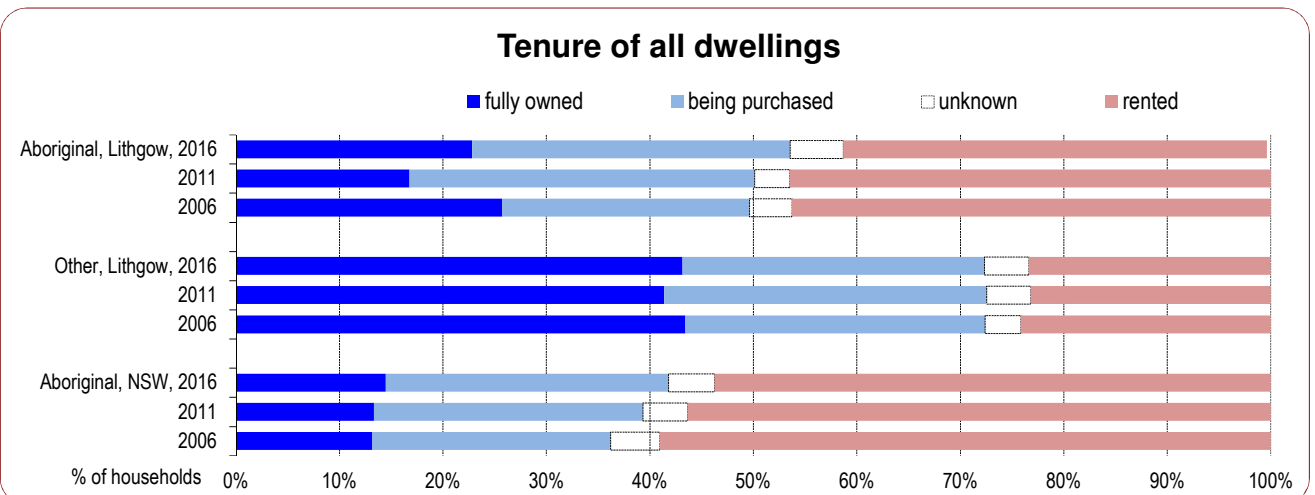

In NSW, 27% of Aboriginal households were home-buyers with a mortgage.

29% of the Other households in Lithgow had a mortgage, down by 2% since 2011, and steady since 2006.

The median mortgage paid by Other households in Lithgow was \$1,400. It was \$1,413 in 2011 and \$1,105 in 2006.

The proportion of Aboriginal households in fully owned dwellings in Lithgow was 8% higher than the average in NSW.

The proportion of Other households in fully owned dwellings in Lithgow was up by 2% since 2011, and steady since 2006.

Of 224 Aboriginal rental households, 41% were managed by real estate agents and 36% were managed by public housing.

⌘ 81 Aboriginal households lived in public housing (15% of all households).

This number had risen by 20 since 2011.

Only 5% of the Other households lived in public housing.

The number of Other households in public housing in Lithgow had fallen by 23.

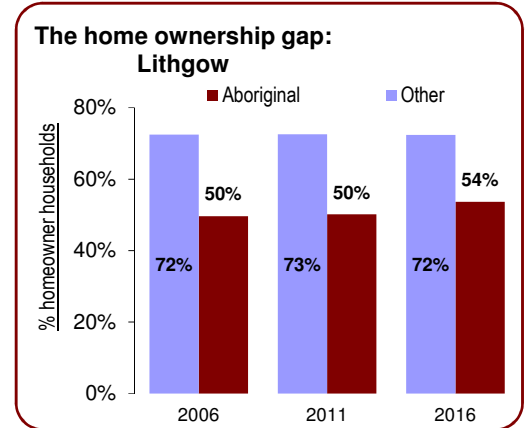

Housing Indicators

The home ownership gap

% of households owning/buying their home

Ownership of a home is the main way that most Australians accumulate wealth and ensure secure accommodation.

- ⌘ In 2016, 54% of Aboriginal households in Lithgow were either buying or owned their home, compared with 72% of other households, a home ownership gap of -19%.
- ⌘ The gap had closed by 3% since 2011, after having closed by 1% over the previous five years.
- ⌘ The home ownership gap in NSW was -24% and had closed by 4% since 2011. It had closed by 3% between 2006 and 2011.

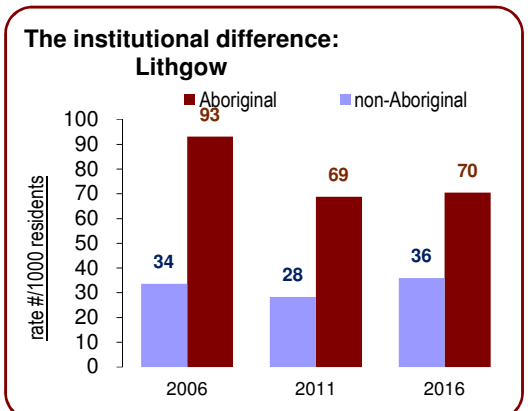

The institutional difference

rate per 1000 of residents in non-private dwellings

Differences in proportion of people in institutional accommodation will reflect the nature and extent of these institutions in the area – they might include hotels, boarding houses, nursing homes, correctional centres, barracks or hospitals.

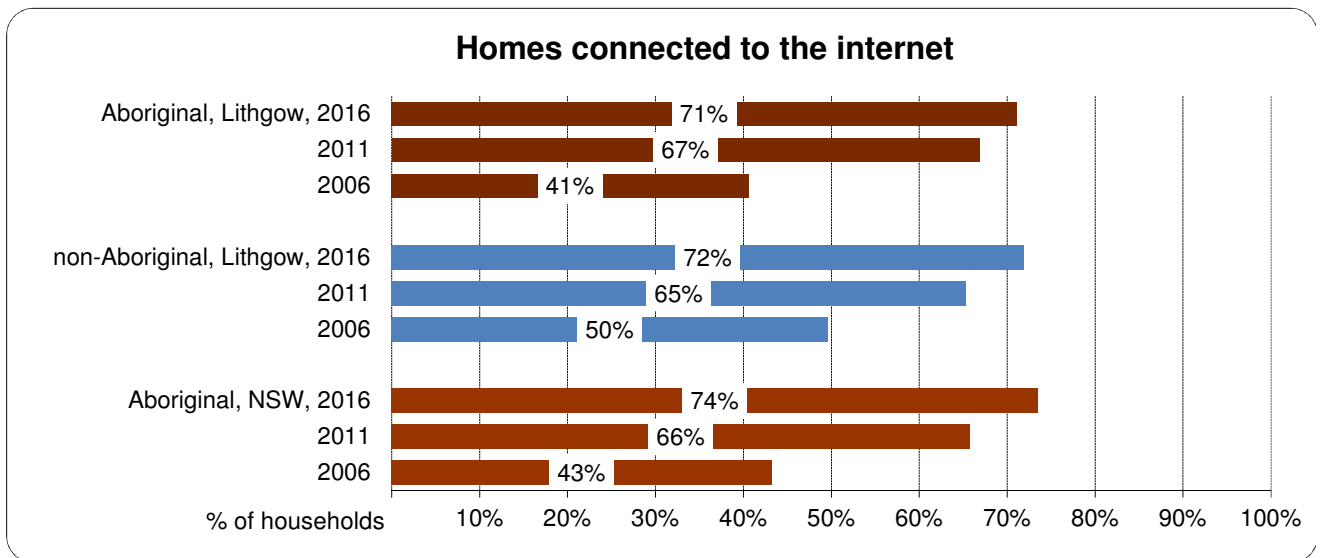

- ⌘ In 2016, 7% of Aboriginal residents in Lithgow were in institutional housing, compared with 36 per 1000 non-Aboriginal residents. The institutional difference was +35 per 1000.
- ⌘ The institutional gap had decreased by 6 per 1000 since 2011, after having decreased by 19 per 1000 over the previous five years.
- ⌘ The institutional difference in NSW was 9 per 1000 and had changed little since 2011. It had also changed little between 2006 and 2011.

Internet @ home

In 2016, 71% of Aboriginal households in Lithgow had an internet connection while 24% did not (130 households); 4% did not answer the question.

- ⌘ The proportion of Aboriginal households connected to the internet was 2% lower than in NSW (74% connected), ... and similar to non-Aboriginal households in Lithgow (where 72% of homes were connected).
- ⌘ The proportion of Aboriginal households with internet was up by 4% from 67% in 2011. The proportion was up by 8% for Aboriginal households in NSW. It was up by 7% for non-Aboriginal households in this LGA (from 65% in 2011).
- ⌘ In 2006, 41% of Lithgow's Aboriginal people had the internet at home. This compared with 43% of Aboriginal people in NSW and 50% of non-Aboriginal people in this LGA.

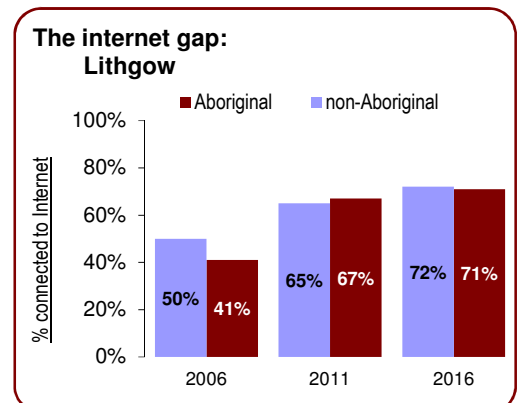

The internet gap

% of households with an internet connection

The internet is becoming increasingly important as a source of communication and information, and is becoming an essential service.

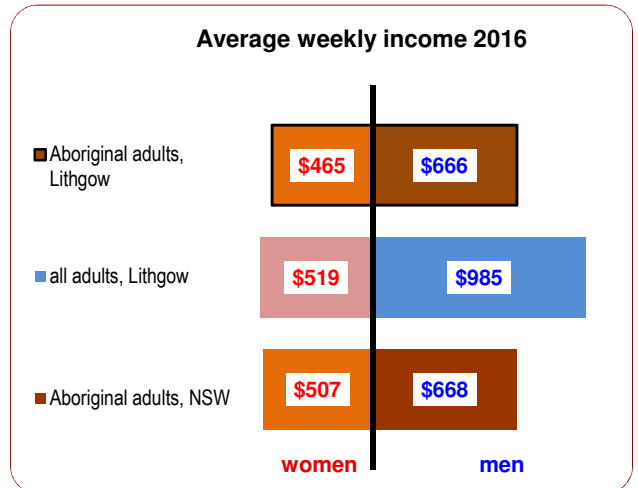

- ⌘ In 2016, 71% of Lithgow's Aboriginal households had an internet connection, compared with 72% of other households, an internet gap of -1%.
- ⌘ The internet gap had reversed since 2011, after having reversed over the previous five years.
- ⌘ The internet gap in NSW was 9% and had narrowed by 2% since 2011. It narrowed by 8% between 2006 and 2011.
The 2006, 2011 and 2016 Censuses had different questions about the internet.

Personal income

In 2016, the average weekly income of Aboriginal adults (aged 15+) in Lithgow was about \$582, which was 6% less than that of Aboriginal adults in NSW (\$621), but 29% less than the average of all adults in the LGA (\$820).

- ⌘ Aboriginal men in Lithgow averaged \$666 a week (68% of the overall male average here).
Aboriginal women averaged \$465 a week (90% of the overall female average).
- ⌘ The average weekly income of Aboriginal men was similar in the LGA to NSW.
The average weekly income of Aboriginal women here was \$42 lower than in NSW.
- ⌘ Half of the Aboriginal adults received under \$443 a week (the median income).

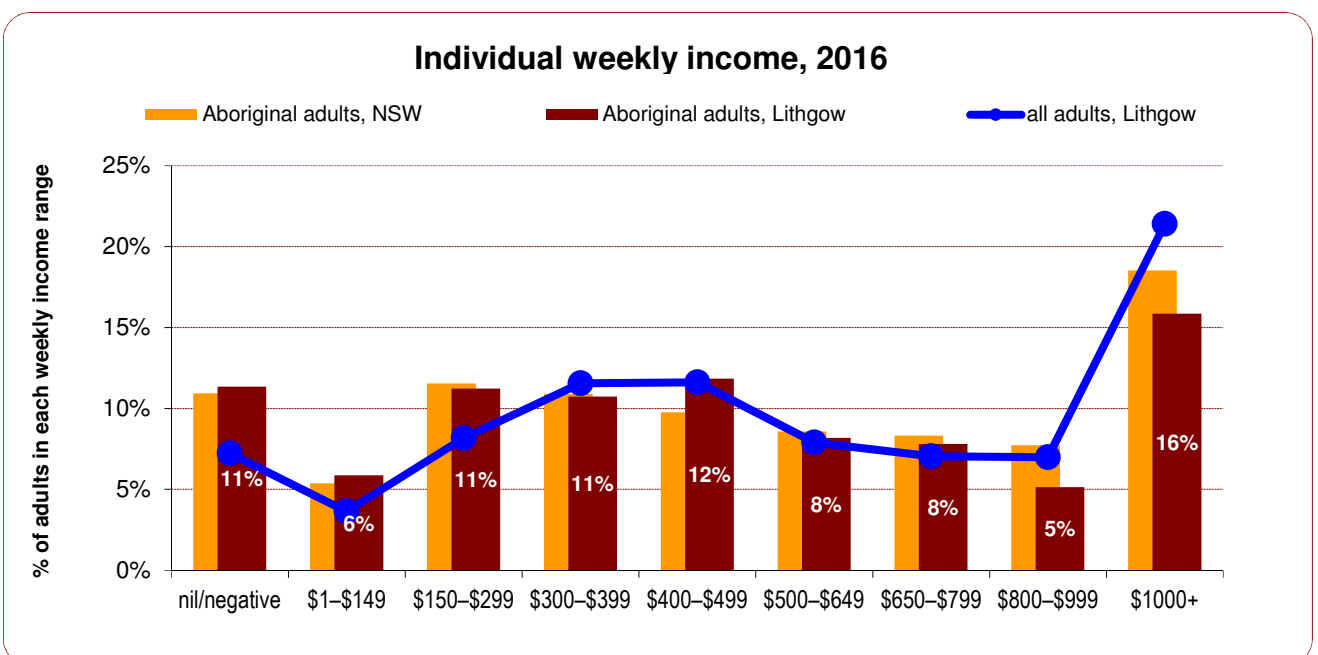

The income distribution pattern among Aboriginal adults in Lithgow was similar to Aboriginal adults in NSW, and somewhat different from all adults in the LGA.

Compared with Aboriginal adults across NSW:

- ⌘ proportionally more Aboriginal adults here were in the \$400–\$499 and \$1–\$149 ranges.
- ⌘ fewer were in the \$1000+ and \$800–\$999 ranges.

Compared with all adults in this LGA:

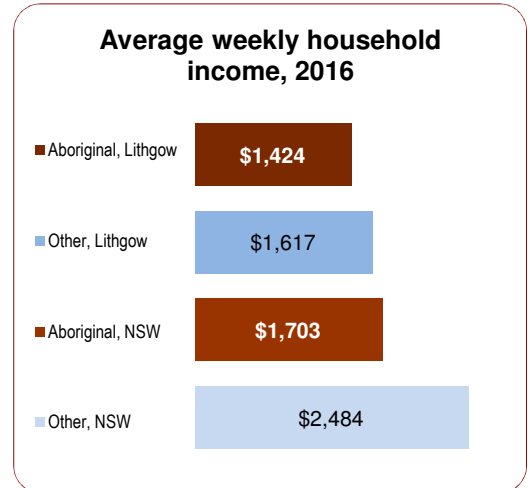

- ⌘ more Aboriginal adults were in the nil/negative and \$150–\$299 ranges, and in the \$1–\$149 range.
- ⌘ proportionally fewer were in the \$1000+ range.

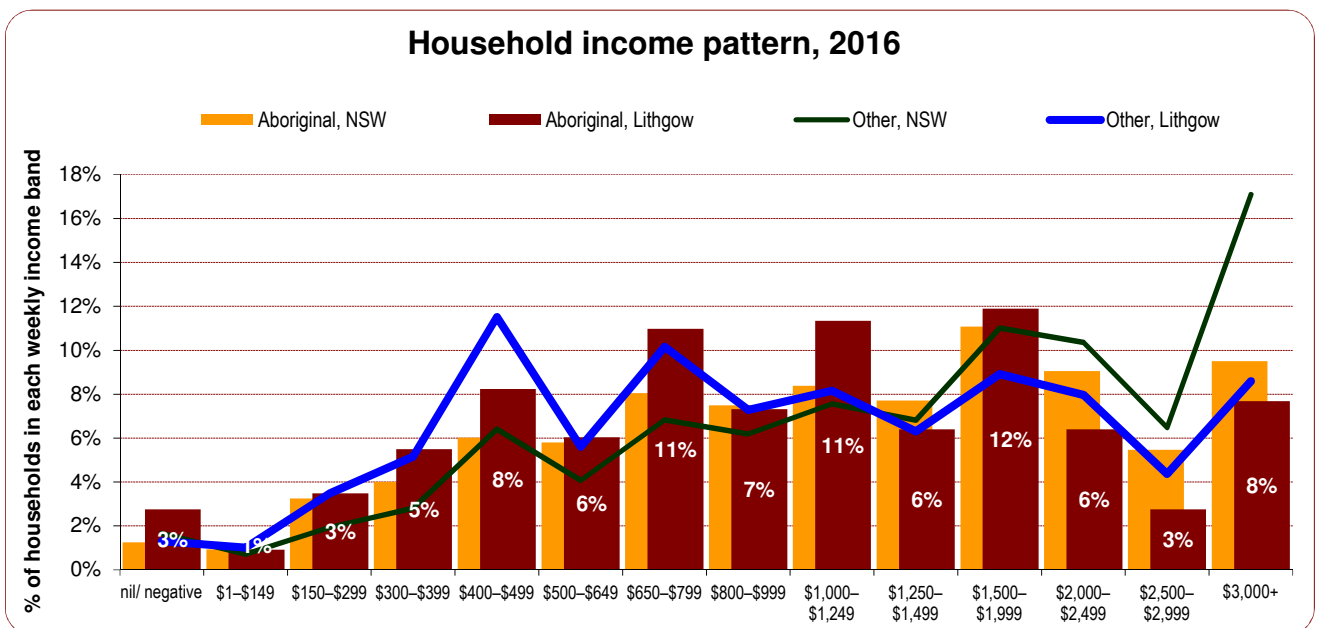

Household income

In 2016, the average income of Aboriginal households in Lithgow was about \$1,424 a week. Household income is not a strong indicator of well-being because the benefit the income gives household members is affected by the household's size.

- ⌘ The average Aboriginal household income in Lithgow was 16% less than the average of Aboriginal households in NSW (\$1,703 a week).
- ⌘ It was 12% less than the average of other households in Lithgow – \$1,617 a week.
- ⌘ Half the Aboriginal households received less than \$1,031 a week (the median household income).
- ⌘ Aboriginal households in the LGA had an average size of 2.9 residents, compared with 2.3 for non-Aboriginal households. Household incomes thus had to be spread among more people, compared to other households.

The income distribution pattern among Aboriginal households in Lithgow was slightly different from the NSW Aboriginal households, and partly different from other households in the LGA.

Compared with Aboriginal households across NSW:

- ⌘ more Aboriginal households here were in the \$1,000–\$1,249 and \$650–\$799 income ranges, and in the \$400–\$499 range.
- ⌘ fewer Aboriginal households were in the \$2,500–\$2,999 and \$2,000–\$2,499 income ranges.

Compared with non-Aboriginal households in this LGA:

- ⌘ more Aboriginal households were in the \$1,000–\$1,249 and \$1,500–\$1,999 income ranges.
- ⌘ fewer Aboriginal households were in the \$400–\$499 and \$2,500–\$2,999 income ranges.

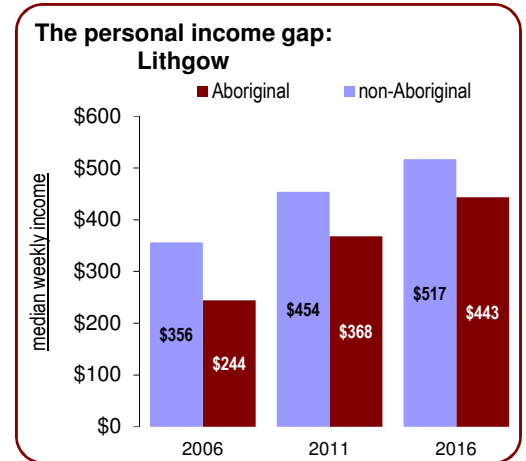

Income Indicators

The personal income gap

median weekly income of adults (15+)

Income is a major contributor to well-being. One indicator of disadvantage is a low median income – the amount which fewer than half the people earn.

- ⌘ In 2016, the median income of Aboriginal adults in Lithgow (\$443) was 86% that of non-Aboriginal adults in this LGA (\$517). The personal income gap was -14%.
- ⌘ The personal income gap had closed by 5% since 2011, after having closed by 12% over the previous five years.
- ⌘ The personal income gap in NSW was -29% and had narrowed by 5% since 2011. It had narrowed 2% between 2006 and 2011.

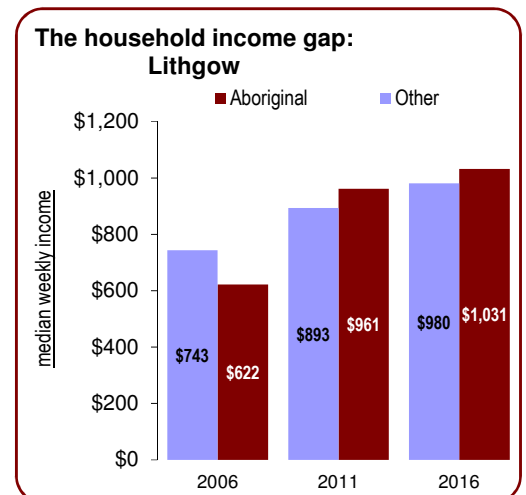

The household income gap

median weekly income of households

Another indicator of disadvantage is a low median household income; half of all households receive less than this amount. However, Aboriginal households tend to be larger, with more dependents, so household income does not reflect disadvantage as well as individual income does.

- ⌘ In 2016, the median income of Aboriginal households in Lithgow was \$1,031, compared with \$980 for other households in the LGA. This was 5% higher – this is the household income gap.
- ⌘ The household income gap had narrowed by about 3% since 2011, after having reversed over the previous five years.
- ⌘ The household income gap in NSW was 19% and had closed by 6% since 2011. It had narrowed by 5% between 2006 and 2011.

Employment

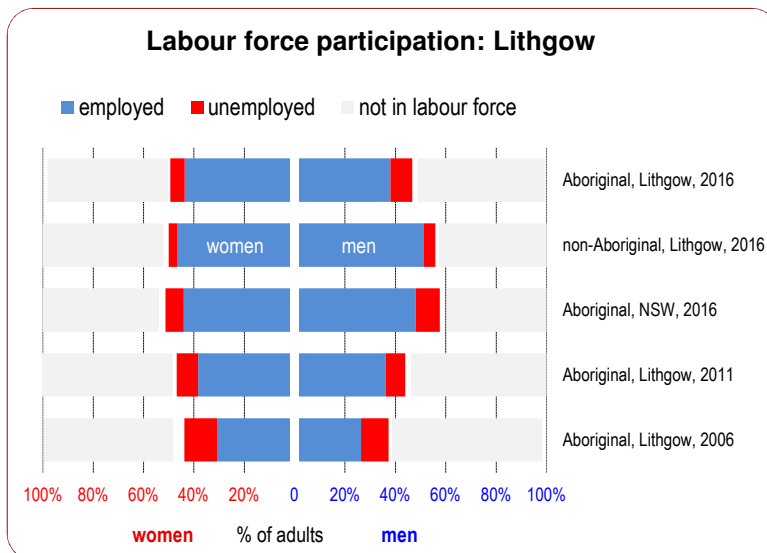

Employment is a prime determinant of a community's income, so it is an important indicator of well-being. In Lithgow, 334 out of 820 Aboriginal adults (15+) were employed in 2016 – 41% of adults.

60 Aboriginal adults were unemployed (7%), so the overall workforce participation rate (employed + unemployed) was 48%.

Aboriginal workforce participation was ...

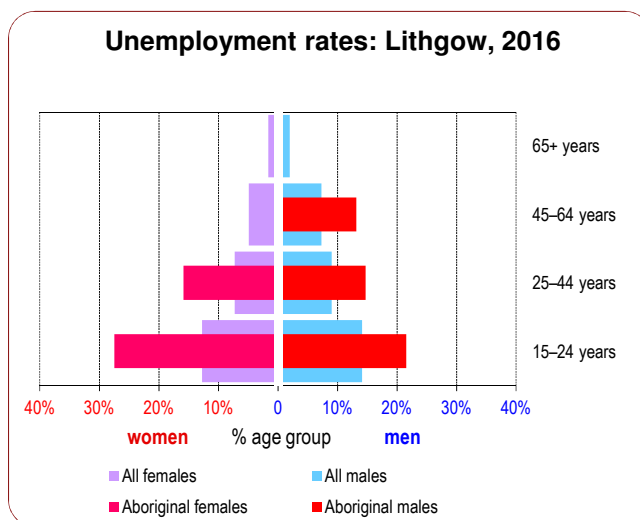

- ⌘ higher for women (50%) than men (46%).
- ⌘ 4% lower than the average for non-Aboriginal adults in the LGA.
- ⌘ 6% lower than the average for Aboriginal adults in NSW.

The Aboriginal workforce participation rate here was 3% higher than in 2011 and 8% higher than in 2006.

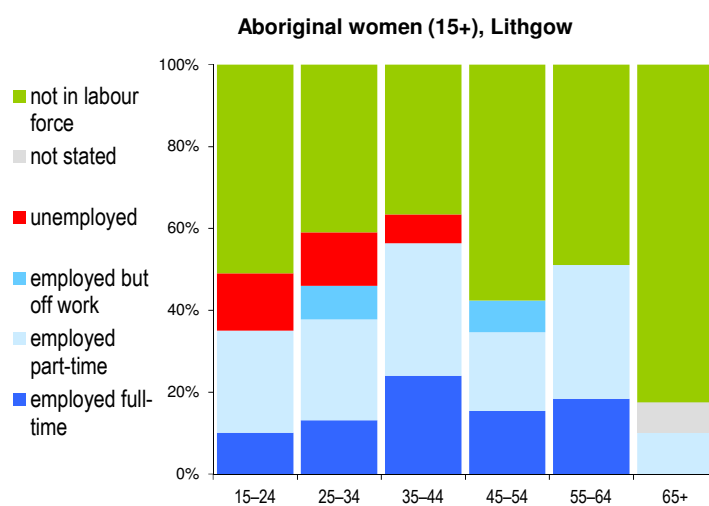

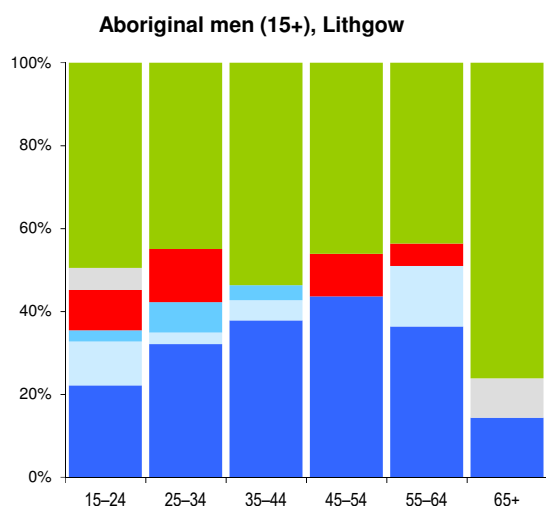

In 2016, the Aboriginal unemployment rate in Lithgow was 15%, with 60 people out of work.

- ⌘ This rate was higher than the 7% rate among non-Aboriginal adults in the LGA.
- ⌘ The Aboriginal unemployment rate was 19% for men and 11% for women.
- ⌘ The Aboriginal unemployment rate was 3% lower than in 2011, and 14% lower than in 2006.
- ⌘ Aboriginal unemployment was highest among those aged 15–24 years (24%) and 45–64 years (18%). It was lowest among those aged 25–44 years (13%).

These graphs show the employment patterns for men and women, by age, in 2016.

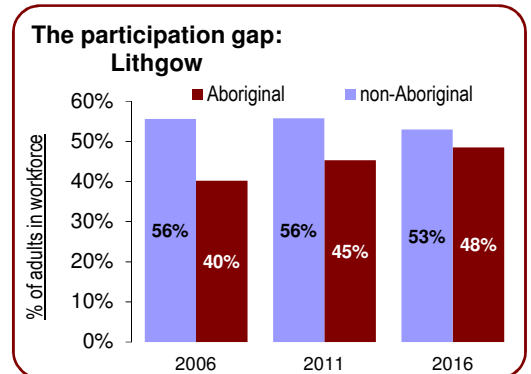

Workforce Gap Indicators

The participation gap

% of adults 15+ in labour force

Employment in the workforce is the main way that people gain income and independence. When the proportion of adults in the workforce is low, communities become more dependent on income support, and poverty increases.

- ⌘ In 2016, the proportion of Aboriginal adults (15+) of Lithgow in the workforce was 48%; the proportion of non-Aboriginal adults in the workforce was 53%; the participation gap was -4%.
- ⌘ The participation gap had closed by 6% since 2011, after having closed by 5% over the previous five years.
- ⌘ The participation gap in NSW was -8% and had closed by 3% since 2011. It had changed little between 2006 and 2011.

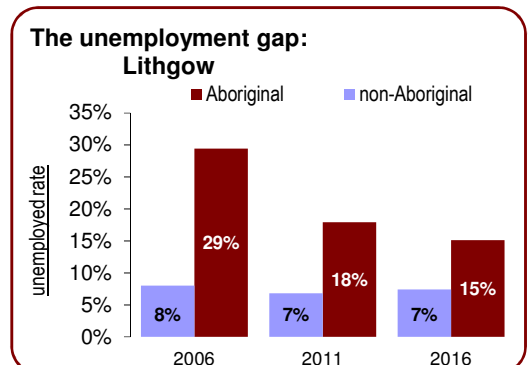

The unemployment gap

% of unemployed in workforce

High unemployment indicates an absence of jobs in occupations for which local people have had training. High unemployment rates have many damaging effects on those unemployed and their community.

- ⌘ In 2016, 15% of the Aboriginal workforce in Lithgow were unemployed; 7% of the non-Aboriginal workforce were unemployed; the unemployment gap was +8%.
- ⌘ The unemployment gap had closed by 3% since 2011, after having closed by 10% over the previous five years.
- ⌘ The unemployment gap between in NSW was +9% and had closed by 2% since 2011. It had narrowed by 3% between 2006 and 2011.

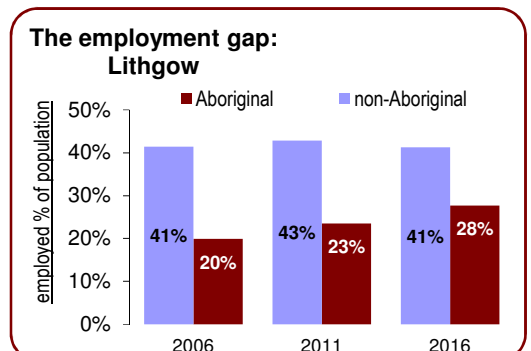

The employment gap

employed adults as % of population

A useful indicator of the financial strength of a community is the proportion of the total population who are employed. A lower proportion means that, on average, each employed person has more people to support.

- ⌘ In 2016, 28% of the Aboriginal population of Lithgow were employed; 41% of the non-Aboriginal workforce were employed; the employment gap was -14%.
- ⌘ The employment gap had closed by 5% since 2011, after having closed by 3% over the previous five years.
- ⌘ The employment gap in NSW was -18% and had closed by 3% since 2011. It had narrowed by 1% between 2006 and 2011.

Education participation by age

Having high proportions of people in education is a good indicator of positive individual and community development. In Lithgow, three in ten Aboriginal residents (385 people) were attending an educational institution in 2016.

Aboriginal participation in education varied with age. Here in education were:

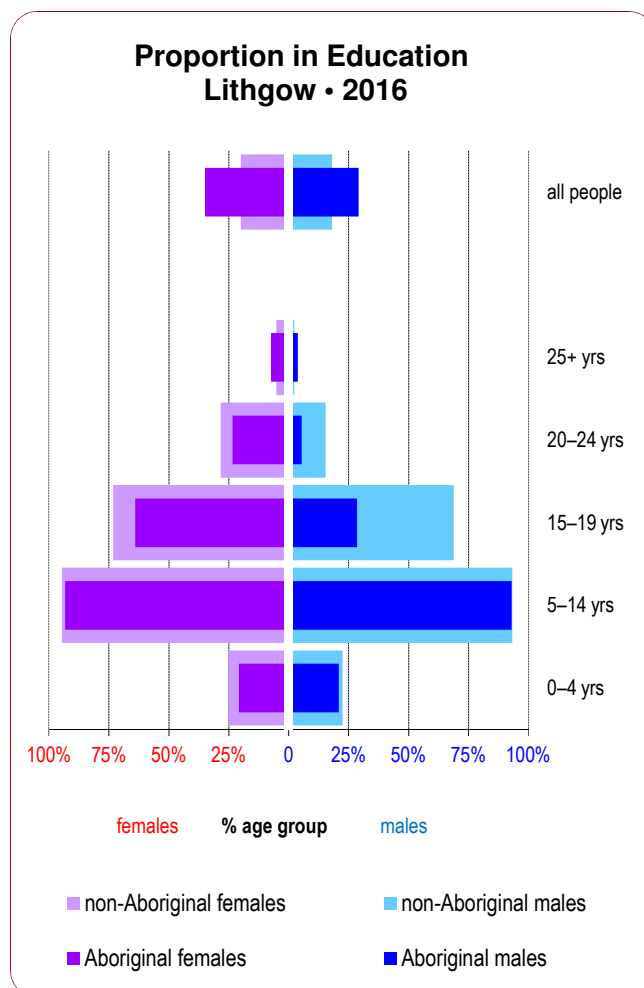

- 22% of the 0–4 year olds
- 91% of the 5–14 year olds
- 67% of the 15–19 year olds
- 10% of the 20–24 year olds
- 6% of those aged 25+

Partly because the Aboriginal population has a much higher proportion of children, their overall rate of participation in education, 32%, is higher than the non-Aboriginal rate in this LGA, 19%. Relative to non-Aboriginal people of the same age, there were, in education:

- 2% more Aboriginal 25+ year olds
- similar proportions of 0–4 year olds
- 3% fewer Aboriginal 5–14 year olds
- 4% fewer Aboriginal 15–19 year olds
- 12% fewer Aboriginal 20–24 year olds

Overall, Lithgow's Aboriginal population had 107 females per 100 males in education. This varied with age. Of those in education, there were:

- 1.2 males per female among 0–4 year olds
- 1.0 females per male among 5–14 year olds
- 1.2 males per female among 15–19 year olds
- 3.7 females per male among 20–24 year olds
- 1.6 females per male among 25+ year olds

Since 2011, overall participation in education by Aboriginal people in Lithgow had remained stable, but this masks changes among the age groups.

- The proportion of 0–4 year olds in education was unchanged since 2011, and up by 6% since 2006.
- The proportion of 5–14 year olds in education was up by 4% since 2011, and up by 3% since 2006.
- The proportion of 15–19 year olds in education was up by 17% since 2011, and up by 7% since 2006.
- The proportion of 20–24 year olds in education was down by 1% since 2011, and up by 4% since 2006.
- The proportion of 25+ year olds in education was up by 1% since 2011, and up by 1% since 2006.

Note: In January 2010, the school leaving age in NSW changed from 15 to 17 years of age.

Current education

In 2016, some 326 Aboriginal children and teenagers in Lithgow were attending school, with 39 in pre-school, 179 in primary school, and 108 in high school.

The number of Aboriginal pre-schoolers was up by 9 or 30% since 2011 and, from 2006, up by 160%.

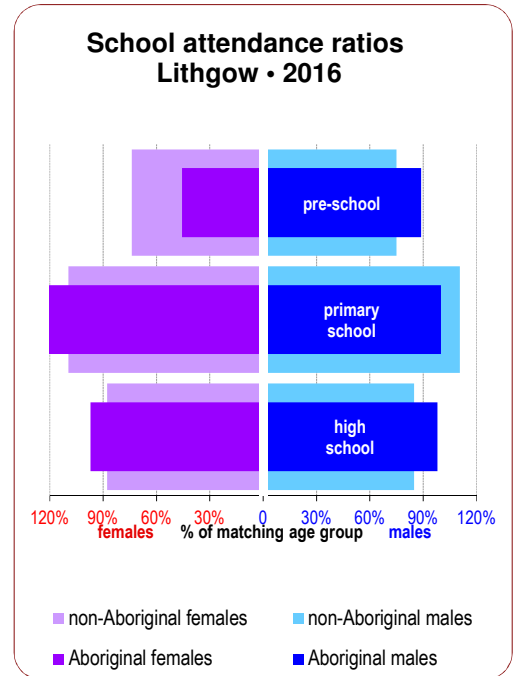

- ⌘ The 39 Aboriginal pre-schoolers equalled 83% of the Aboriginal children aged 4–5.
- ⌘ In NSW, Aboriginal pre-schoolers equalled 72% of the number aged 4–5 years. Non-Aboriginal pre-schoolers in this LGA represented 73% of their age group.

The number of Aboriginal primary students (179) was up by 56 or 46% since 2011; it was 145% higher than in 2006.

- ⌘ Aboriginal primary students were 104% of the number aged 6–11. This is because some primary students were other ages.
- ⌘ This rate was 5% lower than the Aboriginal rate in NSW and 5% lower than for non-Aboriginal children here.

The number of Aboriginal secondary students (108) was up by 20 or 23% since 2011 and 66% higher than 2006.

- ⌘ Aboriginal secondary students were 84% of the Aboriginal children aged 12–17.
- ⌘ This rate was 2% lower than the rate for non-Aboriginal secondary students; it was 4% higher than for Aboriginal students in NSW.

63 Aboriginal residents of Lithgow were in post-school education in 2016. This was 19 more than in 2011, with 42 more than in 2006.

In 2016, there were 21 Aboriginal 15–24 year olds from the LGA enrolled in TAFE (10% of the number this age); 14% attended full-time.

- ⌘ 8% of Aboriginal 15–24 year olds in this LGA attended TAFE, with 35% full-time.
- ⌘ 10% of non-Aboriginal 15–24 year olds in this LGA attended TAFE, with 31% full-time.

A few Aboriginal 15–24 year olds from the LGA attended university or other tertiary education (3% of the number this age); all were full-time.

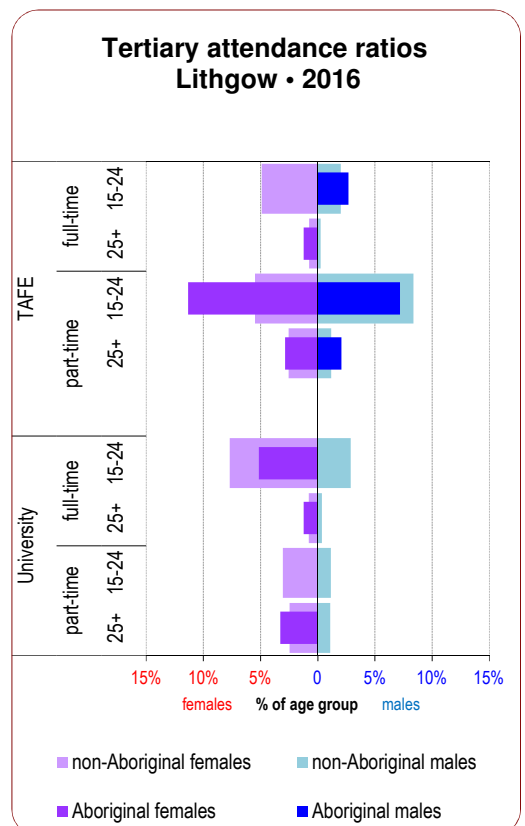

- ⌘ 7% of Aboriginal 15–24 year olds in NSW were at university, with 83% full-time.
- ⌘ 7% of non-Aboriginal 15–24 year olds in this LGA were at university, with 73% full-time.

There were 22 Aboriginal students aged 25+ attending TAFE in 2016 (4% of those aged 25–64), with 14% full-time.

- ⌘ 4% of Aboriginal 25–64 year olds in NSW attended TAFE, with 30% full-time.
- ⌘ 2% of non-Aboriginal 25–64 year olds in this LGA attended TAFE, with 22% full-time.

11 Aboriginal residents aged 25+ were in tertiary education in 2016 (2% of 25–64 year olds), with 27% full-time.

- ⌘ 3% of Aboriginal 25–64 year olds in NSW were at university, with 43% full-time.
- ⌘ 2% of non-Aboriginal 25–64 year olds in this LGA were at university, with 24% full-time.

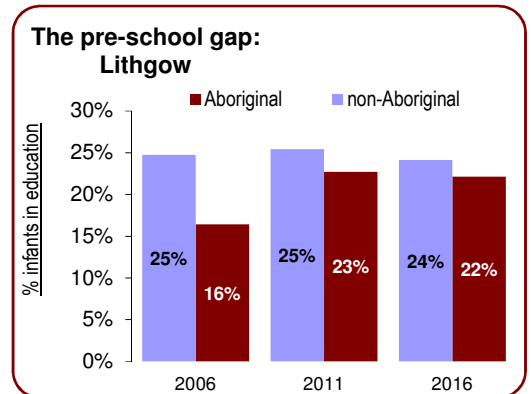

Education Attendance Indicators

The pre-school gap

% of infants under 5 in education

Early childhood education is an important contributor to success in school and later education, and makes paid work more feasible for parents.

- ⌘ In 2016, 22% of Aboriginal infants in Lithgow were in education, compared with 24% of non-Aboriginal infants. The pre-school gap was -2%.
- ⌘ The pre-school gap had closed by 1% since 2011, after having closed by 6% over the previous five years.
- ⌘ The pre-school rates of Aboriginal and non-Aboriginal infants in NSW were 25% and 25% in 2016, a gap of nil. This gap had narrowed by 2% since 2011.

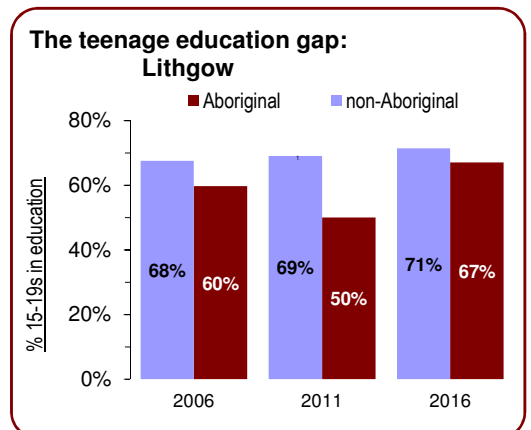

The teenage education gap

% of 15–19 year-olds in education

Education of older teenagers is vital for their future employment, so low levels of participation in education indicates disadvantage.

- ⌘ In 2016, 67% of Lithgow Aboriginal teenagers aged 15–19 were in education, compared with 71% of non-Aboriginal teenagers. The teenage education gap was -4%.
- ⌘ The teenage education gap had closed by 15% since 2011, after having widened by 11% over the previous five years.
- ⌘ The teenage education gap between Aboriginal and non-Aboriginal in NSW was -18% and had narrowed by 1% since 2011. It narrowed by 6% over 2006 to 2011.

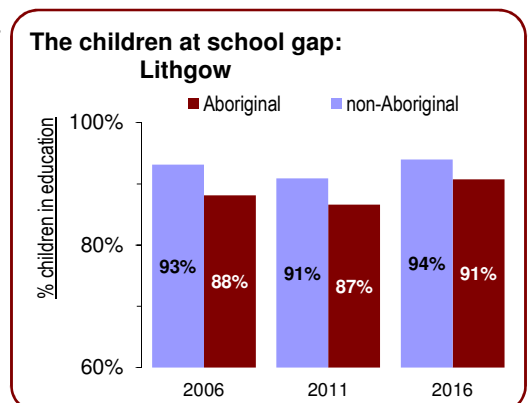

The children at school gap

% of 5–14 year olds in education

School is compulsory for children up to the age of 17*. Low schooling rates suggest truancy and/or underage school leavers.

- ⌘ In 2016, 91% of Lithgow Aboriginal children aged 5–14 were in education, and 94% of non-Aboriginal of that age were. The schooling gap was -3%.
- ⌘ The schooling gap had closed by 1% since 2011, after having closed by 1% over the previous five years.
- ⌘ The schooling gap in NSW was -3% and had narrowed by 4% since 2011. It changed little over 2006 to 2011.

* In January 2010, the school leaving age in NSW changed from 15 to 17 years of age.

Schooling levels

In 2016, Aboriginal adults (15+) in Lithgow had completed an average of Year 10.1 of school, compared with Year 10.4 for non-Aboriginal adults. In NSW, Aboriginal adults averaged Year 10.3.

⌘ 173 Aboriginal adults in the LGA had completed Year 12, which was 97% more than in 2011 and 260% more than in 2006.

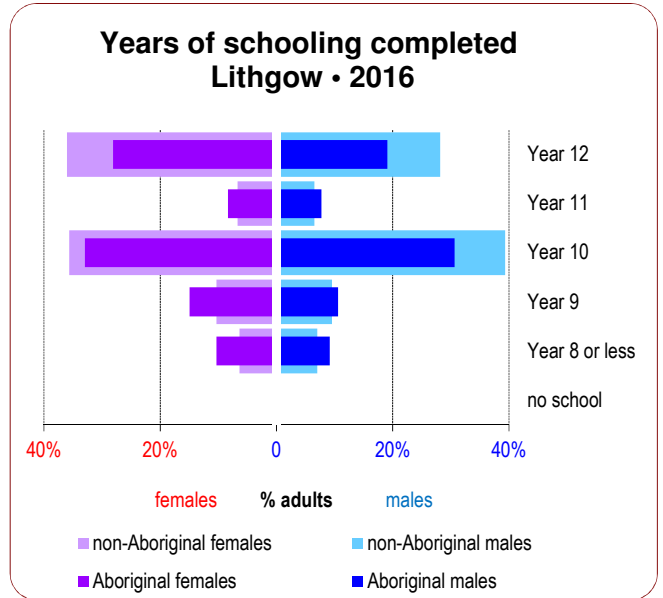

The proportion of Aboriginal adults in the LGA who had completed Year 12 was 23%, which was 9% lower than that of non-Aboriginal adults.

30% of Aboriginal adults across NSW had completed Year 12.

⌘ 63% of Aboriginal adults in the LGA had completed at least Year 10, which was 8% lower than for Aboriginal adults in NSW.

⌘ Of the others, 13% had completed Year 9 and 10% had completed Year 8 or lower; 3 adults did not go to school; 15% did not say.

The average Year of school is calculated by multiplying the number who finished each Year's school by the Year, assuming those who replied '8 years or less' averaged 7 years schooling, those who responded 'no school' had 0 years, and excluding those who did not respond.

The average Year when Aboriginal people in Lithgow left school had risen by 2 months since 2011, and was up by 5 months since 2006.

Over the decade to 2016, there was an increase of 260% in the number who had finished Year 12 and an increase of 89% in the number who had finished school at Year 11.

For Aboriginal adults in this LGA, average schooling:

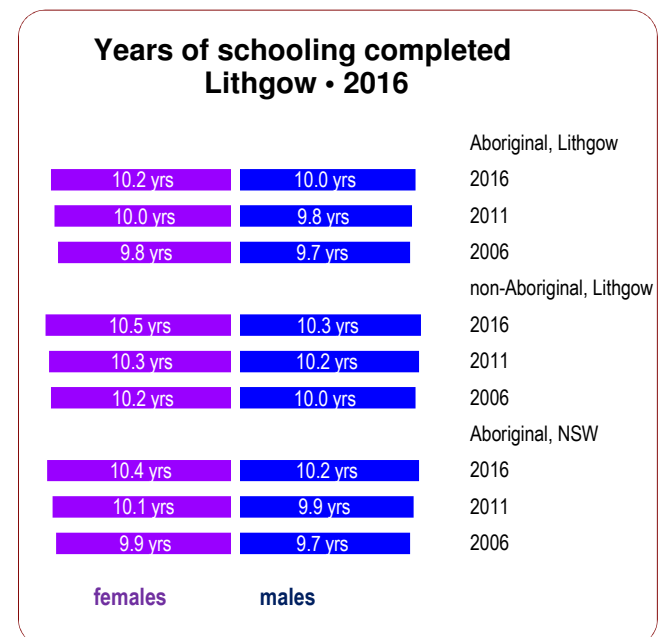

- ⌘ for men had risen by 2 months since 2011, and had risen by 4 months since 2006.
- ⌘ for women had risen by 2 months since 2011, and had risen by 5 months since 2006.

For non-Aboriginal adults, average schooling:

- ⌘ for men had risen by one month since 2011, and had risen by 4 months since 2006.
- ⌘ for women had risen by 2 months since 2011, and had risen by 4 months since 2006.

The average schooling of Aboriginal adults in NSW:

- ⌘ for men had risen by 4 months since 2011, and risen by 6 months since 2006.
- ⌘ for women had risen by 4 months since 2011, and risen by 6 months since 2006.

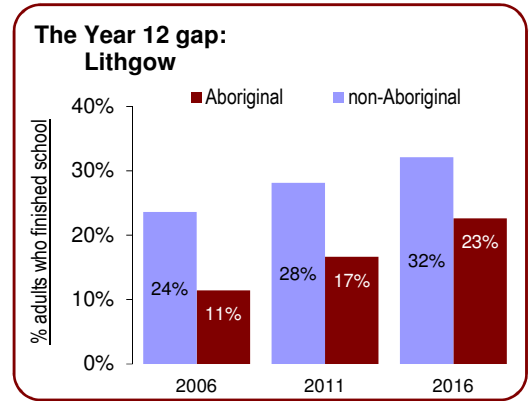

Education Achievement Indicators

The Year 12 gap

% of adults (15+) who have left school

The proportion of adults who have completed Year 12 is an important indicator of a community's educational resources. Nationally, over half of all adults (58%) have completed Year 12.

- ⌘ In 2016, 23% of Lithgow Aboriginal adults had completed Year 12, compared with 32% of non-Aboriginal adults. The Year 12 gap was -10%.
- ⌘ The Year 12 gap had closed by 2% since 2011, after having closed by 1% over the previous five years.
- ⌘ The Year 12 gap in NSW was -28% and had narrowed by 1% since 2011. It widened by 2% between 2006 and 2011.

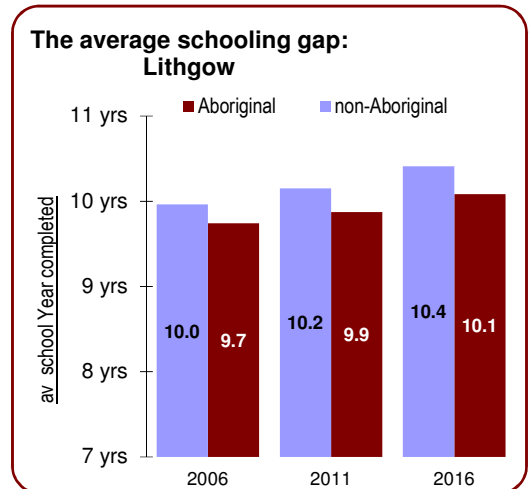

The average schooling gap

average school Year completed

The average Year of schooling completed by adults is an indicator of a community's educational resources. Nationally, the average is Year 11.

- ⌘ In 2016, Lithgow Aboriginal adults had completed an average of Year 10.1 at school, compared with Year 10.4 for non-Aboriginal adults. The average schooling gap was -0.3 years.
- ⌘ The average schooling gap had barely changing since 2011, after having widening by one month over the previous five years.
- ⌘ The average schooling gap in NSW was 8 months. It had changed little since 2011, after having changed little between 2006 and 2011.

Tertiary qualifications

The type and extent of post-school qualifications has a major influence on the earning capacities of a community. In the 2016 Census, 421 Aboriginal adults in Lithgow reported having tertiary educational qualifications, which was 51% of the number aged 15+.

By comparison, 45% of Aboriginal adults in NSW and 53% of non-Aboriginal adults in Lithgow had a tertiary qualification.

36 Aboriginal adults in the LGA had a degree or higher qualification (4%), with 10 having a postgraduate degree.

- ⌘ In NSW, 7% of the Aboriginal residents had a degree or higher qualification.
- ⌘ 10% of the non-Aboriginal residents of Lithgow had a degree or more.

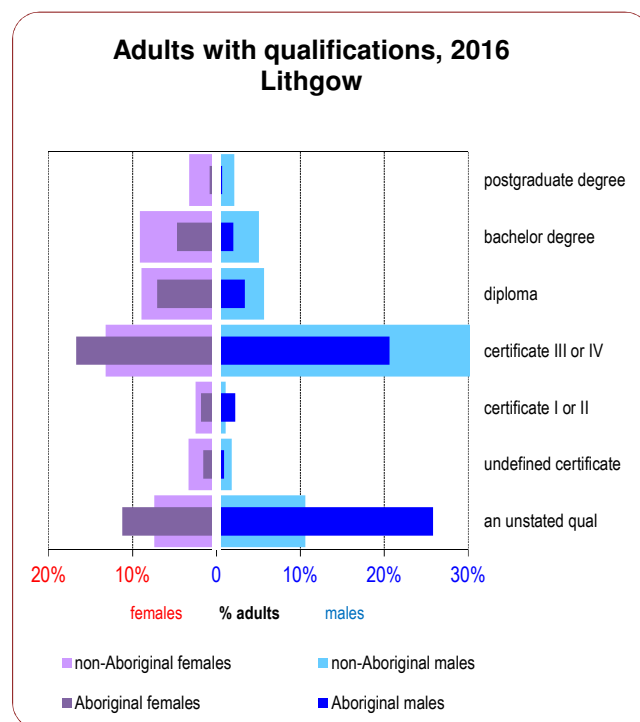

The most common highest qualification held by Aboriginal adults here were:

- certificate III or IV, held by 156 people (19%);
- an unstated qual, by 153 people (19%);
- diploma, by 40 people (5%).

While the number of Aboriginal adults in Lithgow rose by 44% from 2011 to 2016, the number with qualifications rose by 71%. There were:

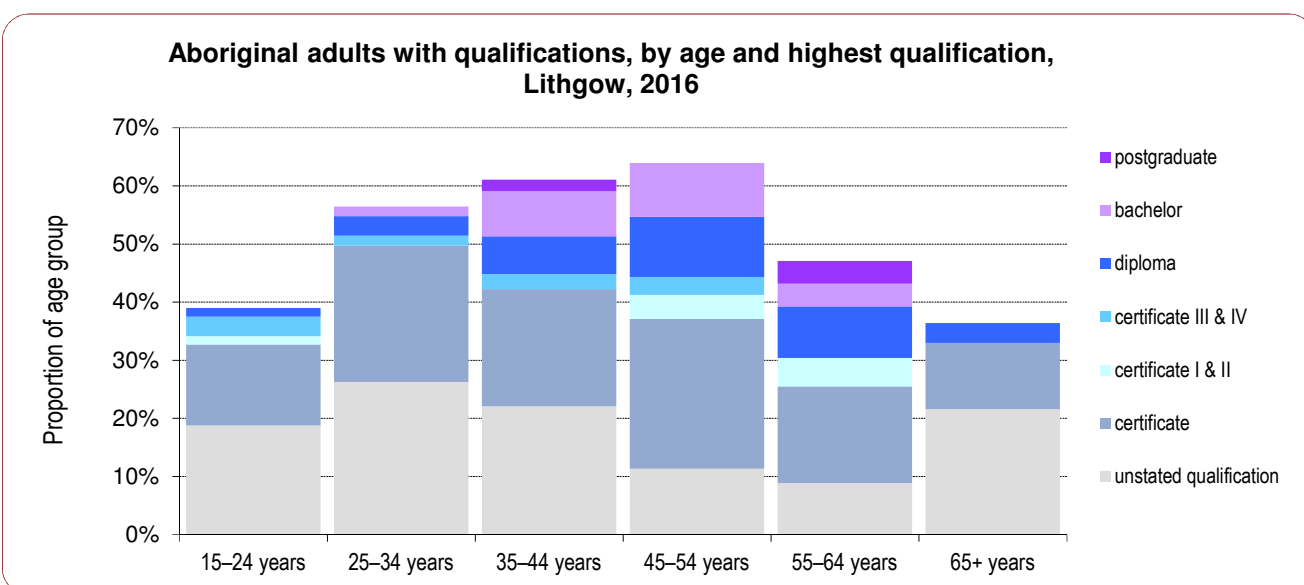

- 71 more with a certificate III or IV;
- 26 more with a diploma;
- 12 more with a bachelor degree.

In the decade from 2006, the number of Aboriginal adults in the LGA with qualifications increased by 117%, while the adult population increased by 94%. There were 109 more with a certificate III or IV and 26 more with a diploma qualification.

In this decade, the number of Aboriginal adults in NSW with qualifications increased by 99%. There were 204% more with a diploma and 200% more with a postgraduate degree.

The chart below shows how the level of qualifications varies with age. Here, Aboriginal people aged 45–54 years had the most higher qualifications, then people aged 35–44 years and 25–34 years.

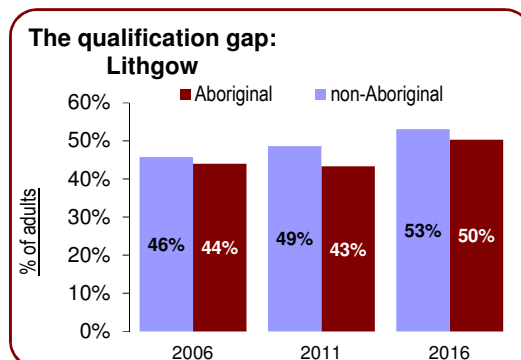

Higher Education Indicators

The qualification gap

% of adults 15+ with a post-school qualification

Tertiary and further education is becoming essential for many occupations, so the proportion of adults with post-school qualifications is a broad indicator of a community's earning capacity.

- ⌘ In 2016, 50% of Lithgow Aboriginal adults aged 15+ had a post-school qualification, compared with 53% of non-Aboriginal adults. The qualification gap was -3%.
- ⌘ The qualification gap had closed by 2% since 2011, after having widened by 3% over the previous five years.
- ⌘ The qualification gap between Aboriginal and non-Aboriginal adults in NSW was -14% and had narrowed by 1% since 2011. It widened by 1% over 2006 to 2011.

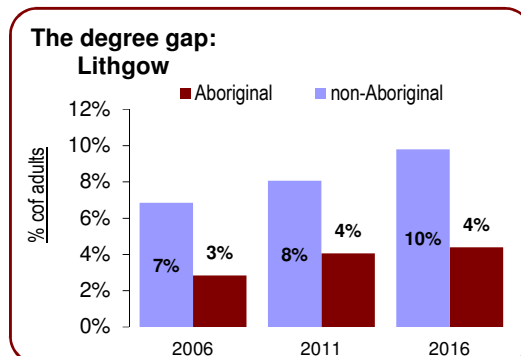

The degree gap

% of adults 15+ with a degree or higher qualification

Most higher skilled and better paid jobs require a university degree or equivalent for entry, so the proportion of adults with a degree or higher indicates the community's capacity to gain these jobs.

- ⌘ In 2016, 4% of Lithgow Aboriginal adults aged 15+ had a degree or higher qualification, compared with 10% of non-Aboriginal adults. The degree education gap was -5%.
- ⌘ The degree gap had widened by 1% since 2011, after having changed little over the previous five years.
- ⌘ The degree gap between Aboriginal and non-Aboriginal adults in NSW was -19% and had widened by 3% since 2011. It widened by 3% over 2006 to 2011.

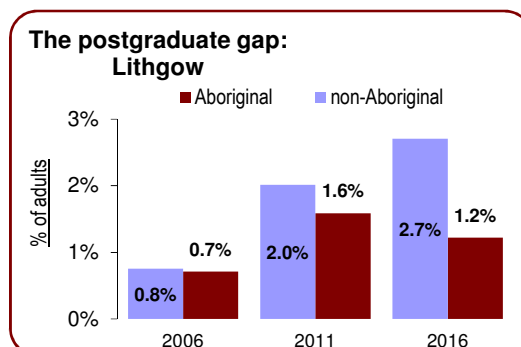

The postgraduate gap

% of adults 15+ with a postgraduate qualification

Increasingly, getting promoted in many industries requires a post-graduate qualification, but the number of Aboriginal people with post-graduate degrees has been low.

- ⌘ In 2016, 1.2% of Lithgow Aboriginal adults aged 15+ had a post-graduate qualification, compared with 2.7% of non-Aboriginal adults. The postgraduate gap was -1.5%.
- ⌘ The postgraduate gap had widened by 1.1% since 2011, after having widened by 0.4% over the previous five years.
- ⌘ The postgraduate gap between Aboriginal and non-Aboriginal adults in NSW was -6.2% and had widened by 1.3% since 2011. It widened by 2.1% over 2006 to 2011.

Disability levels

In 2016 in Lithgow, 101 Aboriginal residents had a long-term severe disability; 8.4% of the population. Among all Lithgow's residents, 6.6% reported a disability.

People with a long-term severe disability are those needing help or assistance with self-care, mobility or communication, because of a disability, long-term health condition or old age. This data compares Aboriginal people with the total population.

- ⌘ Disability rates tend to rise with age. In 2016, they peaked among Aboriginal 55–64 year olds (16%).

Among younger Aboriginal residents, the disability rate was highest among 5–14 year olds at 14% and 35–44 year olds at 9%.

Because Aboriginal communities tend to have fewer people in the oldest age groups where disability rates are much higher, the overall disability rate can be lower than in non-Aboriginal communities. This can mask much higher rates in some age groups.

- ⌘ In this LGA, the overall Aboriginal disability rate was 1.3 times that in the overall population: 8.4% compared with 6.6%.

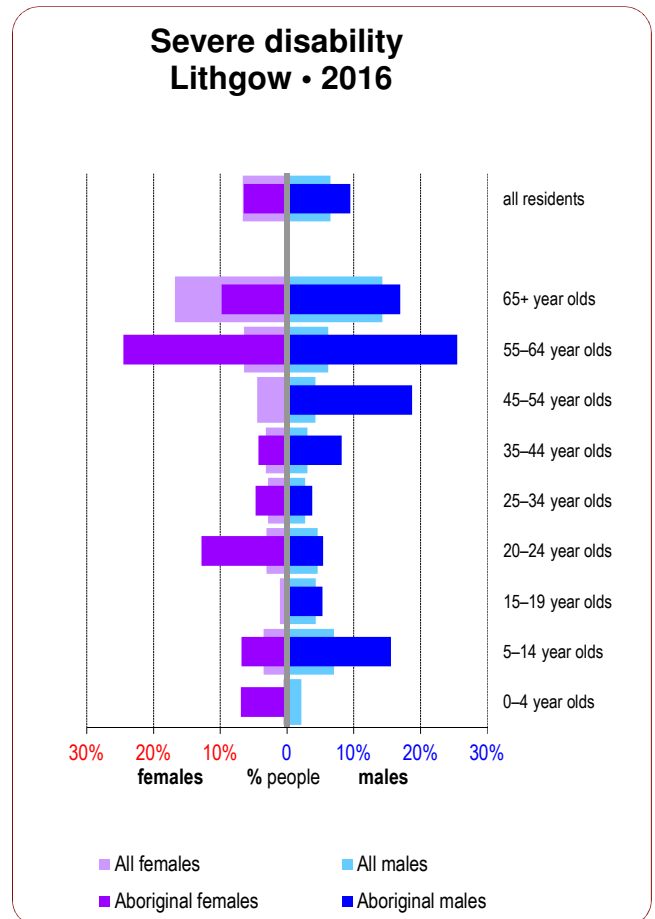

Among 35–44 year olds, the Aboriginal disability rate (9%) was 3 times the overall rate (2.9%);

Among 0–4 year olds, the Aboriginal disability rate (3%) was 3 times that of all residents (1.0%).

- ⌘ Aboriginal disability rates were higher for men than women: 9.5% to 6.5%. Among all residents, they were similar for men and women: 6.5% to 6.6%.

There were 2.0 females per male among 20–24 year olds with a disability.

On the other hand, there were 2.3 males per female among 35–44 year olds with a disability. There were only males among those with a disability aged 15–19, 45–54.

From 2011 to 2016, the overall disability rate among Aboriginal residents of the LGA rose from 6.7% to 8.4%.

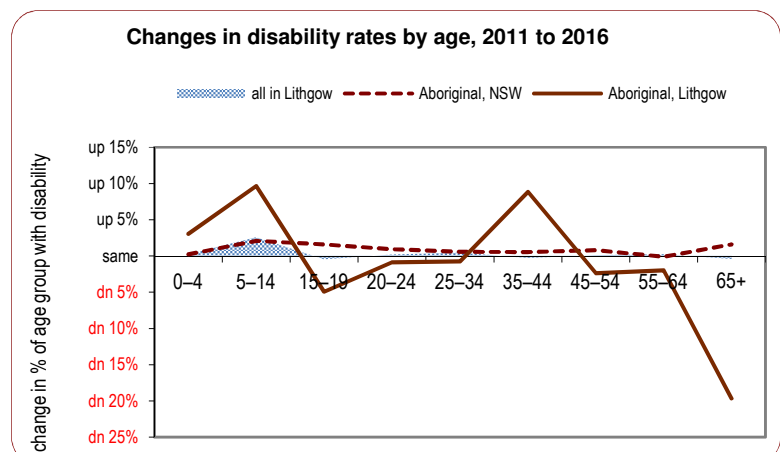

Among Aboriginal people in NSW, the disability rate rose from 6.2% to 7.6%.

Among all Lithgow residents, the disability rate rose 0.8%, and was 6.6% in 2016.

In the LGA, the greatest change in the Aboriginal disability rate was the increase among those aged 5–14, from 3.8% in 2011 to 13.5% in 2016.

Disability rates also rose among 35–44 year olds and 0–4 year olds.

Disability rates fell most among those aged 65+ years.

Disability care given

In the 2016 Census, 118 Aboriginal adults in Lithgow, 14% of the adult population, reported that they gave assistance to a person with a severe or profound disability. There were at that time 101 Aboriginal residents who reported a severe or profound disability.

⌘ Across the age groups, the proportion of Aboriginal people caring for a person with a disability ranged from 26% of 45–54 year olds and 20% of 55–64 year olds to 3% of 15–19 year olds.

⌘ Carers are more often women than men. In this Aboriginal community, there were 1.6 females per male among carers.

Female carers were most common among 20–24 year olds with 4.0 females per male caring, and among 55–64 year olds, with 2.7 females per male caring.

Male carers were most common among carers aged 25–34 with 1.2 males per female caring found among 15–19 year olds, but with small numbers.

⌘ The 14% carer rate among Aboriginal residents was higher than the average for all adults in the LGA (12%).

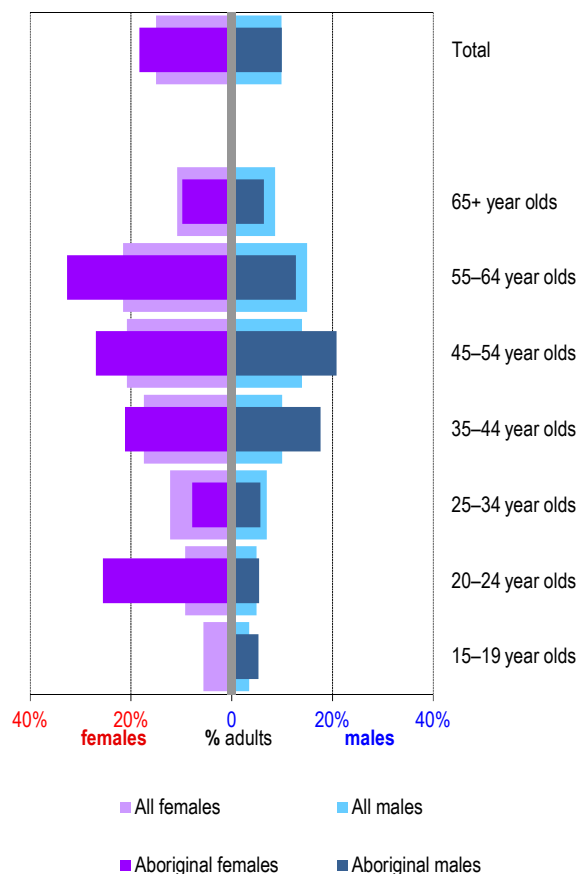

Among 20–24 year olds, the proportion of Aboriginal carers was 1.7 times the average.

Among 45–54 year olds, the proportion of Aboriginal carers was 1.5 times the average.

⌘ In NSW, 15% of Aboriginal adults were caring for a person with a disability.

Relative to the NSW Aboriginal community, there were 6% more carers among Aboriginal people aged 45–54 here. There were 7% fewer carers here among those aged 25–34.

Carers • Lithgow • 2016

From 2011 to 2016, overall caring rates among Aboriginal adults in the LGA rose from 12% to 14%, an increase of 2%.

⌘ Among Aboriginal adults in NSW, caring rates rose by 1%.

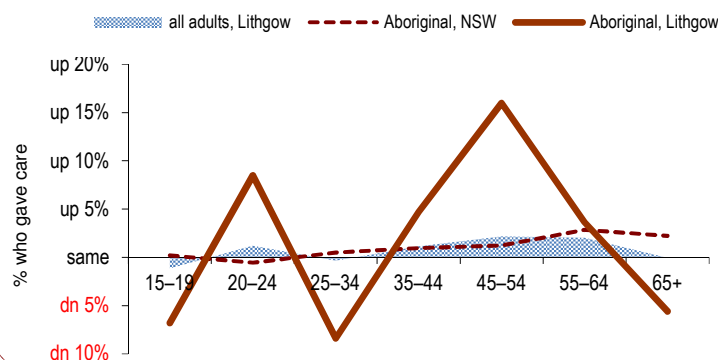

Among all Lithgow's adults, caring rates rose by 1%.

⌘ In the LGA, Aboriginal caring rates increased most among 45–54 year olds, from 10% in 2011 to 26% in 2016.

Caring rates also rose 8% among 20–24 year olds and 5% among 35–44 year olds..

Caring rates fell most among 25–34 year olds, down by 8%, and among those aged 15–19, down by 7%.

Changes in caring rates, by age, 2011–2016

Disability Indicators

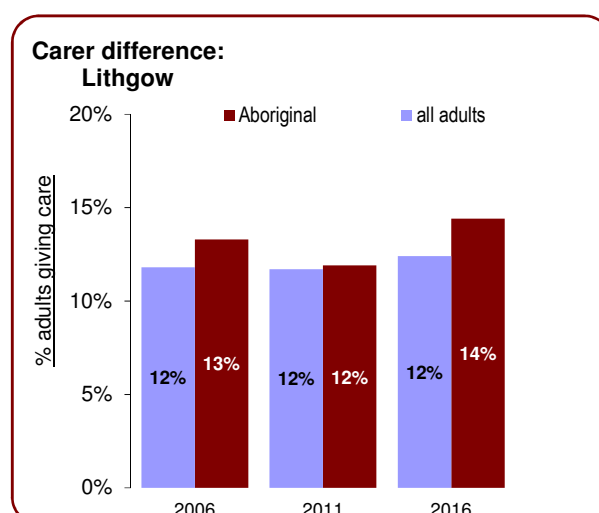

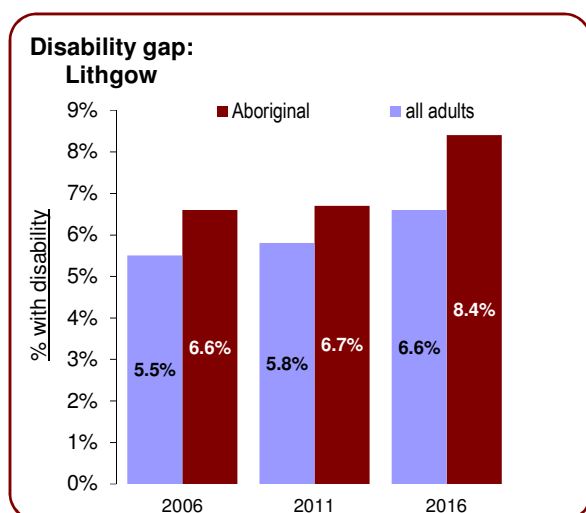

The disability gap

% of people with a severe, long-term disability

Disability rates provide a useful indicator of a community's health and need for support services. Nationally, disability rates among Aboriginal people are about 25% higher than overall rates, across most age groups.

- ⌘ In 2016, 8.4% of Lithgow's Aboriginal residents had a severe, long-term disability, compared with 6.6% for all residents. The disability gap was +1.8%. The Aboriginal disability rate was 1.3 times the overall rate.
- ⌘ The disability gap in Lithgow had widened by 0.9% since 2011, after having changed little over the previous five years.
- ⌘ The disability gap in NSW was +2.2% and had widened by 0.9% since 2011.

In the Census, people with disabilities are those with a severe or profound disability lasting more than six months, who require help with daily activities, self-care or communicating.

The carer difference

% of adults caring for a person with a disability

Aboriginal people have higher disability rates and larger families, so often have proportionally more carers than the general population.

- ⌘ In 2016, 14% of Lithgow's Aboriginal adults (aged 15+) provided assistance to a person with a severe disability, compared with 12% of all adults. The carer difference was +2% (rounded).
- ⌘ The carer difference in Lithgow had widened by 2% since 2011, after having closed by 1% over the previous five years.
- ⌘ The carer difference in NSW was +3% in 2016. This had widened by 0.7% since 2011.
